About COUNTER

The use of online information resources is growing rapidly. It is widely agreed by producers and purchasers of information that the use of these resources should be measured in a more consistent way. Librarians want to understand better how the information they buy from a variety of sources is being used; publishers want to know how the information products they disseminate are being accessed. An essential requirement to meet these objectives is an agreed international set of standards and protocols governing the recording and exchange of online usage data. The COUNTER Codes of Practice provide these standards and protocols and are published in full on this website. Currently available are:

Release 2 of the COUNTER Code of Practice for Journals and Databases (published April 2005)

Release 1 of the COUNTER Code of Practice for Books and Reference Works (published in March 2006)

COUNTER Organizational Structure

In 2003 COUNTER was formally incorporated in England as a not-for-profit company, Counter Online Metrics. It has a Board of Directors, which has invested responsibility for the management and direction of COUNTER in the Executive Committee, chaired by Richard Gedye of Oxford University Press. Peter Shepherd, Project Director, is responsible for the day-to-day management of COUNTER and reports to the Executive Committee.

The International Advisory Board of COUNTER consists of leading experts from the publishing, library and intermediary world. Click here to view the membership of the COUNTER Board of Directors, Executive Committee and International Advisory Board.

Membership information
Become a COUNTER member now

COUNTER is owned by its members. Publishers, intermediaries, libraries, consortia and industry organizations are all eligible for full, voting membership. The following annual membership rates apply for 2007:

- Publisher £530 ($800)
- Intermediary £530 ($800)
- Library £265 ($400)
- Library Consortium £355 ($530)
- Industry Organization £265 ($400)
- Library Affiliate £106 ($160)

Simplifying Statistics....

ScholarlyStats
From MPS TECHNOLOGIES

Welcome: **Guest User**

Tuesday, September 04, 2007

You are at: Home

Home

Welcome to ScholarlyStats - the online portal for library usage statistics. ScholarlyStats has been developed to provide information professionals with a single point of access to their vendor usage statistics. Providing *faster access* to consolidated data, it can help you to analyse usage of your online content *more easily* and *more effectively*.

ScholarlyStats delivers consolidated reports to libraries around the globe, providing a clearer view of usage of over **70,000 journals** and almost **450 databases** from **46 platforms**. We can also integrate your consolidated usage reports with **3 integration partners**. We are adding new platforms and partners all the time and welcome suggestions. To see what is currently available, download here.

For an overview of the service, click here.

Quotes

" Before ScholarlyStats we didn't have enough support to merge, compare and really use our statistics. Having this data so easily available has been a huge time saver and the reports are a leap forward in using the data for meaningful comparisons. "

Diane Grover,
University of Washington

Problem statement

Libraries engaged in managing usage statistics for online content face both challenges and opportunities.

Challenges: Usage statistics are widely available from online content providers and Project COUNTER has provided useful guidelines for counting and reporting usage. Unfortunately, the statistics are not yet available in a consistent data container and the administrative cost of individual provider-by-provider downloads is high.
Opportunities: The emergence of Electronic Resource Management Systems with the capability of storing usage statistics has accelerated the demand from libraries to acquire usage statistics. A number of non-ERMS vendors are also interested in developing business models for the consolidation of statistics for library customers. All of the interested parties are seeking a standard model for machine to machine automation of statistics harvesting.

A cross-industry group of solution-seekers has emerged to apply their skills to building this model. Participants from libraries, ILS vendors and online content providers have collaborated on developing a model that includes an automated request and response for usage statistics. The request and response mechanisms have been designed within a web services model.

What is Ulrich's Serials Analysis System™?

Ulrich's Serials Analysis System is a powerful tool for professionals who need to identify, analyze, evaluate and create reports about their print and electronic serials holdings.

Ulrich's Serials Analysis System provides serials librarians, acquisitions and subject specialists, collection managers, electronic resource librarians, and other librarians, as well as serials publishing professionals, with detailed information on the print and electronic serials they have -- and don't have.

For Libraries: Working with your own serials collections, Ulrich's Serials Analysis System integrates internal and evaluative, external information library professionals need to make collection-critical decisions.

For Publishers: Learn how you compare to your competitors by category, quickly analyze details on any publisher's offerings, and answer questions such as "which publishers or aggregators should I partner with?" using informed, statistical data.

Plus, every subscription to Ulrich's Serials Analysis System includes site-wide access to ulrichsweb.com.

Help

SELECT STATISTICS TO VIEW

You may choose a set of reports to view by selecting one of the following options:

Your Library Reports

View analytical reports for lists you
have uploaded into your account.
These reports can be compared against
our Ulrich's Universe or Ulrich's Core,
against a Peer Group, or against an
Aggregator database.

Comparison & Overlap Analysis Reports

Compare two or more of your uploaded
lists. You will have the ability to do a
direct one-to-one file comparison, or
compare one list to multiple lists to
identify gaps and redundancies.

Aggregator Comparison Reports

View analytical reports for Aggregator
Databases. You will have the ability to
compare up to five at one time or
compare individual databases to either
the Ulrich's Universe or Ulrich's Core.

Peer Group Reports

View analytical reports for selected Peer Groups of
Institutions. Peer Group consists of institutions who
reflect similar demographics, including 12-month
FTE, region of the U.S. or Canada, and Carnegie
Classification (U.S. libraries only).

Top Publisher Reports

View analytical reports for more than 100 serials
publishers along with their imprints and divisions.
You may compare publishers' offerings to either
Ulrich's Universe or Ulrich's Core.

Click here to create, modify, or delete uploaded files for this account.
