What if I Don't Have Access?

Yikes!

Dave Laslo, photographed by Gordon Gore.

Open Access

What?

“Open-access (OA) literature is digital, online, free of charge, *and* free of most copyright and licensing restrictions.”

-Peter Suber

Open Access

How?

-pay for dissemination, not access

Two complementary strategies to achieve open access:

1. Publish in an Open Access journal
2. Publish in a conventional journal and deposit a copy of the published paper in an open access archive.

Open Access

How?

Open Access journals

- author-pays, subsidized, advertisements, society membership fees
- or, some combination or variation of above.

▶ **How do I obtain a Copyright Transfer Form?**
You will receive a form automatically by e-mail or post once your article is received by Elsevier's Production Department.

▶ **Can I post my article on the internet?**
You can post your version of your article on your personal web page or the web site of your institution, provided that you include a link to the journal's home page or the article's DOI and include a complete citation for the article. This means that you can update your version (e.g. the Word or Tex form) to reflect changes made during the peer review and editing process.

▶ **What rights do I retain as author?**
As an author, you retain rights for large number of author uses, including use by your employing institute or company. These rights are retained and permitted without the need to obtain specific permission from Elsevier.

- the right to make copies of the article for their own personal use, including for their own classroom teaching use;
- the right to make copies and distribute copies (including through e-mail) of the article to research colleagues, for the personal use by such colleagues (but not commercially or systematically, e.g. via an e-mail list or list serve);

Canadian Institutional Repositories

An institutional repository (IR) is a digital collection of an institution's intellectual output. IRs are a key infrastructure component in the digital environment because they provide better access to our digital assets and they ensure that digital objects are managed appropriately.

Since 2003, the Canadian Association of Research Libraries has been promoting the use of institutional repositories in Canada through the [CARL Institutional Repositories Program](#). As a result, over 80% of CARL members have implemented an IR at their institution and most libraires will have an IR within the coming year.

Open Access

Why?

Widen dissemination, accelerate research, enrich education, share learning among rich & poor nations, enhance return on taxpayer investment in research, reduce the overall costs of scholarly publishing.

1. Preamble

As a publicly funded organization, CIHR has a fundamental interest in ensuring that the findings that result from the research it funds, including research publications and publication-related data, are available to the widest possible audience. and at the earliest possible opportunity. Advancements in science and
