# Wiki's for Collaborative authoring

Fatima Darries

9 June 2010,
TUT, Pretoria

5 YEARS OF EXCELLENCE
2004 – 2009

# What is a wiki?

- Hawaiian word for quick
- Quick website
- Used to create and develop collaborative or community sites around a common interest
- *“It ‘s the simplest online database that could possibly work”*
  - Ward Cunningham, developed first wiki software in 1994
- Wiki’s in plain English

# How does it work?

- It has a read state and write state
- In the read state- anyone can access (public or private)
- In the write state – writers, editors, moderate, contributors
- Page level protection against editing
- Collection of hyperlinked pages
- Distinguishing characteristic - compare previous versions of a page able to revert back and track who edited the page
- It used simple markup language, but now as simple as editing and saving a page
- Search engine for wiki's e.g www.powerset.com

# What is it used for?

- Plan conferences, workshops
- Webliography/Bibliographies
- Book reviews
- Notes of meetings
- Discuss issues, comment on items in news e.g. new virus
- List of “Who’s who?”
- Knowledge management
- Wiki Wish list

  -Smith and Segoe, 2008.
- team work and collaborative papers (avoiding emailed MS Word file around)
- Note-taking and social discussions at events
- A great e-learning tool, class assignment, discussion

  **-Guy, 2008,** http://www.slideshare.net/MariekeGuy/blogs-wikis-and-more-web-20-demystified-for-learning-and-teaching-professionals

Available language(s) Bosnian, Bulgarian, Catalan, Chinese, Croatian, Czech, Danish, Dutch, English, French, German, Greek, Hungarian, Indonesian, Italian, Kannada, Malay, Malayalam, Maori, Marathi, Nepali, Norwegian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Sinhala, Slovak, Slovenian, Spanish, Swedish, Turkish, Ukrainian
Created by Imma Subirats, Antonella De Robbio, Thomas Krichel and José Manuel Barrueco
Launched January 2003
Current status Online
Background [edit]
Established in 2003, E-LIS is an international open archive for library and information science. Being the first international e-server in this area, E-LIS is organised, managed and maintained by an international team of librarians, with different backgrounds. The open archive resulted from the RCLIS (Research in Computing, Library and Information Science) project and the DoIS (Documents in Information Science), promoted by the Spanish Ministry of Culture and hosted by AEPIC team on machines of the Italian Consorzio Interuniversitario Lombardo per Elaborazione Automatica (CILEA).
Being a not-for-profit/non-commercial project, it is freely accessible and users are able to search and access full-text documents. Searching and archiving in E-LIS are totally free for any user. It is based on the philosophy and principles of Open Source Initiative in computing whereby people from all over the world co-operate in building software for the public domain. Its aim is to further the Open Access philosophy by making full text LIS documents visible, accessible, harvestable, searchable, and usable by any potential user with access to the Internet.
Mission [edit]
The objectives of the E-LIS archive are:
To improve knowledge of the building and management of open archives working practically in the field within the framework of Open Digital Libraries;
Not only to promote open archives in various disciplinary environments, but also to create a valid and credible model in LIS discipline for the building of a world Library and Information Science archive;
To establish a base for communal work between librarians information technology professionals, and to enhance the Open Access movement.
Author rights and responsibilites [edit]
LIS researchers, librarians, students and research institutions are invited to search, and participate by depositing their own work. Articles, presentations and papers can be in any language (abstracts and keywords should be also in English). Preferred formats are .pdf and .html, best suited for later retrieval. Statistical information regarding viewing and downloading is provided.
All works deposited in the E-LIS server remain the property of the author. Authors who submit work are responsible for the documents they archive. Authors have to ensure that the

PBWORKS

Overview Features Resources **Sign up now**

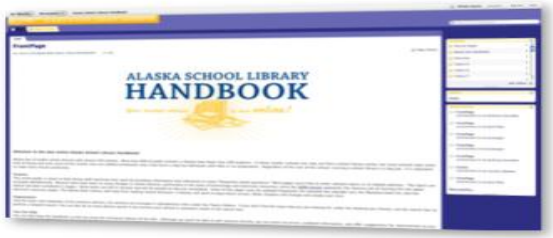
## Using PBworks in Libraries

### PBworks in your Library

Thousands of librarians use PBworks every day to collect and organize information, coordinate staff, engage their community and more.

Bring your library into the 21st century with PBworks online collaboration tools.

Basic workspaces are free for library use. Premium workspaces, with advanced security and access controls, start at just $99 per year.



### How can you use PBworks in your library?

- **Patron Service:** Publish information about new acquisitions. Post library hours and policies. Publicize events such as author visits and reading groups.
- **Procedures:** Use PBworks to outline procedures for daily tasks, processing materials, sending out overdue notices, and giving out library cards.
- **Staff Coordination:** Link a busy staff of professionals and volunteers into an online team. Publish agendas and meeting notes. Launch and track projects. Coordinate schedules and coverage hours.
- **Technology:** Record past problems and solutions with your ILS software, subscription databases, catalog imports, etc. so that if a problem resurfaces in the future, it will be easy to find the solution.

Want more ideas? Check out our educator community to see more suggestions on how to use PBworks in your library.

License Your Work
With a Creative Commons license, you keep your copyright but allow people to copy and distribute your work provided they give you credit — and only on the conditions you specify here. For those new to Creative Commons licensing, we've prepared a list of things to think about. If you want to offer your work with no conditions or you want to certify a work as public domain, choose one of our public domain tools.
Allow commercial uses of your work?

## On a personal note ...

June 3, 2010 at 6:27 pm · Filed under Uncategorized · Edit

Maslow said "What a man can be, he must be" in describing what self-actualization refers to.

It was on target ...

The joy and anticipation of good things to come when I entered the labour market many years ago never waned. I started on a journey of joy that has now ended with the knowledge that I experienced complete fulfilment in my work and I've been truly blessed. The joie de vivre of the vibrant environment created by young adults is highly contagious! The years of being involved in Information Literacy Training at Tshwane University of Technology were the best of my life.

I have one regret though – that is that all good things have to come to an end ...
