Abstract: Ever since the path-breaking empirical studies by Schott (1998) world systems scholars start from the well-established assumption that world science is a single gigantic center-periphery relationship. The strategic and tactical practical conclusions for individual scholars and their agenda in the scientific periphery and the semi-periphery, to which Europe increasingly belongs, are much harder to draw than the general diagnosis.

Where can scholars from outside the US attractively publish their manuscripts for the world market? How does the European Union make its point in the global scientific arena in the field of the debates about social policies and globalization? Is there a way, especially for scholars from the new member countries of the European Union, and from the newly formed "Union for the Mediterranean", to effectively publish their works on the world market?

Only three European social affairs ministries (France, Poland, Spain) afford themselves the luxury to publish their own scientific journal, while others must rely on international publishing to make their expertise heard internationally.

This article tries to answer tentatively such a difficult and strategic question, and quantitatively compares the performance of Amsterdam University Press (EU); Ashgate (EU); Blackwell (EU); Cambridge UP (EU); Campus (Frankfurt/Ann Arbor) (EU); Cornell UP (USA); Edward Elgar (EU); Houghton/Mifflin (US); IOS Press (EU); Lexington (US); Monthly Review Press (US); Nova Science Publishers (US); Oxford University Press (EU); Palgrave Macmillan (EU); Praeger Publishers (EU); Routledge (EU); Rowman/Littlefield (US); Sage Publications (US); Springer-Verlag (US); St. Martin's Press (US); and Transaction Publishers (US), which in between them control a sizeable share of the social science academic book publishing market in such fields of political science as globalization or European Union studies, with up to nineteen quantitative performance criteria, ranging from market success rates on global markets both in North America as well as mainly in the Asia-Pacific and European region, comparative library presence rates at international organizations libraries, such as the European Union and the United Nations, and the quantitative impact of published titles on combined indices of peer reviewed journals and the international daily and weekly press. In addition, our study evaluates the impact of the companies' books and journals on the literature, contained in "Google book search" and "Google scholar", all per total company book and serials output.

Our quantitative indicators are:

Shorthand	Full variable label
Total Japanese library holdings (NACSIS)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Japan (NACSIS)
France (Cat. Col. de France)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in France (Cat. Col. de France)
COPAC UK + IRE	Books and serials produced by the company present in the entire library system as a % of total titles: academic and research library holdings in the UK + Ireland (COPAC UK + IRE)
Germany (GBV)	Books and serials produced by the company present in the entire library system as a % of total titles in Germany (GBV; GBV Common Library Network of the German States Bremen, Hamburg, Mecklenburg-Vorpommern, Niedersachsen, Sachsen-Anhalt, Schleswig-Holstein, Thüringen and the Foundation of Prussian Cultural Heritage)
Spain (REBIUN)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Spain (REBIUN)
European Commission Library Brussels	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the European Commission Library (Catalogue ECLAS)
European University Institute, Firenze	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the European University Institute, Firenze
Libraries Australia	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Australia ("Libraries Australia")
Dag Hammarskjöld Library, UN	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the Dag Hammarskjöld Library, UN
ILO LABORDOC	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the International Labor Organization (ILO LABORDOC)
Ebsco abstracts	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in Ebsco Host abstracts
Cambridge CSA	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in Cambridge CSA (Cambridge Scientific Abstracts)

DIALOG magazines	Books and serials produced by the company mentioned in the entire document archive as a % of total titles at "DIALOG/Thomson magazines"
Google book search	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Google book search"
Google scholar	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Google scholar"
Questia online	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Questia online"
DIALOG Major US papers	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "DIALOG/Thomson Major US papers"
Share produced books at >50 global libraries	Books produced by the company present at more than 50 libraries in the entire world library system as a % of total book titles [produced books at >50 global libraries]
Share produced serials at >50 global libraries	Serials produced by the company present at more than 50 libraries in the entire world library system as a % of total series titles [produced serials at >50 global libraries]

In terms of their ability to place books on the markets of now 100+ countries well in comparison to total production, the American companies in our sample hold an unparalleled power. The relative market leaders, which get a large percentage of their total book output to more than 50 global libraries each, are:

- Lexington (US)
- St. Martin's Press (US)
- Rowman/Littlefield (US)
- Monthly Review Press (US)
- Praeger Publishers (US)
- Cornell UP (US)
- Ashgate (UK)
- Transaction Publishers (US)
- Edward Elgar (UK)
- Nova Science Publishers (US)

Our results, based on simple combined ranks and more sophisticated non-parametric and parametric, multivariate SPSS XV factor analytical evaluations of indicator performance are a further sign of the fact that Europe would do well to further learn from the culture of major US Universities.

Our final ranking analysis in a four-factor model, explaining more than 80% of publisher efficiency, is the following:

Ranking for	Global market power, especially outside North America	Comparative advantage in journal production	Market penetration in Worldcat countries, especially the US	Comparative advantage in book production specialization
Amsterdam University Press	5	20	21	1
Ashgate	10	18	5	6
Blackwell	15	7	14	15
Cambridge UP	4	6	13	21
Campus (Frankfurt/Ann Arbor)	20	19	18	17
Cornell UP	2	10	9	20
Edward Elgar	6	21	1	3
Houghton/Mifflin	21	3	10	14
IOS Press	12	14	20	12
Lexington	3	15	3	16
Monthly Review Press	1	4	19	5
Nova Science Publishers	19	9	11	4
Oxford University Press	8	8	15	8
Palgrave Macmillan	17	16	8	7
Praeger	11	17	4	10
Routledge	14	12	12	11
Rowman/Littlefield	9	11	7	9
Sage Publications	13	5	16	19
Springer	18	13	17	18
St. Martin's Press	7	2	2	13
Transaction	16	1	6	2

JEL classification: F5 - International Relations and International Political Economy; F50 – General; M3 - Marketing and Advertising; M30 - General

Introduction

Although most European decision makers, observers of the European scene as well as large sections of the European public would agree that the trajectory of European politics to a large extent depends on the capability of European social policy to come to terms with the effects of globalization, it is startling to note that on the global academic level, interest in these issues is not really overwhelming.

Europeans often tried and try to make their voices heard in the international arena. One, very traditional, if you like, "**etatist**" way is that Governments themselves publish a publication series or a journal. Since the author of this article is not only an academic, but also a European government bureaucrat, dealing with strategic international issues of social policy, it should be permitted to mention here that there are indeed three academic journals, published by **European social affairs ministries**, the "*Revue française des affaires sociales*", the Polish "*Polityka Społeczna*", and the Spanish "*Revista del Ministerio de Trabajo y Asuntos Sociales*". In a way, this approach is now gradually being phased out in favor of a strategy to gain a European presence on the global stage by following the paths of academically publishing the studies put out by Ministries or financed by Ministry research money. But what are the effects of these efforts? Is publishing really "**making things public**"? Are "our" voices really being heard in the end?

The French Presidency of the Council of the European Union put forward an ambitious plan to re-formulate the "Lisbon strategy", which was agreed upon by EU-government leaders in 2000 to make Europe the most competitive, knowledge-driven economic space in the world by 2010 (Cohen-Tanugi, 2008). In this plan, technology, science, and Europe's presence in the world are all part and parcel of the debate. The current Lisbon Strategy will, according to Cohen-Tanugi, not be sufficient for Europe to compete with fast-growing Asian economies and needs to be upgraded to a "Lisbon Plus" agenda that encompasses the bloc's external economic policies, Cohen-Tanugi says in his publication. "The EU's growth and jobs strategy needs to be supplemented by a global arm if Europe wants to remain competitive in the future" (<http://www.euractiv.com/en/innovation/france-seeks-ambitious-eu-globalisation-strategy/article-171681>). Cohen-Tanugi calls for the Lisbon Strategy to be renamed "Lisbon Plus" and integrated into a broader

"EuroWorld 2015 Strategy" which would produce a "more comprehensive strategy" than the hitherto Lisbon Agenda. While "Lisbon Plus" would become the EU's internal component of this "strategic vision", the second pillar would rely on common external policies, such as trade, agriculture or the internal market, to help shape globalization. "The importance given to external policies is intended to signal the start of a new phase in the history of European unification in which Europe is no longer centered on itself but on its relationship with the rest of the world," the author claims, highlighting a "genuine paradigm shift". The focus of Lisbon Plus should be on "competitiveness through innovation," Cohen-Tanugi suggests, linking the different economic, social and environmental dimensions. Moreover, the author expresses his hope that the French Presidency (which began on July 1, 2008) will stimulate the so-called "knowledge triangle" (higher education, research and innovation), enhancing the value of Europe's human capital and promoting a new "green economy". "The real global challenge with which Europe is confronted is to stay in the race, in terms of prosperity and international influence, in a world that is destined to be dominated by an America/Asia duopoly," says Cohen-Tanugi. (<http://www.euractiv.com/en/innovation/france-seeks-ambitious-eu-globalisation-strategy/article-171681>).

In the very down-to-earth quantitative approach on "Europe's international influence" in the field of scholarly book and journal production, we show that the think tank of the authors' home country social affairs ministry, the "**European Centre for Social Welfare Policy and Research**", published titles, whose number is catalogued at the **OCLC**, the World Catalogue of library holdings, as 99², 79 of them are available in English, a total eight of them with **Ashgate** publishing company in Aldershot Hants, England; and Burlington, VT, USA. The dramatic efficiency question for European researchers, but also European bureaucracies and European research financing institutions arises out of a closer look at the OCLC statistics for this important research center's English language publications. Only twelve of their 79 publications in English are available at more than 50 research libraries around the globe, and seven out of these twelve were under contract at Ashgate. Assuming for simplicity and fairness that the doubtless quality of the content of the research over the last 25 years of the Center's existence was about the

² Direct reference to keyword "European Centre for Social Welfare Policy and Research" in the OCLC search. OCLC access: courtesy to Fachhochschulstudiengänge Burgenland Ges.m.b.H. University of Applied Sciences, Campus 1, A-7000 Eisenstadt, Department of Science Management.

same, the existence or non-existence of an Ashgate contract assured the Center that its voice is being heard internationally.

With the global availability of integrated data networks, which make such things as global library impact, global quotations of scientific works in scholarly journals, and now, with "**Google book search**", even books possible, it is time to reflect on some of the strategic issues of the future European presence on the global market of ideas.

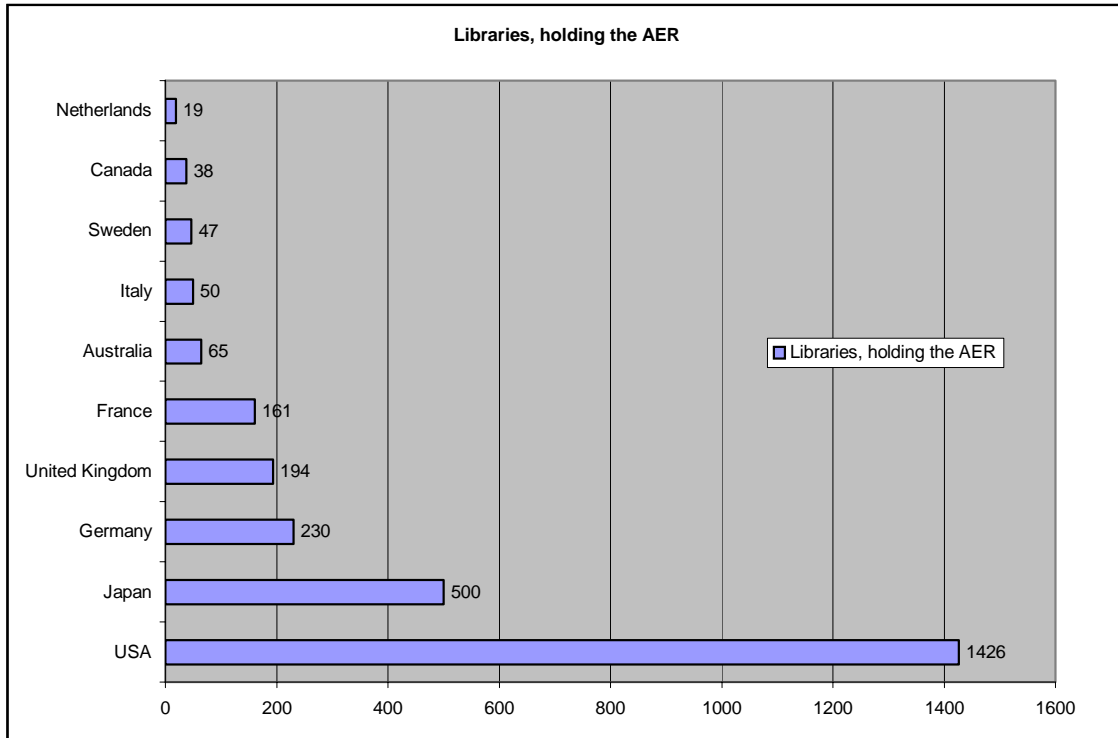

What voice the Europeans have? In this article, it is being argued that 1, 2, 3, many "**Ashgate contracts**" should be sought by European (and for that matter, Mediterranean, African, Asian, Latin American) decision makers to provide for a dignified and efficient academic outlet for their ministries and think tanks, and also for the analytical work at the European Commission and its agencies, especially the European Foundation for the Improvement of Living and Working Conditions in Dublin in the Irish Republic. Arguably, the flagship journal for questions of the "**European social model**" today would be the Sage Publishing "**Journal of European Social Policy**". Its global library presence, contained in the 100+ country OCLC World catalogue library database, is just **111** and in the "**Questia**" system, the best global full content single-click free on-line library, integrating the searchable content of leading scholarly literature from around the globe, we find the following echo for the exact occurrence of the journal title:

Books: 187
Journal Articles: 40
Magazine Articles: 0
Newspaper Articles: 0
Encyclopedia Articles: 0

Without question, the social sciences play an enormous societal role in the English-speaking democracies, especially the United States of America. The "*American Political Science Review*" was founded in 1906, the "*American Economic Review*" was established in 1911, and the "*American Sociological Review*" first appeared in 1936. Preliminary comparisons of the library holdings figures for these three journals as well as randomly picked titles from the profession seem to indicate that 70% up to 80% of total world library holdings of global English language social science production are held in the United States of America. More than 50% of the Nobel Laureates in economics were or are US citizens at the time of the winning of the Prize, and only three of them – one Frenchman, one Soviet

Russian, and one German, had at the time of the Prize Ceremony a passport, which was NOT US, British, British-Dominion/Commonwealth, Dutch or Scandinavian. And even the three "intruders" from France, Germany, and Soviet Russia had their extensive contacts with the major faculties in Britain and America.

Table 1: Nobel Prize Winners in Economics

Year	Name	Nationality	Citations
1969	Ragnar Frisch	Norway	"for having developed and applied dynamic models for the analysis of economic processes."
	Jan Tinbergen	Netherlands	
1970	Paul Samuelson	United States	"for the scientific work through which he has developed static and dynamic economic theory and actively contributed to raising the level of analysis in economic science."
1971	Simon Kuznets	United States	"for his empirically founded interpretation of economic growth which has led to new and deepened insight into the economic and social structure and process of development."
1972	John Hicks	United Kingdom	"for their pioneering contributions to general economic equilibrium theory and welfare theory."
	Kenneth Arrow	United States	
1973	Wassily Leontief	United States	"for the development of the input-output method and for its application to important economic problems."
1974	Gunnar Myrdal	Sweden	"for their pioneering work in the theory of money and economic fluctuations and for their penetrating analysis of the interdependence of economic, social and institutional phenomena."
	Friedrich Hayek	UK ³	
1975	Leonid Kantorovich (Леонид Канторович)	USSR	"for their contributions to the theory of optimum allocation of resources."
	Tjalling Koopmans	United States	
1976	Milton Friedman	United States	"for his achievements in the fields of consumption analysis, monetary history and theory and for his demonstration of the

³ The original Wikipedia entry is wrong. The Encyclopedia Britannica on Hayek clearly states: "Austrian-born British economist noted for his criticisms of the Keynesian welfare state and of totalitarian socialism. In 1974 he shared the Nobel Prize for Economics with Swedish economist Gunnar Myrdal."

			complexity of stabilisation policy."
1977	Bertil Ohlin	Sweden	"for their pathbreaking contribution to the theory of international trade and international capital movements."
	James Meade	United Kingdom	
1978	Herbert Simon	United States	"for his pioneering research into the decision-making process within economic organizations."
1979	Theodore Schultz	United States	"for their pioneering research into economic development research with particular consideration of the problems of developing countries ."
	Arthur Lewis	Saint Lucia	
1980	Lawrence Klein	United States	"for the creation of econometric models and the application to the analysis of economic fluctuations and economic policies."
1981	James Tobin	United States	"for his analysis of financial markets and their relations to expenditure decisions, employment, production and prices."
1982	George Stigler	United States	"for his seminal studies of industrial structures, functioning of markets and causes and effects of public regulation ."
1983	Gérard Debreu	United States	"for having incorporated new analytical methods into economic theory and for his rigorous reformulation of the theory of general equilibrium ."
1984	Richard Stone	United Kingdom	"for having made fundamental contributions to the development of systems of national accounts and hence greatly improved the basis for empirical economic analysis."
1985	Franco Modigliani	United States	"for his pioneering analyses of saving and of financial markets ."
1986	James M. Buchanan	United States	"for his development of the contractual and constitutional bases for the theory of economic and political decision-making ."
1987	Robert Solow	United States	"for his contributions to the theory of economic growth ."
1988	Maurice Allais	France	"for his pioneering contributions to the theory of markets and efficient utilization of resources ."
1989	Trygve Haavelmo	Norway	"for his clarification of the probability theory foundations of econometrics and his analyses of simultaneous economic structures."
1990	Harry Markowitz Merton Miller William Forsyth	United States	"for their pioneering work in the theory of financial economics ."

	Sharpe		
1991	Ronald Coase	United Kingdom	"for his discovery and clarification of the significance of transaction costs and property rights for the institutional structure and functioning of the economy."
1992	Gary Becker	United States	"for having extended the domain of microeconomic analysis to a wide range of human behaviour and interaction, including non-market behaviour."
1993	Robert Fogel Douglass North	United States	"for having renewed research in economic history by applying economic theory and quantitative methods in order to explain economic and institutional change."
1994	John Harsanyi	United States	"for their pioneering analysis of equilibria in the theory of non-cooperative games ."
	John Forbes Nash	United States	
	Reinhard Selten	Germany	
1995	Robert Lucas, Jr.	United States	"for having developed and applied the hypothesis of rational expectations , and thereby having transformed macroeconomic analysis and deepened our understanding of economic policy."
1996	James Mirrlees	United Kingdom	"for their fundamental contributions to the economic theory of incentives under asymmetric information."
	William Vickrey	United States	
1997	Robert C. Merton	United States	"for a new method to determine the value of derivatives ."
	Myron Scholes	United States	
1998	Amartya Sen	India	"for his contributions to welfare economics."
1999	Robert Mundell	Canada	"for his analysis of monetary and fiscal policy under different exchange rate regimes and his analysis of optimum currency areas."
2000	James Heckman	United States	"for his development of theory and methods for analyzing selective samples."
	Daniel McFadden	United States	"for his development of theory and methods for analyzing discrete choice ."
2001	George Akerlof Michael Spence Joseph E. Stiglitz	United States	"for their analyses of markets with asymmetric information ."
2002	Daniel Kahneman	United States Israel	"for having integrated insights from psychological research into economic science, especially concerning human judgment and decision-making under uncertainty."

	Vernon L. Smith	United States	"for having established laboratory experiments as a tool in empirical economic analysis, especially in the study of alternative market mechanisms."
2003	Robert F. Engle	United States	"for methods of analyzing economic time series with time-varying volatility (ARCH)."
	Clive Granger	United Kingdom	"for methods of analyzing economic time series with common trends (cointegration)."
2004	Finn E. Kydland	Norway	"for their contributions to dynamic macroeconomics: the time consistency of economic policy and the driving forces behind business cycles ."
	Edward C. Prescott	United States	
2005	Robert Aumann (רובינא לראשי)	Israel United States	"for having enhanced our understanding of conflict and cooperation through game-theory analysis."
	Thomas Schelling	United States	
2006	Edmund Phelps	United States	"for his analysis of intertemporal tradeoffs in macroeconomic policy."
2007	Leonid Hurwicz Eric Maskin Roger Myerson	United States	"for having laid the foundations of mechanism design theory."

Source: Wikipedia, http://en.wikipedia.org/wiki/Nobel_Prize_in_Economics

Sooner or later, we Europeans, or for that matter, Africans, Asians and Latin Americans as well as people from Oceania will discover that the world market for scientific products is very much dominated by the **Anglo-American** large and even medium-sized **companies** – for reasons of their enormous efficiency, for reasons of the science systems as a large gigantic “centre periphery system”, or both, and that “good products” – first of all – are confronted by the **language barrier**. Take the three ministerial journals on social policy, again. The French intellectual flagship for a “social Europe” in the world just makes it to 50 libraries around the globe. ***Parlez-Vous Francaise? Stupid!*** But even the European attempt to transnationalize ourselves, and to offer the scientific products about “social Europe” to an American company, Sage publications, achieves only about double the size of the library impact as the “*Revue française des affaires sociales*”. The Polish “*Polityka Społeczna*”, by the way a truly excellent journal on social policy in the transformation and post-transformation countries, is not even contained at all in the OCLC system, and the Spanish “*Revista del Ministerio de Trabajo y Asuntos Sociales*” is just available at four OCLC libraries.

The next barrier is the sheer fact that **European issues** – the issues of an economically and demographically old continent, enjoying a certain amount of stability + boredom from an international perspective, **are not that attractive anymore around the globe**. Arguably the most widely circulated volume on globalization and European integration in the world, the **Palgrave/St. Martin's Press** title (2000) ***“Globalization, Europeanization, and the end of Scandinavian social democracy?”*** by Geyer, Robert.; and Ingebritsen, Christine, just made it to 188 global libraries, while **Samuel P. Huntington's “Clash”** [“The clash of civilizations and the remaking of world order” Author: Huntington, Samuel P. New York: Simon & Schuster, 1996], superstar, made it to 1609. Even large-scale peasant demonstrations in front of the EU Commission main building in Brussels will not be a match to the sense of urgency and drama of 9/11, for which, according to many, rightly or wrongly, Huntington provided the explanatory theory. At any rate, the Questia system of references finds none the less than 1,721 references to the exact occurrence of Huntington's title (among them 1542 books, 132 journal articles, 43 magazine articles and four newspaper articles), and the term, coined by Huntington *“clash of civilizations”*, occurred in 8174 publications, contained in the Questia system, i.e. 6951 books, 542 journal articles, 491 magazine articles, and 190 newspaper articles.⁴

⁴ Science, at times, can also be an amusing subject, indeed:

	Exactly quoting Huntington's book title: “The clash of civilizations and the remaking of world order”	Referring to “The clash of civilizations”	implied percentage of works, referring to Huntington, 1996, without referring to him exactly in the literature (i.e. most presumably quoting Huntington without having read his work)
all global references to “Clash of civilizations”	1721	8174	78,9
references in books	1542	6951	77,8
references in journals	132	542	75,6
references in magazines	43	491	91,2
references in newspaper articles	4	190	97,9

The present article, written by an Austrian academic, who has been active in the field now for almost four decades, should thus reflect a simple question: how **public** in the end is what we “Europeans” “**publish**”, and how “**public**” are at the end of the day our “**published**” academic reflections in the field of “critical” globalization and European studies research? **How much a proportion of the global audiences we can really reach?** And what strategic implications we can draw from the admittedly limited evidence we could gather? We will evaluate here, with the data we have – limited as they may be – the evidence on the publisher efficiency of 21 major global companies, which frequently publish on such issues as “European Union”, “globalization”, “social policy” etc. Strategic, as this paper is being oriented, first of all we have to ask ourselves – what is the place of Europe in the system of global knowledge production in general?

Let there be also **no illusions** about true **global market size**. Academic publishing in the social sciences, especially of book manuscripts, which are not designed for the general public, but really for graduate students and fellow faculty members, is rather a question of hundreds and not thousand global prints. Also, let us there be no illusion about total output of all companies, not just the 21 companies under review here, in the field. The “World Cat” open access version lists around 77.000 titles with the catchword “political science” published since 1906, the year, when the “*American Political Science Review*” first appeared in America. In all, there are around 113.000 books in the *Google book search* system, referring to “**political science**”, and **2740 titles** refer explicitly to the “**American Political Science Review**”. The *Questia* library contains around 4800 books with such a reference, and additionally 1540 journal articles, 30 magazine articles and one single newspaper article.

We do not know, of course, the sales figures of the companies involved, and of course we do not know the sales figures of presumably **THE** bestseller of political science of the early 21st Century, by Samuel Huntington, from Simon and Schuster in New York, the publishers of the “*Clash*”, but we know from “Amazon.com” that his book is **#2,838** on their world best-seller list.

Source: our own calculations, based on the data of this article, using Microsoft EXCEL 2000 and 2003 software as well as SPSS XV; University Computing Center, Innsbruck University, Austria

Amazon's bestselling counting machine numbers Professor **Lourdes Sola** of Brazil, current President of the *International Political Science Association*⁵, best placed title "*Statecrafting Monetary Authority (Paperback)*" [by Lourdes Sola (Editor), Laurence Whitehead (Editor), Publisher: Centre for Brazilian Studies (September 30, 2000), Language: English] as Amazon.com Sales Rank: **#2,201,731** in Books. Professor **Max Kaase**, her predecessor, with an equally impeccable scholarly global reputation for his works, is no match to Samuel Huntington either with his sales figures. Entering his author name and switching on the Amazon bestseller counting machine⁶ we get after some detours as the best Amazon guess for his bestselling book in English, published after 1990 an Amazon.com Sales Rank: **#3,712,975** in Books for his title: "*Beliefs in Government (Beliefs in Government, Vol 5) (Paperback)*" [by Max Kaase (Editor), Kenneth Newton (Editor), Oxford University Press, USA (December 3, 1998)]. The current President of the *American Political Science Association*⁷, Professor **Dianne Pinderhughes**, ex officio as President of the most respected global political science association is only Amazon.com Sales Rank: **#2,348,309** in Books [Race and Ethnicity in Chicago Politics (Hardcover) by Dianne M. Pinderhughes (Author) Hardcover: 318 pages, Publisher: University of Illinois Press (March 1, 1987), Language: English]. APSA's President elect, Professor Peter Katzenstein's best selling Amazon title is **#168,032 in Books** [The Culture of National Security (Paperback); Publisher: Columbia University Press (April 15, 1996)]. Professor **Johan Galtung**, one of the global "superstars" of the political science and sociology profession, currently is ranked only **#201,141** in Books with his best-selling Amazon.Com title "*Transcend and Transform: An Introduction to Conflict Work (Paperback)*", which came out at Paradigm Publishers (June 2004).⁸

⁸ The author of this essay found the following interesting notice at <http://www.weberbooks.com/selling/2005/12/amazon-sales-rank-and-its-impact-on.html>. Since "forensic book sale econometrics" is not his trade, it suffices to mention here as a rule of thumb that for > 5 copies per year sold at Amazon, you have to have at least rank < 1 million; for > 50 copies your rank would have to be < 500.000, for > 500 copies the rank has to be < 50.000 and for > 5000 copies the rank must be < 1000. For further details see the classic M.I.T. study Brynjolfsson et al. (2003) and the analyses at <http://www.fonerbooks.com/surfing.htm>.

Europe in the global center-periphery system of knowledge production

In Tausch (2009) the conclusion was reached that one of the basic reasons for Europe's long-term failure to fulfill the well-known **Lisbon agenda**⁹ for Europe to catch up with the USA by 2010 to become the world's number one knowledge-based economy is the **crisis of its public University system**¹⁰. Evaluating the yearly University of Shanghai world university rankings, we concluded that there was a **noticeable shift in**

- ⁹ The **Lisbon Strategy**, or **Lisbon Agenda** or **Lisbon Process**, was adopted as a policy plan by the heads of European governments at the EU's European Council Meeting in Lisbon, March 2000 (hence the name) to make the EU the most dynamic and competitive knowledge-based economy in the world. See: http://www.europarl.europa.eu/summits/lis1_en.htm.

¹⁰ How information is being processed in the European University system? The author of this essay more and more discovers that library structures reflect some of the deepest political center-periphery structures in the world economy and the structure of information processing. How is information processed? And stored? The most basic thing, certainly, is through bibliographical research on a given subject. And already here the drama of the European periphery and semi-periphery starts. Scientists in say, Bulgaria, have no chance but to access the global markets and hope that their readers in France, Germany, Sweden will take notice of their work via publishing their books or articles in London, New York, Sydney, or Toronto ..., because German scientists (or for that matter, anyone else) else would only have the chance to click themselves through the catalogues of the many different research and academic libraries in Bulgaria, one by one ... See also the path-breaking analysis by (Deutsch, 1963). **Bulgaria, Estonia, Germany** (where there are still only the regional patchwork catalogues available), **Latvia, Lithuania, Romania, the Slovak Republic to this day do not have their own Union catalogue**. The list of Nobel Prize winners, 1901 – 2002, by national origin, closely follows the patterns of connectivity, established by Union catalogues: 1 United States: 270 ; 2 United Kingdom: 100 ; 3 **Germany**: 77 ; 4 France: 49 ; 5 Sweden: 30 ; 6 **Switzerland**: 22 ; 7 Netherlands: 15 ; 8 Italy: 14 ; 9 Denmark: 13 ; 10 Japan: 12 ; 11 Austria: 11 ; 12 Canada: 10 ; 13 Belgium: 9 ; 14 Norway: 8 ; 15 Spain: 6 ; 16 Australia: 6 ; 17 Ireland: 5 ; 18 Poland: 5 ; 19 Hungary: 3 ; 20 **Mexico**: 2 ; 21 Finland: 2 ; 22 **Slovakia**: 2 ; 23 Czech Republic: 2 ; 24 China: 2 ; 25 Greece: 2 ; 26 Portugal: 2 ; 27 **Vietnam**: 1 ; 28 **Burma**: 1 ; 29 Iceland: 1 ; 30 **Nigeria**: 1 ; 31 **Korea, South**: 1. Countries printed in bold, indented letters have regional patchwork catalogues, and countries printed in bold letters have no union catalogue. Iceland has only one national academic library. Nearly all scientific Nobel Prize Winners received their main scientific impulses from what Paul Kennedy (1993) once called the "intellectual powerhouse" of the major US Universities (or for that matter, Oxford and Cambridge). Forty-three current and former Harvard faculty members have been awarded Nobel Prizes. Twenty-seven Stanford faculty members have won the Nobel Prize since the university's founding, repeating our diagnosis from Table 1 and Graph 1.

world university capacity away from Europe towards the US, some English-speaking countries, like Australia, Canada, South Africa and New Zealand, and towards Israel.

Table 2: Global shifts in world university efficiency, 2003 - 2006

Country	Number of leading Universities 2003	Number of leading Universities 2006	increase/decrease
USA	161	167	6
Commonwealth	44	47	3
EEA/EFTA	11	12	1
Israel	6	7	1
others	7	8	1
Russia	2	2	0
EU candidates	2	0	-2
Asia	68	64	-4
EU-27	199	193	-6
	500	500	

Source: Tausch (2009), based on University of Shanghai world university ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm>

In Tausch (2009), it was re-iterated that one can only confirm the Lisbon strategy analysis, put forward by the former British Prime Minister Tony Blair:

*“Let's be absolutely clear about the situation in Europe today. Our university sector is not competing in the way it needs to with America. **You have got China and India developing their university sector in an extraordinary way, and yet if you look at the overall, not just the spending on our university sector, our tertiary education sector, but also where we are getting the value added in the connection between business and university, we don't have anything like the same possibilities in Europe that they have in other parts of the world.**” (PM speech to the EU Parliament in Strasbourg, 26 October 2005, available at: <http://www.number-10.gov.uk/output/Page8384.asp>)*

Our public University system, which on a global scale is above all the continental European University system, is in a **deep crisis**. Like any state socialist system, it produces waiting queues (*“the numerus clausus”*), it produces inefficiencies (see below), and it produces privileges and underprivileged strata; and, like under state socialism, the bureaucracies, which benefit from the system, argue that “social justice” is the main motivation for the existence of the system.

By **“University privatization”**, the present author above all suggests the creation of a market-driven **competitive environment** via a sufficient number of private Universities on the market as well as a **process of free selling and buying of the products of Universities** – above all the core product of a University system - courses for students. The present system in most European countries, the so-called **“Bologna-process”** of coordinating higher education notwithstanding, could be well characterized by Kornai’s description of a shortage: general shortages, frequent, intensive, chronic, etc. **Tuition fees** are a step in the right direction, and also the admission of private Universities to the market are a necessary step. A recent Wikipedia list¹¹ about **private Universities** around the world should not be considered as exhaustive:

- Australia
- Austria
- Bangladesh
- Chile
- Germany
- Hungary
- Hong Kong
- India
- Lebanon
- United Kingdom
- United States

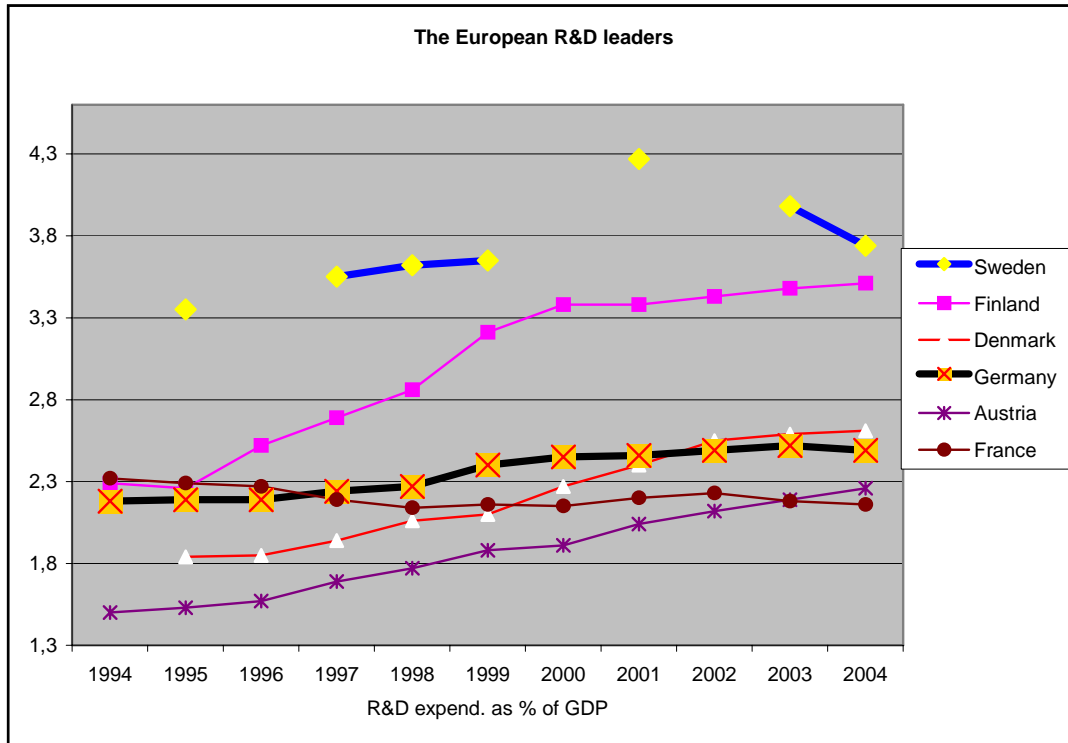

But also, there is another, more regional aspect in the European University system balance. The **dire predictions** are **that “destructive creation”** in the “new Europe” could end up in transforming the Central European region into a **prolonged workbench** of global capitalism, the process of Balassa/Samuelsion-inspired catching-up during the recent years notwithstanding (Tausch, 2009).

¹¹ http://en.wikipedia.org/wiki/Private_University

That **Central Eastern Europe** could become such a peripheral zone of a *“prolonged workbench”* is not just the product of the “wild imagination” of left-wing and Marxist economists, Trotskyites, populists and hard-core nationalists of all sorts. The analysis of the real threat of this to happen emerges also from a serious and detailed analysis of the re-distribution of world scientific power in the early 21st Century. This analysis will be the task of the present Chapter. To make a long story short – Eastern Europe did not visibly benefit, it seems, in its international University standing from EU-accession from 2004 onwards, and even worse, instead of increasing, it de-creased its numbers of world class, top 500 Universities during the period 2003 – 2006. Especially Poland and Slovenia were affected by this process, with the other East European countries, which before still had ranking Universities among the world’s leading top 500, the Czech Republic and Hungary, just kept their position, and the other 2004 accession countries not even entering the arena at all. In terms of science, enlargement then, it seems, up to now was a single large and big “flop”; and the East Central Europeans, it seems, would be well advised to increase their cooperation with the Anglo-American science compound (to which the Netherlands and Scandinavia also belongs) instead of keeping too near to the slowly sinking European University “Titanic”.

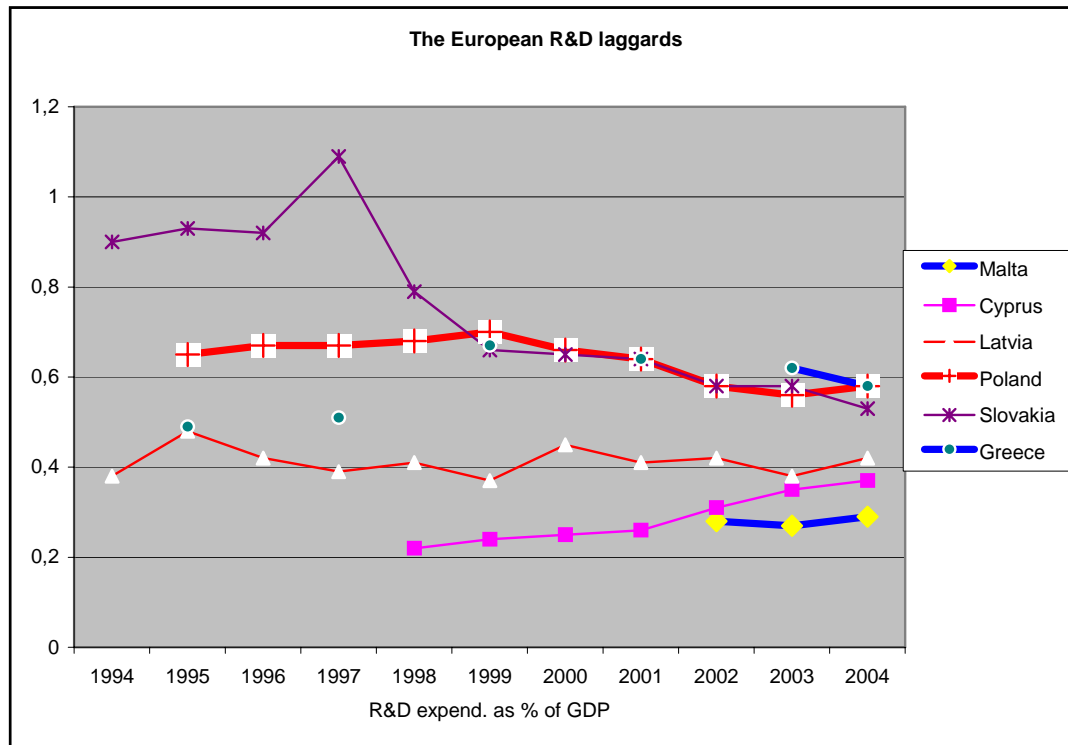

The overall R&D performance, European decision makers have re-iterated again and again, is unsatisfactory.

Graph 2: the European R&D leaders and laggards

Without a competitive research and development sector, Europe will never be able to fulfill the ambitious Lisbon targets, formulated in 2000, to be on equal footing with the US by 2010 in terms of the competitive knowledge-based economy.

One of the few decision makers of our time, who seemed to have grasped what is at stake, was British Prime Minister Tony Blair. In two of his important speeches, he said:

Former Prime Minister Tony Blair on the European University Crisis

*"Let's be absolutely clear about the situation in Europe today. Our university sector is not competing in the way it needs to with America. **You have got China and India developing their university sector in an extraordinary way, and yet if you look at the overall, not just the spending on our university sector, our tertiary education sector, but also where we are getting the value added in the connection between business and university, we don't have anything like the same possibilities in Europe that they have in other parts of the world.** Our proposal is that we task the Commission specifically on coming back and reporting to the European Council next year on the challenge facing European universities, how we compete with the United States, how we get more public-private partnership into sustaining them, and more graduate schools, linking business and the academic world across the European Union." (PM speech to the EU Parliament in Strasbourg, 26 October 2005, available at: <http://www.number-10.gov.uk/output/Page8384.asp>)*

"Just reflect. The Laeken Declaration which launched the Constitution was designed "to bring Europe closer to the people". Did it? The Lisbon agenda was launched in the year 2000 with the ambition of making

*Europe "the most competitive place to do business in the world by 2010". We are half way through that period. Has it succeeded? (...) What would a different policy agenda for Europe look like? (...) First, it would modernise our social model. Again some have suggested I want to abandon Europe's social model. But tell me: what type of social model is it that has 20m unemployed in Europe, productivity rates falling behind those of the USA; that is allowing more science graduates to be produced by India than by Europe; and that, on any relative index of a modern economy - skills, R&D, patents, IT, is going down not up. India will expand its biotechnology sector fivefold in the next five years. China has trebled its spending on R&D in the last five. (...) **Of the top 20 universities in the world today, only two are now in Europe.** (...) Investment in knowledge, in skills, in active labour market policies, in science parks and innovation, in higher education, in urban regeneration, in help for small businesses. This is modern social policy, not regulation and job protection that may save some jobs for a time at the expense of many jobs in the future. (...) And since this is a day for demolishing caricatures, let me demolish one other: the idea that Britain is in the grip of some extreme Anglo-Saxon market philosophy that tramples on the poor and disadvantaged. The present British Government has introduced the new deal for the unemployed, the largest jobs*

programme in Europe that has seen long-term youth unemployment virtually abolished. It has increased investment in our public services more than any other European country in the past five years. We needed to, it is true, but we did it. We have introduced Britain's first minimum wage. We have regenerated our cities. We have lifted almost one million children out of poverty and two million pensioners out of

acute hardship and are embarked on the most radical expansion of childcare, maternity and paternity rights in our country's history. It is just that we have done it on the basis of and not at the expense of a strong economy. (Tony Blair's speech to the European Parliament on 23 June 2005, available at: http://news.bbc.co.uk/2/hi/uk_news/politics/4122288.stm)

What are the Lisbon strategy realities? Has there been really a closing of the gap with America and other world economic competitors? Since Eurostat does not publish any statistics on international University rankings, we have to work here with the well-established data series published by the University of Shanghai in China.

The "Lisbon" performance could not be more dismal:

Table 3: The World's leading Universities - statistics by Region (2006)

Region	Top 20	Top 100	Top 200	Top 300	Top 400	Top 500
North and Latin America	17	58	98	137	164	196
Europe	2	34	78	122	171	207
Asia/Pac	1	9	24	40	63	92
Africa				1	2	5
Total	20	101	200	300	400	500

Source: University of Shanghai world university ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm>

The US share among the leading twenty and among the leading 100 is really without a parallel:

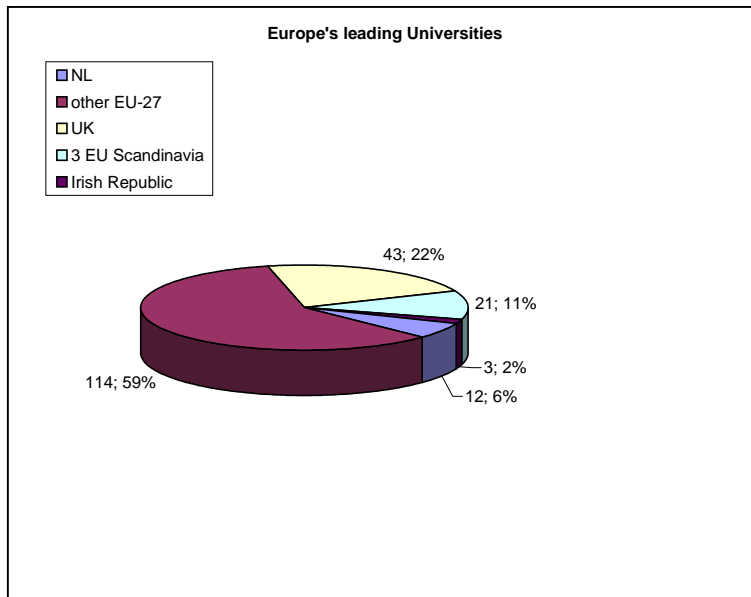

Table 4: Europe's share in the global University contest

	Europe's share in the world's top Universities	USA share	Asia/Pacific	others
Top 20	10,00	85,00	5,00	0,00
Top 100	33,66	53,47	8,91	3,96
Top 200	39,00	43,50	12,00	5,50
Top 300	40,67	39,33	13,33	6,67
Top 400	42,75	35,00	15,75	6,50
Top 500	41,40	33,40	18,40	6,80

Source: calculated from University of Shanghai World University ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm>

These results become even more dismal, when the special role of the *"anglo-irish-dutch-scandinavian"* "scientific enclaves" in the EU is taken into account. Europe's share in the world's top 500 universities is a considerable **207** Universities or **41.4%** of the total, but of these 207 Universities, a larger number – **twelve** – are located in **Norway** and **Switzerland**, while **193** are located in the EU-27. **Only 59%** of the leading EU-Universities – **114** – are located outside the *"anglo-irish-dutch-scandinavian"* "compound", while the anglo-irish-dutch-scandinavian "gang of the North" makes up 41% of the EU-27's excellent research and teaching potential!

Graph 4: Europe's top-level University, increasingly a UK, and Irish, Dutch and Scandinavian "affair"

Source: calculated from University of Shanghai World University ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm>

In addition, it is particularly sad to note that the new EU-member countries could not improve or even lost the small position, which they still had after the transformation during the first years as full members of the Union.

Table 5: Europe's declining share in the world's leading Universities, 2003 – 2006

Country	Number of leading Universities 2003	Number of leading Universities 2006	increase/decrease
USA	161	167	6
Australia	13	16	3
Austria	4	7	3
New Zealand	3	5	2
Egypt	0	1	1
Israel	6	7	1
Italy	22	23	1
Norway	3	4	1
South Korea	8	9	1
Sweden	10	11	1
UK	42	43	1
Argentina	1	1	0
Belgium	7	7	0
Brazil	4	4	0
Chile	1	1	0
China	14	14	0
China-tw	5	5	0
Czech R.	1	1	0
Greece	2	2	0
Hungary	2	2	0
Ireland	3	3	0
Mexico	1	1	0
Netherland	12	12	0
Russia	2	2	0
Singapore	2	2	0
South Africa	4	4	0
Switzerland	8	8	0
Denmark	6	5	-1
Finland	6	5	-1
France	22	21	-1
India	3	2	-1
Poland	3	2	-1
Portugal	1	0	-1
Slovenia	1	0	-1
Canada	24	22	-2
Germany	42	40	-2

Turkey	2	0	-2
Japan	36	32	-4
Spain	13	9	-4
	500	500	

Source: calculated from University of Shanghai World University ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm>

As our table above showed, the following EU member or candidate countries witnessed a real deterioration in their number of top 500 world universities:

- Denmark
- Finland
- France
- Germany
- Poland
- Portugal
- Slovenia
- Spain
- Turkey

A world-level comparison quickly reveals that the successful US, Commonwealth, EEA/EFTA and Israeli models of higher education share many common features, basically characterized by considerable tuition fees, as well as a considerable state and private sector involvement in the process, combined with a competitive climate in the University sector.

Table 6: The fallouts from a wrong University policy?

a) The absolute numbers

Country	Number of leading Universities 2003	Number of leading Universities 2006	increase/decrease
USA	161	167	6
Commonwealth	44	47	3
EEA/EFTA	11	12	1
Israel	6	7	1
others	7	8	1
Russia	2	2	0
EU candidates	2	0	-2
Asia	68	64	-4
EU-27	199	193	-6
	500	500	

Source: calculated from University of Shanghai world university ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm> "Commonwealth" is defined here as Australia, Canada, New Zealand, South Africa

b) the relative numbers

Country	% of number of leading Universities 2003	% of number of leading Universities 2006	increase/decrease
EU-27	39,8	38,6	-1,2
USA	32,2	33,4	1,2
Asia	13,6	12,8	-0,8
Commonwealth	8,8	9,4	0,6
EEA/EFTA	2,2	2,4	0,2
others	1,4	1,6	0,2
Israel	1,2	1,4	0,2
Russia	0,4	0,4	0

<i>EU candidates</i>	<i>0,4</i>	<i>0</i>	<i>-0,4</i>
	500	500	

Source: calculated from University of Shanghai world university ranking, available at: <http://ed.sjtu.edu.cn/ranking.htm> "Commonwealth" is defined here as Australia, Canada, New Zealand, South Africa

Without a thorough University reform, Europe will dismally fail the Lisbon targets.

On the methodology of the present paper

A large section of the evidence used in this article is based on the OCLC Archive, the world's largest collection of global library holdings. Founded in 1967, the OCLC Online Computer Library Center is a nonprofit, membership, computer library service and research organization dedicated to the public purposes of furthering access to the world's information and reducing the rate of rise of library costs. More than 69,000 libraries in 112 countries and territories around the world use OCLC services to locate, acquire, catalog, lend and preserve library materials. To date, the OCLC is the largest one-click online catalogue of library holdings in the world (<http://www.oclc.org/about/default.htm>).

The company presents the following impressive statistics:

Worldcat facts and statistics

- Number of libraries represented worldwide:
60,000
- Number of bibliographic records:
107,827,852
- How often a record is added:
Every ten seconds
- Number of holdings:
1,289,190,590
- Number of countries represented:
112
- Number of languages and dialects represented:
More than 470

- How often a request is filled through [Worldcat Resource Sharing](#):
Every four seconds
- How often Worldcat is searched via FirstSearch:
Every second

This article is also based on **full text, full content, combined single click search** resources to weigh the impact of scholarly literature.

- **“Google Book search”** As from December 2007, the Google Book Search interface is available in over 35 languages, from Japanese to Czech to Finnish. Over 10,000 publishers and authors from 100+ countries are participating in the Book Search Partner Program. The Library Project expands to 28 partners, including seven international library partners: Oxford University (UK), University of Complutense of Madrid (Spain), the National Library of Catalonia (Spain), University Library of Lausanne (Switzerland), Ghent University (Belgium) and Keio University (Japan) in addition to major Universities in the USA, like Harvard etc.
- **“Google scholar”** is a unique program, now integrating the majority of scientific archives in the world, like IDEAS/REPEC, University of Connecticut, which comprises around 80% of the global economic profession, the SSRN (Social Science Research network, New York) and many other archives.
- **“Questia”** – Questia is the World's Largest Online Library of Books with full content search. Questia is the first online library that provides access to the world's largest online collection of books and journal articles in the humanities and social sciences, plus magazine and newspaper articles.
- **“DIALOG Open access”** is a free open access platform to a large section of the global press. In our preliminary analysis, we have chosen Business News Newspapers - Major U.S. Sources Atlanta Journal/Constitution Boston Globe, Christian Science Monitor New York Times (90 Days), USA Today Wall Street Journal (summaries)
- **“Dialog magazines”**: Complete text of hundreds of magazines and journals from leading publishers in sources such as Business Dateline, Business & Industry®, CMP Computer Fulltext, Computer

News Fulltext, General Science Abstracts/Fulltext, Harvard Business Review, Gale Group Computer Database, Gale Group Health & Wellness, Gale Group Magazine Database, Gale Group Trade & Industry Database, The McGraw-Hill Companies Publications Online, and Periodical Abstracts PlusText™.

- **"EBSCO Scientific abstracts"**, is combining the most important scholarly journals in the social sciences, documented in Academic Search Premier, Academic Search Elite, Business Source Elite, EconLit, Psychology and Behavioral Sciences Collection, Regional Business News, SocINDEX.
- **"Cambridge Scientific Abstracts"** (CSA) provides access to more than 100 databases published by CSA and its publishing partners¹².

The companies chosen represent a good, but certainly subjective sample of the major publishers in the field, and comprise both European as well as American companies. Since company sales figures are a closely guarded secret, our comparisons and estimates of the market effectiveness of the 21 companies under scrutiny are based exclusively on OCLC Library holding figures instead of on direct or indirect estimates of sales figures on the different markets around the world¹³. Our thus

¹² The full list of components of the database is available from:

http://www.csa.com/e_products/databases-collections.php

¹³ My own very crude and first estimates, based on OCLC figures and global sales figures, for my own books and articles in English, published since 1992, published at three of the 21 major publishing companies listed in the present study, yield the following statistically highly significant estimate of sales figures, based on **global OCLC circulation figures**: global sales figures = 2,2 x OCLC global library circulation figures + 21; R² = 0,9377. That means that the average academic publisher, by and large, most probably will sell around 20 copies to "institutional buyers" like international government bureaucracies, internet book stores, which buy certain stocks in advance etc, and that you have to multiply OCLC figures by a factor of around **2.2** to arrive at the "true" global sales figures of an average European English language social policy academic product. For those readers, who only have the open access version of "world cat", the calculation of the trade-off between library presence figures and sales figures is more complicated, insofar as they have to do the analysis market-wise (USA, Australia, Canada, United Kingdom etc.) to arrive at results. The author's own personal estimates for global sales figures from the **United States Library presence** is: y (global sales) = 2,2544x + 55,305 R² = 0,9318; i.e. an average academic book producer is supposed to sell around 55 books on the global markets and will multiply US library presence figures again by a factor of **2.2** to arrive at global sales results. The equation determines again 93% of total variance of global sales. There are various estimates of the trade-off between Amazon sales ranks and global book sales. Only Amazon sales ranks of < 1.000.000 would imply

admittedly second-best solution in view of lacking global company sales figures was to determine how large a percentage of the production (books and journals) of the 21 companies were well-received by the global library system, about which increasingly data are available via the OCLC World Catalogue system. A future, more sophisticated analysis could start to analyze the bestselling figures of major Internet book traders and determine, how big a percentage of total production is, say in the top 1000, top 10.000 and top 100.000 each per company and per title of output analyzed.

Since our investigation is only a preliminary analysis, we refrain from calculating such figures.

We think that our selection of the 21 companies, although debatable, is somewhat fair, and especially contains those publishers, which time and again provided opportunities for European and "other semi-periphery" researchers to publish internationally:

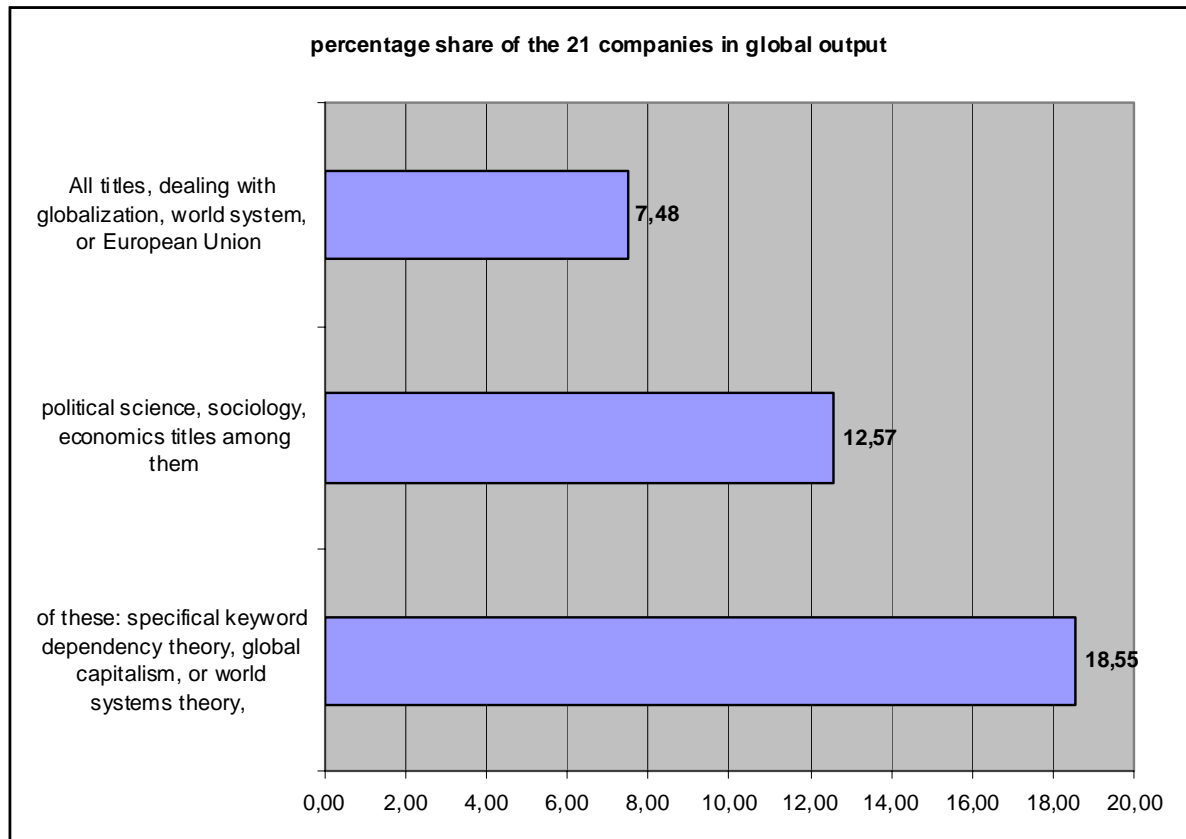

Table 7: the share of the 21 chosen companies in global book production

	Global English language book titles	21 companies	percentage share of the 21 companies in global output
All titles, dealing with globalization, world system, or European Union	423997	31726	7,48
political science, sociology, economics titles among them	18490	2324	12,57
of these: specific keyword dependency theory, or world systems theory	3817	708	18,55

global sales in excess of around 700 per book and year. As the Appendix Graph 1 shows, there is also a very close tradeoff between US library presence of a book and Amazon sales ranks.

Source: our own calculations based on the data of this article, using Microsoft EXCEL 2000/2003 and SPSS XV (Innsbruck University) software, Austria. Reference data bases: Courtesy: Fachhochschulstudiengänge Burgenland, University of Applied Sciences, Campus 1, A-7000 Eisenstadt, www.fh-burgenland.at Study Library for the opportunity to use the OCLC Worldcat documentation system, and courtesy to Innsbruck and Vienna University for the opportunity to use their reference systems online

Graph 5: the share of the 21 chosen companies in global book production

Source: our own calculations based on the data of this article, using Microsoft EXCEL 2000/2003 and SPSS XV (Innsbruck University) software, Austria. Reference data bases: Courtesy: Fachhochschulstudiengänge Burgenland, University of Applied Sciences, Campus 1, A-7000 Eisenstadt, www.fh-burgenland.at Study Library for the opportunity to use the OCLC Worldcat documentation system, and courtesy to Innsbruck and Vienna University for the opportunity to use their reference systems online

In terms of world systems research, the impact of these companies is even bigger. We look at the debates on the founders of “dependency” and “world systems theory”:

- Samir Amin
- Giovanni Arrighi
- Fernando Henrique Cardoso
- Ch. Chase-Dunn
- Andre Gunder Frank
- Raul Prebisch
- Osvaldo Sunkel
- Immanuel Wallerstein

The exact “Google book search” profile is reprinted in Appendix Table 4¹⁴. This search profile is only a second best solution. Our measure is admittedly a very crude counting procedure, but unfortunately as yet, **“Google book search”** does not allow for a more exact counting procedure to quantitatively evaluate global book content. But we can estimate somehow that a good proportion of the global debates about the eight authors in question take place in the context of these publishers:

¹⁴ It is important, especially for younger authors, to re-iterate that social science publishing is not a big thing; or as the French saying goes: *“Ce n’est pas grand chose”*. Look at the current Amazon.com bestselling figures for the eight great figures of world systems and dependency theory:

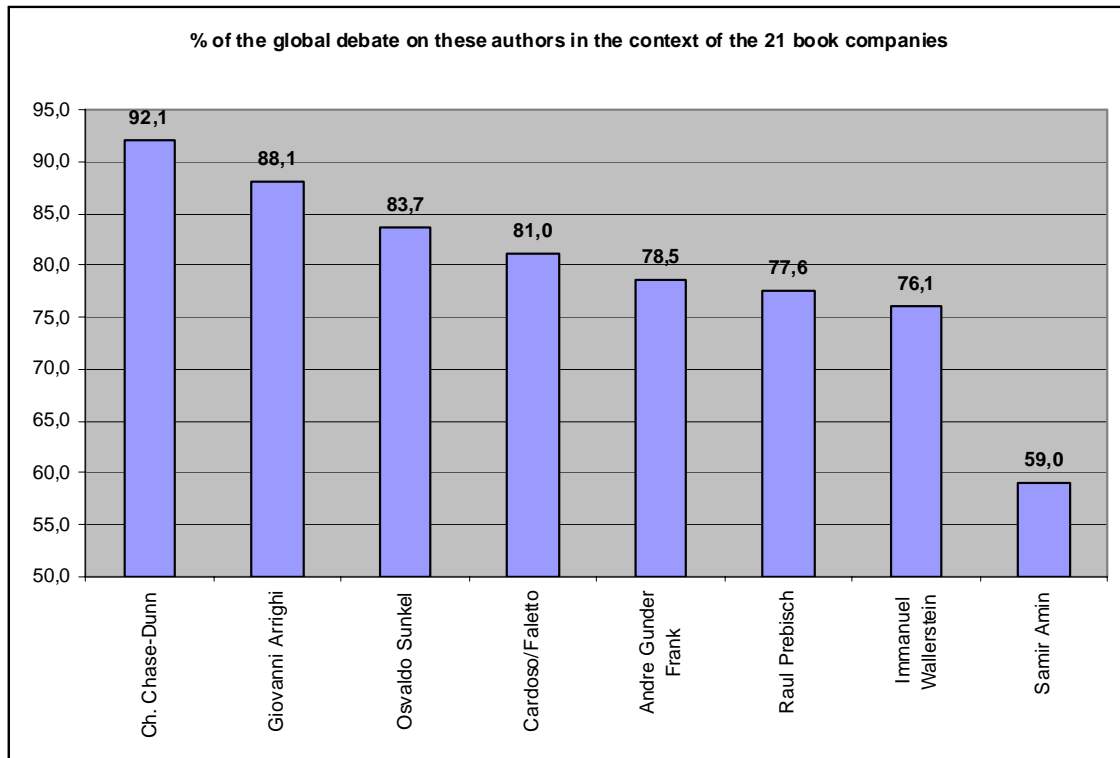

- Samir Amin, “The Liberal Virus: Permanent War and the Americanization of the World”, #519,433
- Giovanni Arrighi, “Adam Smith in Beijing: Lineages of the Twenty-First Century (Hardcover)”, #166,717
- Christopher Chase-Dunn, “Global Formation: Structures of the World Economy”, #901,673
- Fernando Henrique Cardoso, “The Accidental President of Brazil: A Memoir”, #282,235
- Andre Gunder Frank, “Reorient”, #452,580
- Raul Prebisch, “Change and development--Latin America's great task;: Report submitted to the Inter-American Development Bank (Praeger special studies in international economics and development)” #3,413,901
- Osvaldo Sunkel, “Globalism and the New Regionalism (International Political Economy)”, #1,174,862
- Immanuel Wallerstein, “World-Systems Analysis: An Introduction (A John Hope Franklin Center Book)”, #50,022

Table 8: The 21 companies and world systems research

	% of the global debate on these authors took place in the context of the 21 book companies	context 21 companies – number of occurrences in “Google book search” on these authors	total “Google book search” returns on these authors
Ch. Chase-Dunn	92,1	755	820
Giovanni Arrighi	88,1	695	789
Osvaldo Sunkel	83,7	663	792
Cardoso/Faletto	81,0	709	875
Andre Gunder Frank	78,5	798	1016
Raul Prebisch	77,6	685	883
Immanuel Wallerstein	76,1	939	1234
Samir Amin	59,0	821	1391

Thus, we work with the following nineteen variables:

Shorthand	Full variable label
Total Japanese library holdings (NACSIS)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Japan (NACSIS)
France (Cat. Col. de France)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in France (Cat. Col. de France)
COPAC UK + IRE	Books and serials produced by the company present in the entire library system as a % of total titles: academic and research library holdings in the UK + Ireland (COPAC UK + IRE)
Germany (GBV)	Books and serials produced by the company present in the entire library system as a % of total titles in Germany (GBV; GBV Common Library Network of the German States Bremen, Hamburg, Mecklenburg-Vorpommern, Niedersachsen, Sachsen-Anhalt, Schleswig-Holstein, Thüringen and the Foundation of Prussian Cultural Heritage)
Spain (REBIUN)	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Spain (REBIUN)
European Commission Library Brussels	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the European Commission Library (Catalogue ECLAS)
European University Institute, Firenze	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the European University Institute, Firenze
Libraries Australia	Books and serials produced by the company present in the entire library system as a % of total titles: total academic and research library holdings in Australia ("Libraries Australia")
Dag Hammarskjöld Library, UN	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the Dag Hammarskjöld Library, UN
ILO LABORDOC	Books and serials produced by the company present in the entire library system as a % of total titles: total library holdings at the International Labor Organization (ILO LABORDOC)
Ebsco abstracts	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in Ebsco Host abstracts
Cambridge CSA	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in Cambridge CSA (Cambridge Scientific Abstracts)
DIALOG magazines	Books and serials produced by the company mentioned in the entire document archive as a % of total titles at "DIALOG/Thomson magazines"

Google book search	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Google book search"
Google scholar	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Google scholar"
Questia online	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "Questia online"
DIALOG Major US papers	Books and serials produced by the company mentioned in the entire document archive as a % of total titles in "DIALOG/Thomson Major US papers"
Share produced books at >50 global libraries	Books produced by the company present at more than 50 libraries in the entire world library system as a % of total book titles [produced books at >50 global libraries]
Share produced serials at >50 global libraries	Serials produced by the company present at more than 50 libraries in the entire world library system as a % of total series titles [produced serials at >50 global libraries]

The methodology of parametric and non-parametric index construction closely follows the works of the Swedish economist Almas Heshmati. It suffices here to refer to the list of literature, fully describing the established methodology [Andersen T.M. and T.T. Herbertsson (2003), Atkinson A.B., B. Cantillon, E. Marlier and B. Nolan (2002), Atkinson A.B., E. Marlier and B. Nolan (2004), Bhandari A. K. and A. Heshmati (2007), Bollen, K. and Lennox, R. (1991), Bradshaw, J., Hoelscher, P. and Richardson, D. (2007), Brooks, A.M. and Hanafin, S. (2005), Farrell M.J. (1957), Heshmati ,A. and J-E. Oh (2006), Heshmati A. (2003), Heshmati A. (2006), Heshmati A. (2006), Heshmati A. (2007), Heshmati A. and A. Tausch (2007), Heshmati A. and J-E. Oh (2006), Heshmati, A. (2006), Heshmati, A. and A. Tausch (2007), Hotelling H. (1933), Katz S. (2006), Kearney, A.T., Inc., The Carnegie Endowment for International Peace (2003), Lippman, L. (2004), Lockwood B. and M. Redoano (2005), Mirchandani D. (1999), Pearson K. (1901), Ravallion M. (2005), Sen A. (1987), Sen A. (1992), Sen, A. (1985), Sen, A. (1999), Sen, A. (2000), Sturgis, P. (2004), Tausch A. (2006), Tausch A. (2007), Tausch A. (2009), Tausch A. and Ghymers Chr. (2006), Tausch A., A. Heshmati and C.S.J. Bajalan (2007), Tausch A., A. Heshmati and J-E. Oh (2007)].

The efficiency of knowledge dissemination of global book publishing companies, heavily involved in the debates about globalization and European Union issues

Productions, which are available at less than 50 of the global libraries, are considered in the operational terms of this article as a *“market flop”*. In terms of their ability to place books on the markets of now 100+ countries well in comparison to their total production, American companies hold an unparalleled power. The relative market leaders, which get a large percentage of their total book output to more than 50 global libraries each, only two are European:

- Lexington (US)
- St. Martin's Press (US)
- Rowman/Littlefield (US)
- Monthly Review Press (US)
- Praeger Publishers (US)
- Cornell UP (US)
- Ashgate (UK)
- Transaction Publishers (US)
- Edward Elgar (UK)
- Nova Science Publishers (US)

while among the producers with a larger share of titles, which don't make it to 50 or more than 50 libraries, only two are American:

- Campus (Frankfurt/Ann Arbor) (GER)
- IOS Press (NL)
- Springer (GER)
- Amsterdam University Press (NL)
- Blackwell (UK)
- Houghton/Mifflin (US)
- Routledge (UK)
- Oxford University Press (UK)
- Palgrave Macmillan (UK)
- Sage Publications (US)

Table 9: How well publishers were doing in getting a book being sold to more than 50 academic libraries around the world per total production?

	Total number of titles	Total number of serials	Total number of titles, present at more than 50 academic OCLC libraries around the world	Total number of serials, present at more than 50 academic OCLC libraries around the world	Library market penetration factor "books"	Library market penetration factor "serials"	Rank books	Rank serials

The fifteen companies, which had the best combined record of avoiding books and serials flop rates, were:

- St. Martin's Press
- Lexington
- Transaction Publishers
- Monthly Review Press
- Praeger Publishers
- Rowman/Littlefield
- Cornell UP
- Sage Publications
- Cambridge UP
- Houghton/Mifflin
- Ashgate
- Nova Science Publishers
- Blackwell
- Oxford University Press
- Edward Elgar

Table 10: Market flop rates by international comparison

	Library market penetration factor, books	Library market penetration factor, serials	Market flop rate per total output, books in %	Market flop rate per total output, journals in %	average market flop rate, books and journals, combined
St. Martin's Press	63,95	32,48	36,05	67,52	51,8

Campus 1, A-7000 Eisenstadt, www.fh-burgenland.at Study Library for the opportunity to use the OCLC Worldcat documentation system, and courtesy to Innsbruck and Vienna University for the opportunity to use their reference systems online. In addition, the other sources comprised google.com "advanced book search", "openaccess.dialog.com/business", "questia.com" and "scholar.google.com"¹⁵

The quest for scholarly quality

Undoubtedly, scholars will be interested not only in sales, **but also in the impact of their work in the course of the further debate on the subject.** So in addition to the parameters, already mentioned above, we introduce the percentage chance of a scientific work to be referred to in the peer reviewed journal literature around the globe. Many commercially available abstract and journal literature services exist today, but not all of them are full-text services.

Our choice here was to work with EBSCO Host and CSA Cambridge Scientific Abstracts full text services. In addition to the indicators, mentioned above, we introduce the ***DIALOG Magazine*** literature archive as an additional quality parameter. Why this? Because the public debate is not only a question of international **scholarly** journals and the daily press, but also of many other media outlets, especially the **weeklies** and **monthlies**, which specialize in **background content**. Ever heard about the "*Economist*", "*Foreign Affairs*" or "*Foreign Policy*"? Well of course. So this is what we have in mind here.

The quest for global publicity - a VERY preliminary analysis

Scholars and publishing companies alike could now argue that these indicators are not yet everything. Indeed, they are not.

First take the quest for media-coverage and publicity. The ***DIALOG-magazines*** are global in design, but US-centric in practice and the ***DIALOG newspapers*** chosen are the only top US dailies.

¹⁵ Sources: Calculated from: http://books.google.com/advanced_book_search
<http://openaccess.dialog.com/business/>
<http://www.questia.com/SM.qst?act=adv>
<http://scholar.google.com/schhp?hl=en&tab=ws>

At a later stage of this research effort, perhaps a one-click all archives of the world press with a sufficiently powerful counting machine should be consulted. Several freely searchable, but of course not downloadable products come to my mind, such as **GBI content**¹⁶ or others. The research could be also expanded to include **DIALOG products**, like:

- Newspapers [U.S.; Asia-Pacific; Canada; U.K.]
- DIALOG NewsRoom
- Newswires [Sources Africa News Agence France-Presse English Wire ; AP News Bridge World Markets News EIU ViewsWire ; Federal News Service ITAR/TASS News ; Japan Economic Newswire Plus ; Knight-Ridder/Tribune Business News ; South American Business Information (summaries); Xinhua News]
- etc.

into account. All are freely searchable for the relevant company occurrences in the full text of the news items.¹⁷

The quest for **publicity** by a scholar is understandable and also legitimate. Seen from the perspective of governments and funding bodies, such publicity is highly welcome. Which book publishing company assures the researcher and the funding bodies of the research operation the most thorough **international** publicity?

To quantitatively compare publisher international impact, we analyzed the number of specific references for each company in the archives of the Swiss designed "**Lexis Nexis University**" "**International Press**", which is truly global in design and content, and multilingual and multicultural in character, from 1980 onwards. Such a comparative analysis is only possible, when we restrict the length of the observation period to a single randomly occurring day, i.e. July 15, 2008, because some companies achieved more than 3000 press reports during 48 hours, and the machine suspended its counting procedure at more than 3000 reports. This is a very lamentable state of affairs.

- **LexisNexis Academic NEWS** supplies a wide variety of authoritative sources, including: Full-text of more than 350 newspapers from the U.S. and around the world, many same day of

¹⁶

http://www.genios.de/r_presse/webcgi?START=016&SEITE=pressek_top.ein&DBN=&WID=70052-1910748-61103_1

¹⁷ <http://openaccess.dialog.com/business/>

publication, plus the most extensive archives available anywhere of Financial Times (dating back to 1982), The New York Times (dating back to 1980) and The Washington Post (dating back to 1977). More than 300 magazines and journals and over 600 newsletters, including: American Journalism Review, Business Week, The Economist, Library Journal, New Republic, Newsweek, and Variety. Hard-to-find broadcast transcripts from the major television and radio networks, including ABC, CBS, CNN, FOX, NBC and NPR, as well as political transcripts covering Congressional committee hearings, press briefings from the State, Justice, and Defense departments, and presidential news conferences. Campus news, including the Chronicle of Higher Education and nearly 300 individual college/university papers. Wire services, updated several times a day, including respected names such as the Associated Press, Business Wire and PR Newswire. Polls and surveys from the Roper Center for Public Opinion Research. Non-English language news sources available in Spanish, French, German, Italian and Dutch, including both newspapers and magazines

So our very provisional results are:

Table 11: International Press impact, per diem rates, estimated on July 15, 2008, 20:00 hours GMT

	today	1 month	n books, 2000-2009 (non-fiction)	informed guess: yearly news items per total production	N number of daily news, July 15, 2008*365 (rough estimate for the global yearly news flow on the subject of the company)

Because of the missing values for the very large companies, this variable could not be used anymore for the final "big" calculation of overall company performance.

Geographical and institutional diversity

For a scholar it would be a debacle if his or her chosen publishing company would not be able to sell the book or the journal in question also in foreign countries, and not just only in say, the US or Europe, for that matter.

A researcher will not have only the desire for a global debate, he or she will also strive for a maximum **regional diversity** in the distribution of

the products of his or her work. Which publishing companies are better and which companies are worse in **penetrating** far-away markets (from the perspective of a European researcher) in, say, Japan? Or in the developing countries?

Good, as the OCLC world catalogue is, it won't escape the eye of the experienced researcher and librarian that as yet the system does not properly integrate the available **country-wide Union catalogues**¹⁸ in major academic book markets, like

Algeria¹⁹,

¹⁸ <http://linksammlungen.zlb.de/1.2.1.1.0.html>. For more Union catalogues, not listed in that link, see appendix Table 5. An extremely interesting research paper is to be found at:

http://www.oclc.org/content/1400/pdf/NUKAT_EmergingNewRolesofUnionCatalogues.pdf, written by Ms. Jenifer Gatenby, Librarian, Leiden University.

¹⁹ To my knowledge, this is the only globally and freely available Union catalogue of an Arab, or for that matter, Muslim country in the world. The address is <http://www.ribu-dz.org/>, the interface is in French language. The system tells us that there is a single copy of the French translation of Samuelson's "Economics" [L'Economique], Auteur(s) Samuelson, Paul A., Gaël Fain, trad., Paris : Armand Colin, 1982, available at the Tizi Ouzou - Université Mouloud Mammeri (UMMTO). Preliminary tests show that students and faculty members in this Arab country are especially acquainted with the works of Samir Amin. And, voilà – Andre Gunder Frank, superstar:

1. *Capitalisme et sous-développement en Amérique Latine* Gunder Frank, André Livre 1972
2. *L'Accumulation dépendante, suivi de sociétés précapitalistes et capitalisme* Gunder Frank, André Livre 1978
3. *L'accumulation mondiale : 1500-1800* Gunder Frank, André Livre 1977
4. *Le Développement du sous-développement : l'Amérique Latine* Gunder Frank, André Livre 1972
5. *Réflexions sur la nouvelle crise économique mondiale* Gunder Frank, André Livre 1978

Not even Huntington made it to the libraries in Algeria, but AGF did! The RIBU-system integrates the following research libraries:

- *Université des Sciences et Technologies Houari Boumedienne USTHB*
- *Université Saad Dahleb de Blida*
- *Université Ben Youcef Ben Khedda d'Alger*
- *Université Abderrahmane Mira de Béjaïa*
- *Université Mouloud Mammeri de Tizi Ouzou UMMTO*
- *Université Mohamed Seddik Benyahia de Jijel*
- *Université M'hamed BOUGARA Boumerdès UMBB*
- *Centre de recherche sur l'information scientifique et technique Cerist*
- *École Nationale Polytechnique ENP*

Argentina,²⁰

-
- *École Nationale d'Administration ENA*

²⁰ <http://www.sisbi.uba.ar/consultas/ccnul.html>. While Argentina and Chile already possess a Union catalogue, the other Latin American major Universities have to be accessed library per library. Catalogue addresses are available at: <http://digilink.digibib.net/wk/links.pl?View=search&all=cat%C3%A1logo&submit=%5BAb schicken%5D>

²¹ I made the discovery of the existence of the **CALIS China Union catalogue** via <http://www.lib.sjtu.edu.cn/view.do?id=1382>

²² The **LINNEA-VERKON Kirjastot System**; but it seems to be available only to research centers in the country, and not to the outside world. A useful address connection is also: <http://www2.mpiz-koeln.mpg.de/~hoffmann/libraries.international.html> as well as the "LIBDEX" library internet address collection, which unfortunately contains certain numbers of outdated internet addresses, especially from the developing countries <http://www.libdex.com/>

Thailand

All of the above listed countries now offer catalogue access to their entire academic library holdings **for free**. Other available Union catalogues, like in **New Zealand** (the *"TE PUNA"* catalogue) and the **Netherlands** (the *"PICA"* system), as well as the **Brazilian** Union catalogue system, called *"REDE PERGAMUM"*²³, appear to be available only commercially to the non-national, non-campus outside world, but the Netherlands and New Zealand catalogue are already well integrated into the OCLC system. The **Israeli** *"ULI"*, the complete library gateway to this unique small scholarly and innovative country with its particularly globalized scientific culture, does not permit for a publisher-oriented search profile, and is as yet not integrated into the OCLC system.

The interfaces of some, but not all of these Union catalogues are searchable also for the publisher name. Although we originally intended to use a maximum possible number of data here, especially from the *"Karlsruhe Catalogue"* and the *"Bielefeld meta-catalogue"*, which are both of them excellent platforms, and something of a proto-European Union catalogue of books, we had to give up our comparisons mid-way, because of data processing overload at the servers, persistent missing values for some countries, always changing with the entry of the search profile, and especially for queries about the big publishing companies with tens of thousands of published titles in the data sets. Overall comparisons of the global numbers of books available, from Portugal in the South-West of Europe to Helsinki, Finland in the far Northeast, and from Limerick in the far Northwest to Athens in the Southeast, for each publishing company would yield unreliable estimates, because, say, in one search for "Amsterdam University Press" the data for Portugal and the West Switzerland network go missing because of "time out", while the search for Ashgate (the next in the alphabet) integrates the data for West Switzerland ...

North American and Pacific readers of this article, used to the impeccable services of the OCLC World Catalogue, will ask themselves at this moment at the latest, whether this is a reflection of the general malaise of the

²³ https://wwws.pucpr.br/sistemas_s/pergamum/pergamum/php/home.php The site only contains informations about the system. When you want to click the entry platform <https://wwws.pucpr.br/>, the system tells you that you are not allowed to enter that site. Most probably, it's only available to Brazilian research institutions

United Europe – yes it is, very much! After 50 years of European integration, not even Germany itself has a nationwide, German, let alone European Union library catalogue, because science policy is being administered in Germany at the regional, and not at the federal level. So, how do Europeans even know what other Europeans published or documented?

The combined index

Our search also tries to establish an answer to the simple and very legitimate question – is the product of research being read not only by the academics, but by the bureaucrats and their think tanks?

The author of this paper is not a librarian, but a social scientist in the first place. It should be added nevertheless that the library catalogues, documented in Appendix, provide material for further research. Some East European Union catalogues – like the Hungarian and Czech catalogue – are already in operation, but for reasons of simplicity of the research design have been left out for the moment. The Hungarian Union catalogue, at least accessed from Vienna, Austria, is woefully slow and could not be used for the processing of such immense quantities of data. Future research on the subject should and indeed must integrate the freely searchable, full content one click article data base of the scientific journals of the new Eastern Europe, all too often neglected by international scholarship. The database's name is CEEOL, and it is to be accessed freely²⁴.

But now it is time to arrive at something like a final count. For reasons of simplicity, but also for reasons of the smaller number of foreign, English language book holdings in several catalogue systems of even **major, rich, western democracies**, we have chosen to run our comparison with the Union catalogues of

- **Australia**
- **France**
- **Germany – GBV**
- **Japan**

²⁴ <http://www.ceeol.com/>. The data base yields 713 quotations with articles which make a direct reference, for example, to the term "Cornell University Press", etc.

- **Irish Republic (COPAC)**
- **Spain**
- **United Kingdom (COPAC)**

These countries might symbolize the different **scientific cultures of major OECD book markets outside North America.**

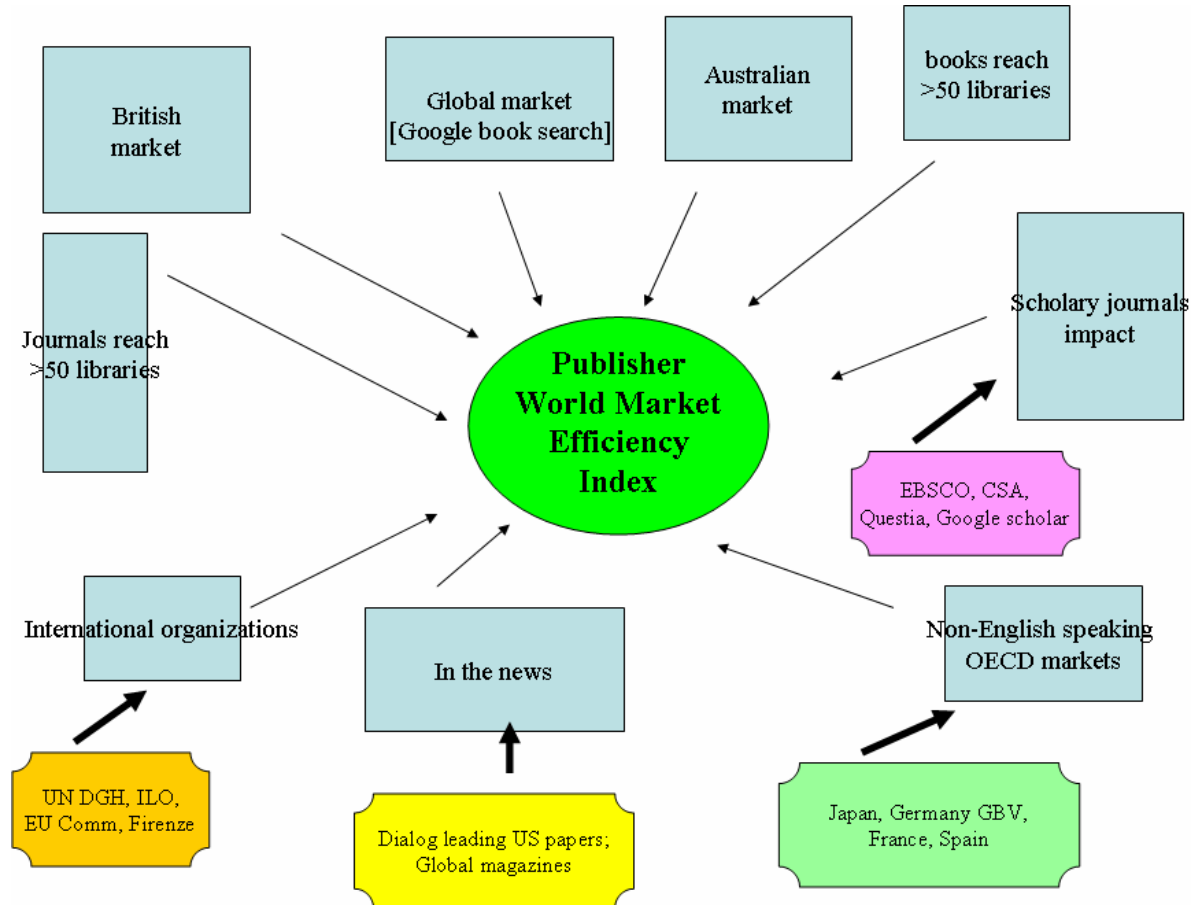

As to the readership among the large **international bureaucracies**, we have chosen

- **The European Commission Library Brussels (ECLAS)**
- **The European University Institute, Firenze, Library**
- **The Dag Hammarskjöld Library, United Nations**
- **The ILO LABORDOC Library System, Geneva**

We calculate for each company the probability that its books are available at these catalogue systems, and conclude from these data parametric indices (see below) of geographical diversity in publishing in the wider context of the indicators already presented in this work.

The combined index construction had the following logic:

Scheme 1: The combined non-parametric index

We had to correct the very inflated British/Irish COPAC results for "Campus Verlag" with the existing publisher/number of books available data available from Karlsruhe and Bielefeld. The reason is simply that the COPAC interface includes all titles with the keyword "Campus" in the "Campus" statistics. Thus we used the final figure 3227 entries for Campus Verlag at the COPAC system.

For the continental Europeans, it is distressing that their companies, not listed in this comparison, would have to go a long way even to meet the quantity and quality criteria of the smaller and less powerful US companies. Equally important it is however to underline that especially the major Dutch companies, like Amsterdam and IOP, have found their market niche, and after decades on the international market have built up a certain standing.

Our final non-parametric comparison shows the "author shopping list" results for our combined nineteen indicators, broken down into nine **categories**. Which company maximized best performance on all fronts, and which company found it most difficult to satisfy all nineteen different and difficult quality and marketing criteria at the same time?

All combined, **Cornell** and **Monthly Review Press** are in the lead, while **Springer** and **Campus** are in the lowest ranks. But again, the overall global performance of these companies is impressive, and is most probably more than a match to the performance of European companies, not listed in our comparison.

The calculation of the **parametric index** was based again on Table 12. This time, the index is not the result of the calculation of the means of the 9 subcomponents, but of the factor analytical weighting, based on principal components, with **four factors**, which in between them explain 80% of global publisher efficiency (based on the theoretical models,

developed in Heshmati and associates, 2003 – 2007). The calculation was performed by the SPSS XV Computer Programme, as installed at the University Computing Center at Innsbruck University.

Graph 7: What makes a truly global book publishing company

Although it would have been also possible to calculate a single-factor, parametric index, we had to give up the final interpretation due to the low percentage of component variable variance, which the single factor

explains.²⁵ The multiple factor model is much richer in detail, and explains 80% of total variance, while the single factor model just explains 32% of total variance. The factor analytical results with four factors are also a much better “menu card” for younger social scientists – they have a choice then to make, weighting their various individual career plans. It depends then, whether they want to go for global market power, or whether they want to launch a scholarly journal or a series, or whether they are interested primarily in the North American market, or whether they’d like to launch their first or second English language book.

Table 14: a four factor assessment of the combined performance on all nineteen indicators explaining more than 80% of total variance

Percentage of total variance explained

Our four factor model, which integrates all the factors, whose Eigenvalues are bigger than 1, now reveals that indeed there are several cultures to be encountered in global science. There is a factor of **universal**, and not just North American **market penetration** (basically so well covered in the OCLC); **MRP** (Monthly Review Press) and **Cornell** are the market leaders here. The system also has **efficient** and inefficient **journal and serial producers**, notably with the two European leading depositories of books on European integration, the Commission Library in Brussels and the European University Institute in Firenze, keeping away from market leaders like devil and holy water in Catholic mythology. The market leaders are **Saint Martin's Press** and **Monthly Review Press**, and a lamentable and very probable explanation for this phenomenon would be the inherent structural conservatism and neo-liberalism of the Commission and the relatively high proportion of neo-Marxist globalization critique inherent in many of the publications of these two US-led companies. One conjectures that the intellectual climate at major US Universities is much more open than that at the Commission. **Edward Elgar** and **Saint**

Martin's Press are the market leaders in the efficiency of world market penetration in North America. **Amsterdam UP** and **Transaction** finally are the leaders in the race for comparative advantage in book production and marketing.

Fire some peers! Author empowerment and independent quality control for the publishers – some practical conclusions

This article has analyzed the rich potentials of international publishing with major international book publishing companies. In all, these companies have done a great job in terms of science, the open society, and the University system to survive. They carried an entrepreneurial risk to transport "our" results to wide and disperse publics.

The article should be above all understood to be an invitation, also to younger scholars, not only from the world "center", but also from the world periphery and semi-periphery, to try their good luck, to submit their works to the peer-reviewed processes and to enter into contracts with major publishing companies.

Especially in terms of book manuscript submission, younger scholars from outside North America should not hesitate to contact the 21 producers under scrutiny here. As our Table 15 shows, several of them have become companies, which might be described as showing signs of a strong "comparative advantage" in the production, the marketing, and the sales of academic books:

Table 15: the book production specialists – comparative advantage in book production

Graph 7: the comparative advantage for book production

Source: our own calculations based on the data of this article, using Microsoft EXCEL 2000/2003 and SPSS XV (Innsbruck University) software, Austria. Reference data bases: Courtesy: Fachhochschulstudiengänge Burgenland, University of Applied Sciences, Campus 1, A-7000 Eisenstadt, www.fh-burgenland.at Study Library for the opportunity to use the OCLC Worldcat documentation system, and courtesy to Innsbruck and Vienna University for the opportunity to use their reference systems online

The article also has shown the enormous potentials these companies offer. At the same time, the article has shown that for the companies and their business culture, some adaption is needed to the rapidly changing conditions of the 21st Century. All of them, from Amsterdam University Press with the letter "A" to "Transaction Publishers" with the letter "T" must be congratulated for their work so far. They sell our products

worldwide, and pay us even a fair and decent royalty. Often younger scientists, especially from outside North America, tend to consider these companies as big, insurmountable “gate keepers”, not even worth trying to contact.

In terms of our knowledge-gathering for the scholarly community about the publishing companies, it has to be emphasized as well that the data, tools and methods gathered here and also our website catalogues, presented in the appendix, are an invitation to all those scholars who would like to gain a more critical perspective of the sometimes big, sometimes powerful unknown, the publishing company.

Critics might argue that the internet addresses of the global catalogues are known at any rate. No, they are not – at least the functioning, updated ones, and clicking through established lists on the internet is often a really frustrating business.

Ask your publisher about the real presence of your book(s) in markets as geographically apart as Algeria, Argentina, Austria, Belgium, Brazil, Canada, China, Chile, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Israel, Italy, Japan, New Zealand, Norway, Poland, Portugal, Slovenia, Spain, Sweden, Thailand, United States of America, which are all, in one way or the other, offering a library union catalogue. Compare the presence of your own books with those of colleagues, who work in the same field, on the big markets in North America, Japan, and Europe, and look into the library catalogues of research centers and Universities in future global players. Do not hesitate to ask yourself, as an author, which works transcended the cultural boundaries of North and South, East and West, and which failed to do so and why.

The quality criteria presented here also should help publishers to ascertain the real market possibilities of a book proposal. If you are a publisher, or an author, look at the competing products already on the market, and bring to the attention of your publishers, if need be, the results of such surveys as were performed here in this study. Being global entrepreneurs, we social scientists should spend some – but not too much time of course – on independent “marketing analysis”, to humbly learn the true dimensions of our strengths and weaknesses as authors or editors.

Bring in some electronic super-peers to discipline your own peer reviewers, who might use their social power as peers just to keep you

away because you are an unwanted new and fresh entrant on the market. You will discover that academic superiors, peers etc. more often than not developed informal distribution coalitions and networks behind your editorial or researchers' back. Like opera tenors and soprano singers, we scientists are all too human, and contracts bring with them material satisfaction, and along with them power, and greed for more. Since scientists in their majority are government subsidized individuals, why should they differ in their behavior from other socialist bureaucrats, so aptly described by Janos Kornai?

The objective quality criteria established in this article will also help you to better survive in the "Ivory Tower". Fierce and ruthless as the competition has become on the shrinking markets of the University system in crisis, like the one in Europe, the objective quality and marketing criteria, developed here, might serve to put the facts on the table and say – hey – and what about your own echo in peer reviewed journals, echoed in Cambridge Scientific Abstracts, in EBSCO Host, in books published on the international markets, etc. etc.? And what about the global impact of your own work? Data like the ones collected here serve to bring us all a little bit onto the ground again – we are after all only humans and nobody can pretend to be above the rules of the market. The article also should help to bring objective criteria into the debates, so often occurring between social scientists, about the ranking of publishing company. Having gained a contract from company x should not allow us to look upon scholar y, who publishes with company z, with disdain.

The results seem to suggest to the companies that instead of waiting for the endless debates among the scientific community and the often esoteric style of the transnational journals, with long waiting queues for scientific book reviews, their strategy to publicize research results and especially their books would be to contact more actively – if they have not done so already – the major weekly and monthly magazines and journals, which are being read by tens of thousands of readers around the globe, like *"The Economist"*, *"Foreign Policy"* or *"Foreign Affairs"*. With the author of this article having spent almost half of his professional lifetime in government, and not just the "Ivory Tower" alone, it has to be said that a lot can be learnt from the clear-cut style of writing and expression, inherent in "politics" and in the international media. It is the discipline of having to transport "our" social science community results to the political sphere, and not just the "Ivory Tower" alone, which makes all the difference. One practical suggestion, which would reflect the empirical, proven strength of the determination of scientific success by the factor

"magazines" would be to invite not only scholars, but also experienced journalists and former, enlightened politicians and top-level bureaucrats, diplomats etc. onto the editorial boards of journals – after all, people, and not just professors, should read, let alone, be able to read our "stuff".

This article has also shown how much is to be done, especially for European book publishing companies, to penetrate international book markets. Even keeping the geographical selectivity of scientific information systems in mind, it cannot be negated what was stated at the outset of this article with the words of Tony Blair:

"Let's be absolutely clear about the situation in Europe today. Our university sector is not competing in the way it needs to with America. You have got China and India developing their university sector in an extraordinary way, and yet if you look at the overall, not just the spending on our university sector, our tertiary education sector, but also where we are getting the value added in the connection between business and university, we don't have anything like the same possibilities in Europe that they have in other parts of the world. But tell me: what type of social model is it that has 20m unemployed in Europe, productivity rates falling behind those of the USA; that is allowing more science graduates to be produced by India than by Europe; and that, on any relative index of a modern economy - skills, R&D, patents, IT, is going down not up. India will expand its biotechnology sector fivefold in the next five years. China has trebled its spending on R&D in the last five. (...) Of the top 20 universities in the world today, only two are now in Europe. (...) Investment in knowledge, in skills, in active labour market policies, in science parks and innovation, in higher education, in urban regeneration, in help for small businesses. This is modern social policy, not regulation and job protection that may save some jobs for a time at the expense of many jobs in the future."

Some practical consequences for younger scholars: from "Write what you know" to "Publish what you know you can sell"

Do you want to become a Harvard Professor, or a bestseller author, or both? A last word, perhaps to prospective authors, especially in the periphery and semi-periphery, should be written here at the end of this essay. **Publish what you know you can sell** always seems to be a good strategy, and always remember that interested readers also can be

referred to journal articles, to website source material etc. to give the necessary background information.

Our prediction, based on the quantitative analysis of the 19 performance criteria in this essay and best-seller performance at Amazon.com is that, interestingly enough, a company's ability to place a high share of their serials production at more than 50 libraries each is the single best statistical predictor of (Amazon) bestseller performance in the field of social policy, measured by the expression

(1) bestseller performance (at Amazon.com) =

1/ natural logarithm of the numerical value of the bestseller rank at Amazon.com

This important, really very important finding seems to indicate that companies, which produce **well-placed serials and journals**, which already found the relative good acceptance of the **library community** and which most probably avoided the often esoteric character of serials and journals, which seem to have only one end – the satisfaction of the isolated scholarly community to see the title(s) published at the end of the day, - will be well placed to publish the future (Amazon.com) bestsellers in the field. A good guess from looking at the residuals from Graph 8 would be that the companies:

- Transaction
- Blackwell
- IOS Press
- Nova Science Publishers
- Monthly Review Press

are well set to enter the higher echelons of Amazon.com bestseller ranks in the not too distant future, while the long-term, underlying marketing trends, observable from the OCLC library figures, seem to suggest that some very powerful and established, and perhaps already saturated companies, like

- Houghton/Mifflin
- Oxford University Press
- Routledge

- Palgrave Macmillan
- Springer

won't be able to maintain their current Amazon.com bestseller profile for long and that there will be shifts in the market away from their production towards the above mentioned companies. With dismay the present author read the notice by his own former publisher, St. Martin's Press (see appendix Table 10) saying:

"Due to the large number of unsolicited manuscript submissions received each year, Pan Macmillan does not encourage authors to submit their work on speculation. New authors and illustrators generally join the list through agents and the company is very unlikely to accept unsolicited material. However other divisions of the company have different policies. Go to our authors' section (link) for information and help about how to get published. We do not accept any unsolicited material, or responsibility for loss or damage to, or return of, any unsolicited materials you send to us; unsolicited materials will be recycled or otherwise discarded."

That does not look like an invitation to an open market of sellers of scientific, intellectual property to the book publishing companies, doesn't it?

Table 16a: The Amazon.com bestsellers in "social policy" and their rank in global Amazon book sales

Appendix Table 2: Global titles "Globalization and European integration" in the OCLC World Catalog System. Only titles specifically dealing with the issue are being mentioned here, while "omnibus" volumes, such as "International perspectives on education" are NOT mentioned in the list (re-numbering the list)

1. Globalization, Europeanization, and the end of Scandinavian social democracy? /
Author: Geyer, Robert.; Ingebritsen, Christine. Publication: Houndmills, Basingstoke, Hampshire : Macmillan ; New York : St. Martin's Press, 2000
Document: English : Book Internet Resource
Libraries Worldwide: 188
2. A ruined fortress? : neoliberal hegemony and transformation in Europe /
Author: Cafruny, Alan W.; Ryner, Magnus, Publication: Lanham, Md. : Rowman & Littlefield Publishers, 2003
Document: English : Book Internet Resource
Libraries Worldwide: 171
3. Globalization and European integration : the changing role of farmers in the common agricultural policy /
Author: Hennis, Marjoleine. Publication: Lanham, Md. : Rowman & Littlefield, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 165
4. Surviving globalization? perspectives for the German economic model /
<http://www.netLibrary.com/urlapi.asp?action=summary&v=1&bookid=143370>
Author: Beck, Stefan.; Klobes, Frank. Publication: Dordrecht : Springer, 2005
Document: English : Internet Resource Computer File
Libraries Worldwide: 158
5. European responses to globalization and financial market integration : perceptions of economic and monetary union in Britain, France and Germany /
Author: Verdun, Amy, 1968- Publication: New York, N.Y. : St. Martin's Press, 2000
Document: English : Book Internet Resource
Libraries Worldwide: 154
6. Partners or rivals? :
European-American relations after Iraq /
Author: Evangelista, Matthew,; Parsi, Vittorio Emanuele.
Publication: Milano : V&P, 2005
Document: English : Book
Libraries Worldwide: 140
7. Social exclusion and European policy /
Author: Mayes, David G.; Berghman, Jos.
Publication: Cheltenham, UK ; Northampton, MA, USA : Edward Elgar, 2001
Document: English : Book
Libraries Worldwide: 133
8. Social rights in Europe /
Author: De Búrca, G.; Witte, Bruno de. Publication: Oxford ; New York : Oxford University Press, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 129

9. Monetary union in crisis : the European Union as a neo-liberal construction /
Author: Moss, Bernard H. Publication: Houndmills, Basingstoke, Hampshire ; New York : Palgrave Macmillan, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 126
10. Globalization and European integration /
Author: Tausch, Arno, 1951-; Herrmann, Peter,
Publication: Huntington, N.Y. : Nova Science Publishers, 2001
Document: English : Book
Libraries Worldwide: 102
11. The principles of mutual recognition in the European integration process /
Author: Padoa-Schioppa, Fiorella, Publication: Houndmills, Basingstoke, Hampshire ; New York : Palgrave Macmillan, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 95
12. Surviving globalization? :
perspectives for the German economic model /
Author: Beck, Stefan.; Klobes, Frank.
Publication: Dordrecht : Springer, 2005
Document: English : Book
Libraries Worldwide: 88
13. Globalization and regional integration : the origins, development and impact of the single European aviation market /
Author: Dobson, Alan P. Publication: London : New York : Routledge, 2007
Document: English : Book Internet Resource
Libraries Worldwide: 59

United States Library of Congress (<http://catalog.loc.gov/cgi-bin/Pwebrecon.cgi?DB=local&PAGE=First>)

Appendix Table 6: Testing the OCLC for “far away markets”

The open access version of the OCLC allows for an author-to author and book to book, and publisher to publisher testing of the major library holdings around the globe. But yet, for many countries the system is still inadequate, as the following tests will show:

World cat tells us about the **Japanese holdings** of:

The clash of civilizations and the remaking of world order
Samuel P Huntington
New York : Simon & Schuster, ©1996

1. Asia Univ Library Masashino-Shi, 180 Japan
2. Chukyo Univ Library Aichi, 460 Japan
3. Fukuoka City Public Library Shibuya-Ku Tokyo, 150-8513 Japan
4. Kinjo Gakuin Univ Nagoya-Shi Aichi, 463 Japan
5. Kokugakuin Univ Library Tokyo, 150 Japan
6. Nihon Univ, College of International Relations Mishima-Shi Shizuoka, 4118555 Japan
7. Nisshin City Library Nisshin City, 470-0192 Japan
8. Waseda Univ Library Tokyo, 169-8050 Japan
9. □□□□□□ Hachioji-Shi Tokyo, 192 Japan

The **Japanese Union catalogue NACSIS** tells us that the following libraries hold the item:

Holding Libraries 87

Appendix Graph 1: The “forensic” economics of sales figures: US Library presence figures and Amazon and global sales ranks – some very preliminary guesses from randomly picked social science authors and their major works

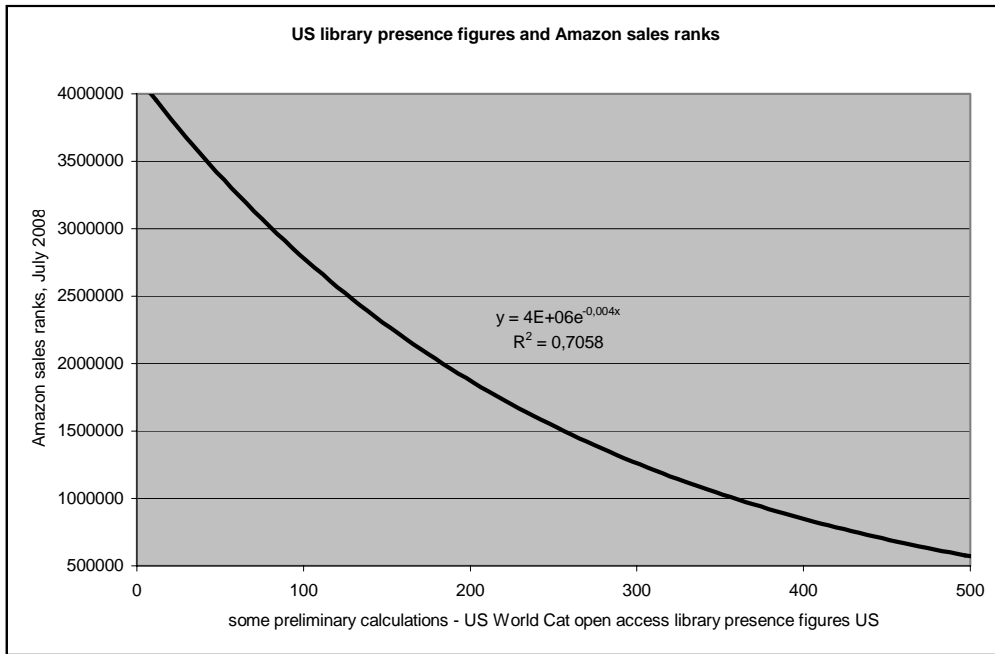

The trade-off for the entire scale

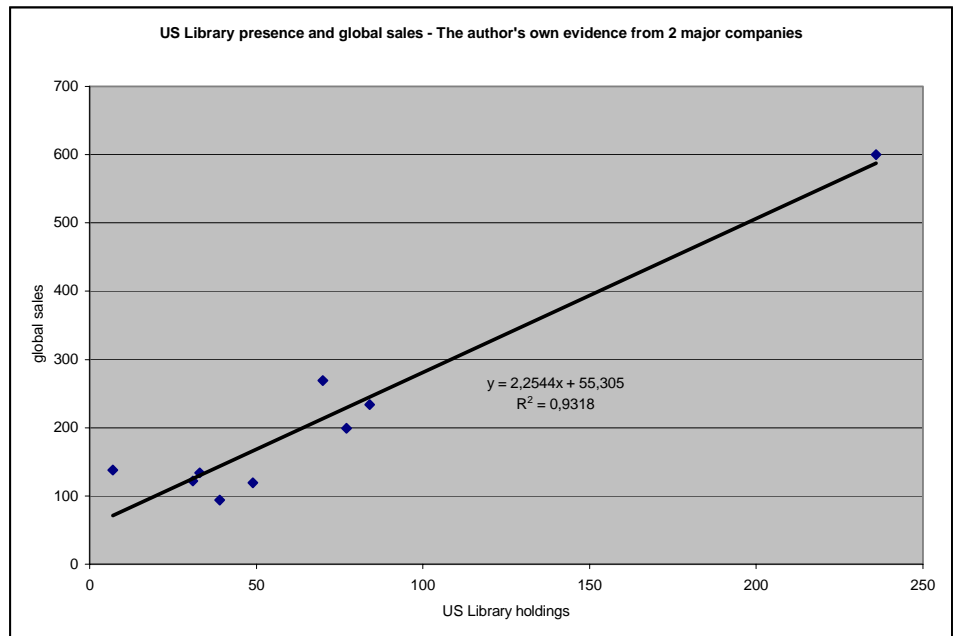

The trade-off for the average European social scientist, publishing internationally

The trade-off between US library presence figures and Amazon sales ranks for randomly picked social scientists – a working hypothesis in need of lots of further evidence

The trade-off between US library presence figures and global sales

Appendix Table 11: The trajectory of a smaller social science publisher in the US, which is now more than 20 years on the market – Nova Science Publishing

The case of Nova Science in this context is not without interest, because it shows precisely to the European side how an open society and an open University system create opportunities even for newcomers on the market.

Although Nova started in the field of science, the company expanded into other disciplines as well and has become one of the major scientific book publishing companies in the US. When the company started its publishing activities by 1987, such titles as „*Issues in intense-field quantum electrodynamics*“; „*The theory of target compression by longwave laser emission*“; „*Laser applications in precision measurement*“; „*The Physical effects in the gravitational field of black holes*“; „*The nonlinear optics of semiconductor lasers*“; „*The Quantum electrodynamics of a high-intensity field*“; „*Industrial measurement of electrical and electronic components and equipment*“ predominated. Dr. David Bade, a senior librarian from Chicago University, recently has taken on in a published internet article what he perceives as fundamental weaknesses of the company's journal publishing program (Bade, 2007).

By 2007, the catalogue still listed 502 titles, containing the word "*physics*", and 585 titles containing the word "*medicine*", but already 255 titles with the term "*economics*", 281 titles with the word "*psychology*", 77 titles with the word "*political science*", 50 titles with the word "*sociology*", 52 titles with the term "*religion*", etc.

The current editor-in-chief is Mr. **Frank Columbus**.

International news and reference archives yield the following evidence:

"Lexis Nexis University "International Press", run by a Consortium of Swiss Universities, which combines in its archives such sources as La Stampa , The New York Times, The Age (Melbourne, Australia), The Japan Times, Milano Finanza, South China Morning Post, and Times Educational Supplement already mentions **661 articles** to date, explicitly dealing with materials, published by **"Nova Science Publishers"**

"Dialog Select Open Access/Magazines", which combines complete texts of hundreds of magazines and journals from leading publishers, documented in sources such as Business Dateline, Business & Industry®, CMP Computer Fulltext, Computer News Fulltext, General Science Abstracts/Fulltext, Harvard Business Review, Gale Group Computer Database, Gale Group Health & Wellness, Gale Group Magazine Database, Gale Group Trade & Industry Database, The McGraw-Hill Companies Publications Online, and Periodical Abstracts PlusText™, carries to date already **189 articles** referring explicitly to **"Nova Science Publishers"**

International bibliographical content and reference services for peer-reviewed refer to scientific works published by Nova Science Publishers in the following fashion:

"EBSCO Scientific abstracts", combining the most important scholarly journals in the social sciences, documented in Academic Search Premier, Academic Search Elite, Business Source Elite, EconLit, Psychology and Behavioral Sciences Collection, Regional Business News, SocINDEX, already makes **1012 explicit references** to titles published by **"Nova Science Publishers"**

"Cambridge Scientific Abstracts (CSA)" makes **189 references to Nova Science Publishers titles** in the field of **social sciences**; in addition it lists **500+ world class scholars** in the system, who already published with that publisher

"Bibliography of Asian Studies" made **247 references to Nova titles** by end 2007.

In addition, other **free internet bibliographies** mentioned, by end 2007 – the following number of Nova titles as well. Only some are listed here:

"LEXIS/NEXIS literature search", freely available via the German University internet site **"Lalisio"**, mentions the following specific references in the international, peer-reviewed journals to **Nova publications**:

28 search results from **Marketing & Advertising Reference (LNE)**

129 search results from **ABI/Inform Select (LNE)**

367 search results from **Law Reviews, Combined (LNE)**

* **"Infoconnex Political Science"**, a freely available political science data search engine, organized by the German Science Ministry and other scientific organizations in Germany, yielded **113 references** for **Nova Science Publishers** titles (Infoconnex Political Science is partly based on **Cambridge Scientific Abstracts PAIS**)

"John Wiley journals/Blackwell Synergy", combining full-text access to the scholarly journals of that publishing company, carries **81 references** to articles, mentioning "Nova Science Publishers";

"Inforetrieve article finder", a free on-line scientific bibliography, mentions **47 articles**, which directly refer to "Nova" titles

"Elsevier Science Direct", a website, which claims to present access to 1/4 of the world's medical, technical and science information, refers to **27 titles**, which are explicitly referring to "Nova Science Publishers";

"JSTOR Arts and Sciences II", a collection of the leading 125 journals in the fields of arts and humanities, mentions **22 articles** with references or reviews of Nova titles;

"Central and Eastern European Library Online", a new full-text bibliographical service, covering over 190 journals published in the new Eastern Europe, mentions **14 Nova titles** etc. etc.

"Project Muse", a free international internet bibliography, refers to **31 Nova Science publications**

* **"Virtuelle Fachbibliothek Politikwissenschaft"**, a freely available German on-line reference service for world-wide political science, initiated at Hamburg University, mentions the following references to **Nova Science Publishing titles**:

"WWW-Suchraum Politikwissenschaft" • 134

"WWW-Suche [Seekport]" • 94

"SSG-OPAC Politikwissenschaft. Friedensforschung" • 25

"World Affairs Online [FIV IBLK]" • 30

"Internationale Bibliographie der Sozialwissenschaften [IBSS]" • 197

"GBV - Gemeinsamer Bibliotheksverbund" • 634

"KOBV Digitale Bibliothek Berlin-Brandenburg" • 9

"hbz-Verbundkatalog [NRW]" • 1

"HeBIS - Hessisches BibliotheksInformationsSystem" • 8

"SWB - Südwestdeutscher Bibliotheksverbund" • 168

Nova Science Publishers published the following number of titles and contributions from the following world's top 20 Universities by end 2007

<http://ed.sjtu.edu.cn/rank/2007/ARWU2007.xls>

https://www.novapublishers.com/catalog/advanced_search.php

- 1 Harvard Univ 62
- 2 Stanford Univ 28
- 3 Univ California - Berkeley 27
- 4 Univ Cambridge 47
- 5 Massachusetts Inst Tech (MIT) 20
- 6 California Inst Tech 38

- 15 Univ Pennsylvania 50
- 16 Univ Washington - Seattle 7
- 17 Univ Wisconsin - Madison 10
- 18 Univ California - San Francisco 13
- 19 Johns Hopkins Univ 24
- 20 Tokyo Univ 90

Also, researchers from some of America's leading government research institutions published with Nova:

- US Military Academy 11
- US Air Force Academy 7
- Defense Intelligence College 6 titles
- Rand Corporation 5 titles
- Hudson Institute 3 titles
- US Naval War College 1
- US Army War College 1

Over recent years, Nova increasingly also published authors from Asian Universities

Nova Science Publishers titles and contributions from the 10 leading Asian Universities

- 1 Tokyo Univ 20
- 2 Kyoto Univ 22
- 3 Australian National University 57
- 4 Hebrew Univ Jerusalem 64
- 5 Osaka Univ 67
- 6 Tohoku Univ 18
- 7 Univ Melbourne 35
- 8 Nagoya Univ 25
- 9 Tokyo Inst Tech 53
- 10 Hokkaido Univ 18

In addition, Nova also publishes a great number works by European researchers:

Nova Science Publishers titles and contributions from the 10 leading European Universities

- 1 Univ Cambridge 47
- 2 Univ Oxford 28
- 3 Imperial Coll London 19
- 4 Univ Coll London 64
- 5 Swiss Fed Inst Tech - Zurich 9
- 6 Univ Paris 06 12
- 7 Univ Utrecht 27
- 8 Univ Copenhagen 16
- 9 Univ Manchester 23
- 10 Univ Paris 11 56

Estimated geographical distribution of titles and contributions outside the US

(Method: catalogue catchwords [product description] "University" + "country name". The following table contains just a sample of countries)

- 307 Australia
- 302 Germany
- 280 China
- 261 Russia
- 223 India
- 205 Canada

140 Poland
129 Turkey
109 Israel
107 Brazil
102 Sweden
79 Finland
76 South Africa
65 New Zealand
63 Argentina
54 Iran
47 Norway
34 Ireland
17 Pakistan
14 Saudi Arabia

Some characteristics of the global publishing program (Library of Congress: 2536 titles by mid 2007)

The Library of Congress currently listed 2536 Nova Science Publishers titles (search August 11, 2007)

Top 10 titles

Their 10 most widely read titles - in terms of academic library presence around the globe (OCLC World Catalogue) - are:

1. Arctic National Wildlife Refuge / Author: Cogwell, Mathew T. Publication: New York : Nova Science Publishers, 2002
2. Smoking : the story behind the haze / Author: Koven, Edward L. Publication: New York : Nova Science Publishers, 1996

Author: Clark, Cal, 1945-; Montjoy, Robert S.,
Publication: Huntington, N.Y. : Nova Science Publishers, 2001
Document: English : Book
Libraries Worldwide: 135

8. Child soldiers, adult interests : the global dimensions of the Sierra Leonean tragedy /
Author: Pham, John-Peter. Publication: New York : Nova Science Publishers, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 113

9. Current issues in globalization /
Author: Westerfield, Robert E.; Abbink, J.
Publication: New York : Nova Science Publishers, 2004
Document: English : Book
Libraries Worldwide: 106

10. The global wage system : a study of international wage differences /
Author: Köhler, Gernot. Publication: New York : Nova Science Publishers, 2004
Document: English : Book Internet Resource
Libraries Worldwide: 103

11. The Sierra Leonean tragedy : history and global dimensions /
Author: Pham, John-Peter. Publication: New York : Nova Science Publishers, 2006
Document: English : Book Internet Resource
Libraries Worldwide: 103

12. Globalization and European integration /
Author: Tausch, Arno, 1951-; Herrmann, Peter,
Publication: Huntington, N.Y. : Nova Science Publishers, 2001
Document: English : Book
Libraries Worldwide: 102

13. South Asia in the era of globalization : trade, industrialization ,and welfare /
Author: Bhattacharya, Mita.; Smyth, Russell. Publication: New York : Nova Science Publishers,
Inc., 2004
Document: English : Book Internet Resource
Libraries Worldwide: 101

14. Global capitalism, liberation theology, and the social sciences :
an analysis of the contradictions of modernity at the turn of the millennium /
Author: Müller, Andreas,; Tausch, Arno,, and others
Publication: Huntington, N.Y. : Nova Science Publishers, Inc., 2000
Document: English : Book
Libraries Worldwide: 95

15. Global Keynesianism :
unequal exchange and global exploitation /
Author: Kohler, Gernot.; Tausch, Arno,
Publication: Huntington, N.Y. : Nova Science Publishers, 2002
Document: English : Book
Libraries Worldwide: 95

16. The global war on terrorism : assessing the American response /
Author: Davis, John, Publication: New York : Nova Science Publishers, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 93

17. The impact of globalization on education /
Author: Sinagatullin, Ilghiz M., 1954- Publication: New York : Nova Science Publishers, 2006
Document: English : Book Internet Resource
Libraries Worldwide: 93

18. New perspectives on globalization /
Author: Smith, Elton V.
Publication: New York : Nova Science Publishers, 2002
Document: English : Book
Libraries Worldwide: 91

19. Global banking issues /
Author: Klein, E. Publication: New York : Nova Science Publishers, 2005
Document: English : Book Internet Resource
Libraries Worldwide: 92

20. Globalization, modernization, and education in Muslim countries /
Author: Zia, Rukhsana. Publication: New York : Nova Science Publishers, 2006
Document: English : Book Internet Resource
Libraries Worldwide: 90

World class scholars who published for Nova Science in the field of social sciences - Nova Science Publishers in COS Cambridge Scientific Abstracts

COS Scholar Universe provides direct access to more than 1.3 million active researchers working in over 200 disciplines and 9 countries. Searches in COS Scholar Universe provide unparalleled exposure to the community currently studying a topic of interest. Exploring this living research community expands awareness and access to cross-disciplinary research perspectives, publications, research methodologies, expertise, and collaborative opportunity. With COS Scholar Universe, your faculty and students are directly connected to the community of scholarly research.

Scholars within COS Scholar Universe are also linked to their publications in select 3rd party databases and databases from CSA, facilitating direct links to author background, contact information, and linked publication histories to provide enhanced document context and novel community based pathways to relevant literature
