"Karnataka govt. to launch E-passport! *"

20. Aug. '20

Waterstone

Karnataka govt. is all set to launch an E-passport. Karnataka Chief Minister B.S. Yediyurappa has informed that the E-passport will be launched in the state soon. The E-passport will be based on blockchain technology and will have a unique digital identity for each citizen. The E-passport will replace the existing passport and will be issued to all citizens of the state. The E-passport will have several advantages over the existing passport, including faster processing, reduced fraud, and increased security. The E-passport will also be easy to carry and will not require a physical passport to be carried around. The launch of the E-passport is a significant step towards digital India and will help in reducing corruption and increasing transparency in the passport system. The E-passport will be available to all citizens of the state and will be issued free of cost. The government has also instructed all banks and financial institutions to accept the E-passport as a valid form of identification. The launch of the E-passport is a significant step towards digital India and will help in reducing corruption and increasing transparency in the passport system. The E-passport will be available to all citizens of the state and will be issued free of cost. The government has also instructed all banks and financial institutions to accept the E-passport as a valid form of identification. The launch of the E-passport is a significant step towards digital India and will help in reducing corruption and increasing transparency in the passport system. The E-passport will be available to all citizens of the state and will be issued free of cost. The government has also instructed all banks and financial institutions to accept the E-passport as a valid form of identification.
