

The background of the slide features a photograph of a modern building with a complex, multi-tiered wooden structure, possibly a library or a lecture hall, under a clear blue sky. The building's design is characterized by a series of horizontal wooden slats and a network of metal supports. In the foreground, there are some trees with vibrant orange and red autumn foliage. The overall aesthetic is clean and professional, reflecting the university's branding.

Open Access Journals Support in Canada

CALJ/ACRS at Congress 2010, Montreal

- Heather Morrison, Simon Fraser University
- Brian Owen, Simon Fraser University
- Don Taylor, Simon Fraser University
- Kumiko Vézina, Concordia University
- Andrew Waller, University of Calgary

Survey Team

- **Heather Morrison:** Project Coordinator, BC Electronic Library Network; PhD Student, SFU School of Communication; author, *Scholarly Communication for Librarians* (Chandos, 2009); author, *The Imaginary Journal of Poetic Economics* <http://poeticeconomics.blogspot.com>
- **Brian Owen:** Associate University Librarian for Processing and Systems at SFU Library; Associate with SFU's Canadian Centre for Studies in Publishing; SFU's Master of Publishing Program; and the Public Knowledge Project (PKP). Also .25 fte secondment to Synergies Project.

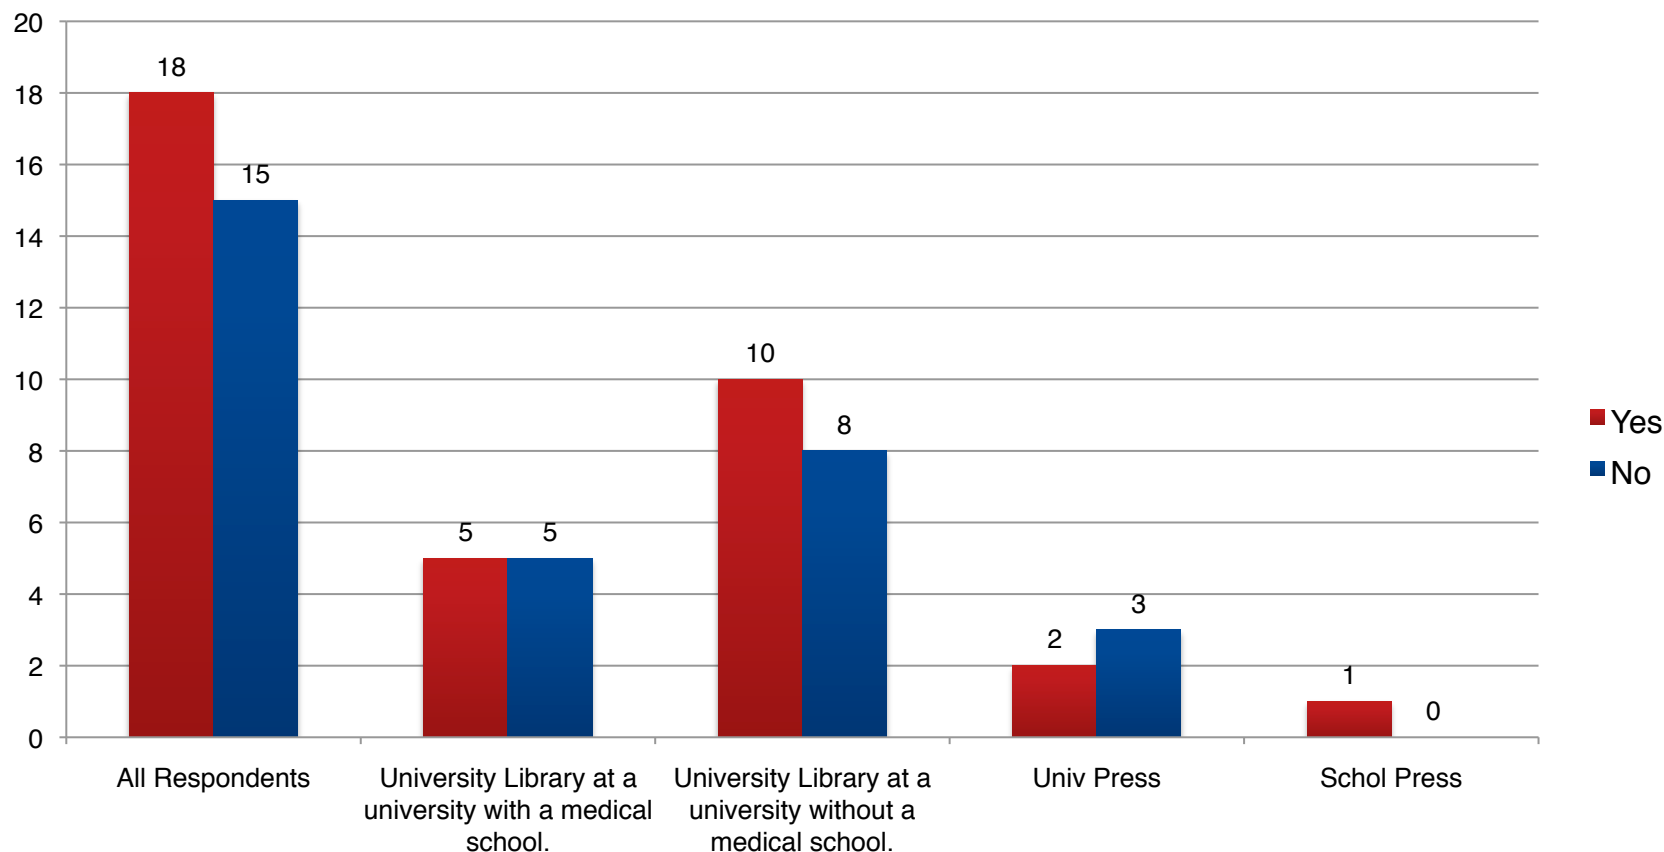

Presenters

- [Selected] survey results
- Synergies, libraries & publishing support
- Scholarly communications & open access models

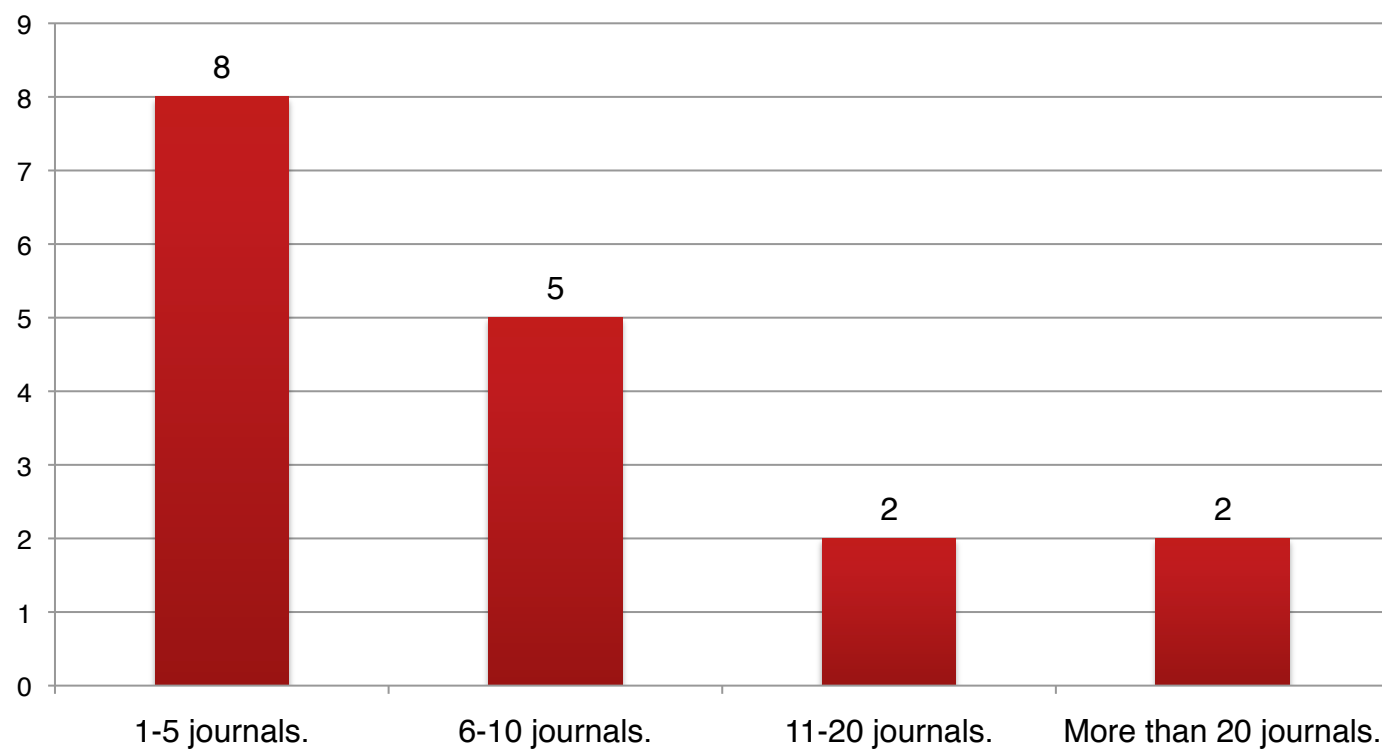

Outline

- 23 questions; 15-20 minutes to complete
- Distributed Mar.2010
- Target groups: 69 university libraries; 19 scholarly presses
- 40% response rate: 27 university libraries
- 32% response rate: 6 scholarly presses
- Preliminary analysis just completed

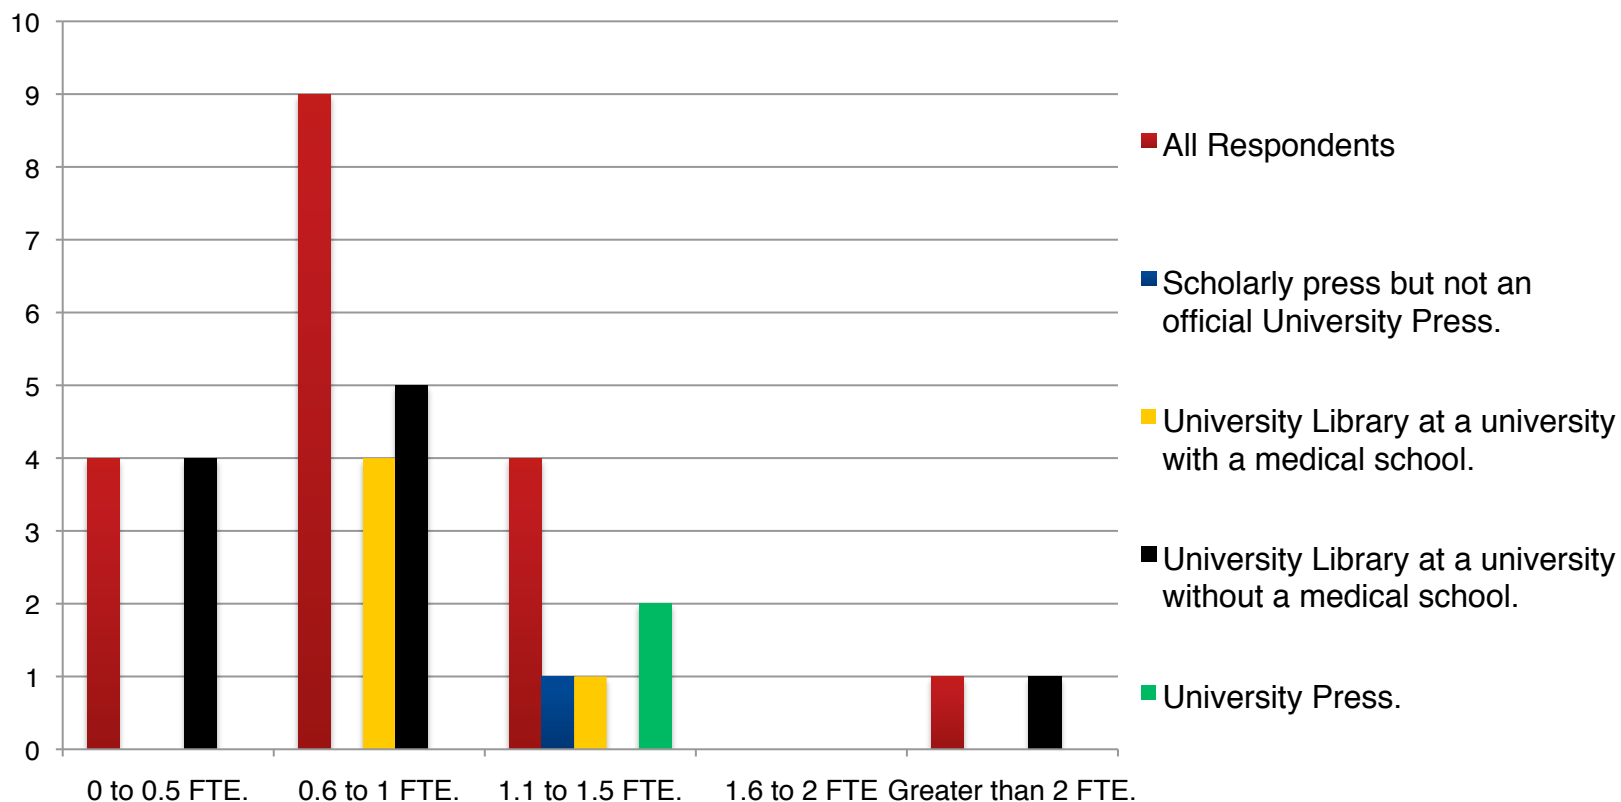

Survey Background

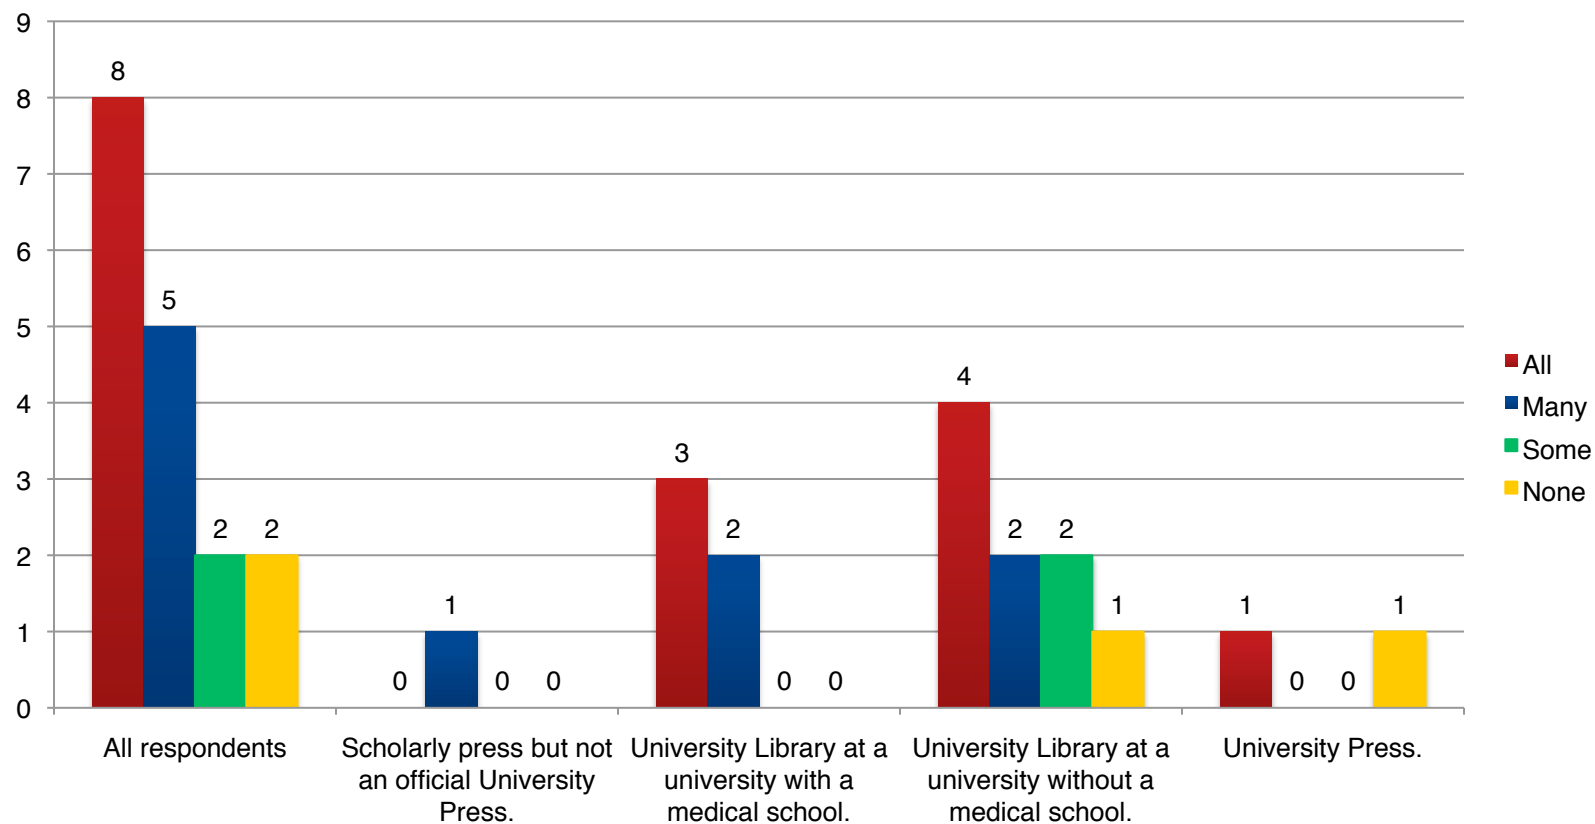

55% Providing journal hosting services and related support; 24% considering

Number of hosted journals

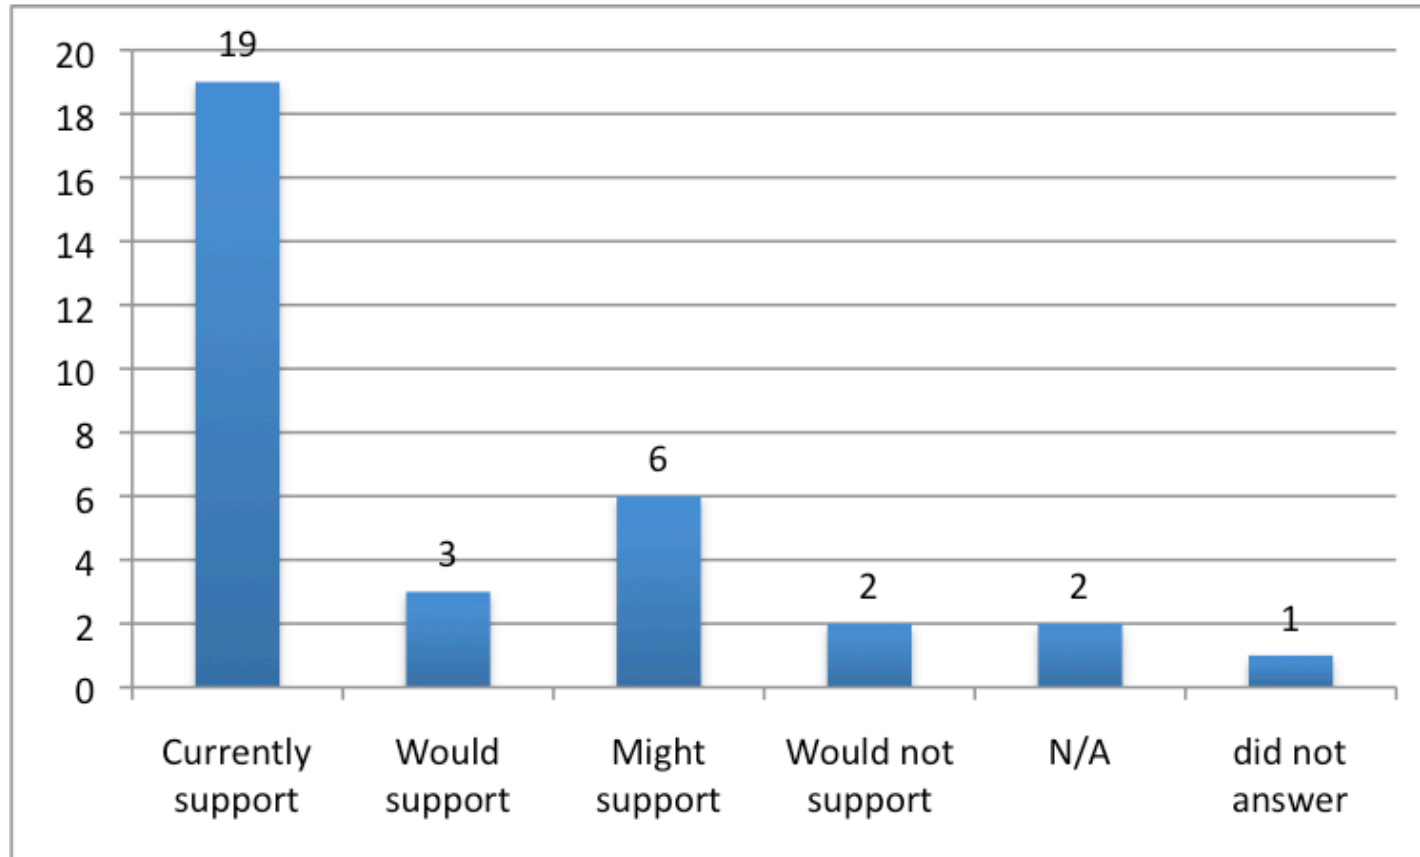

FTEs and journal hosting

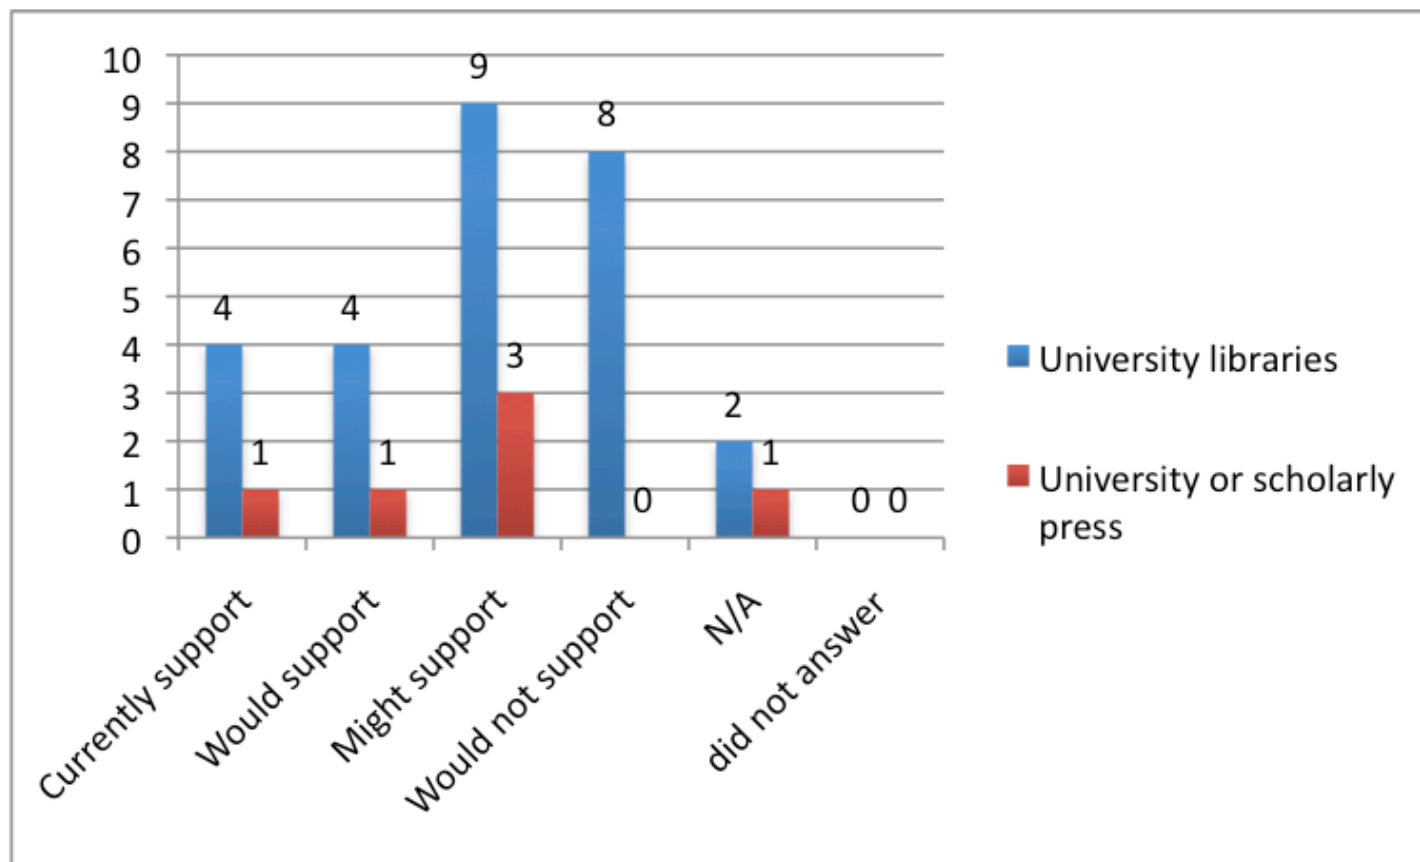

Hosted journals & open access

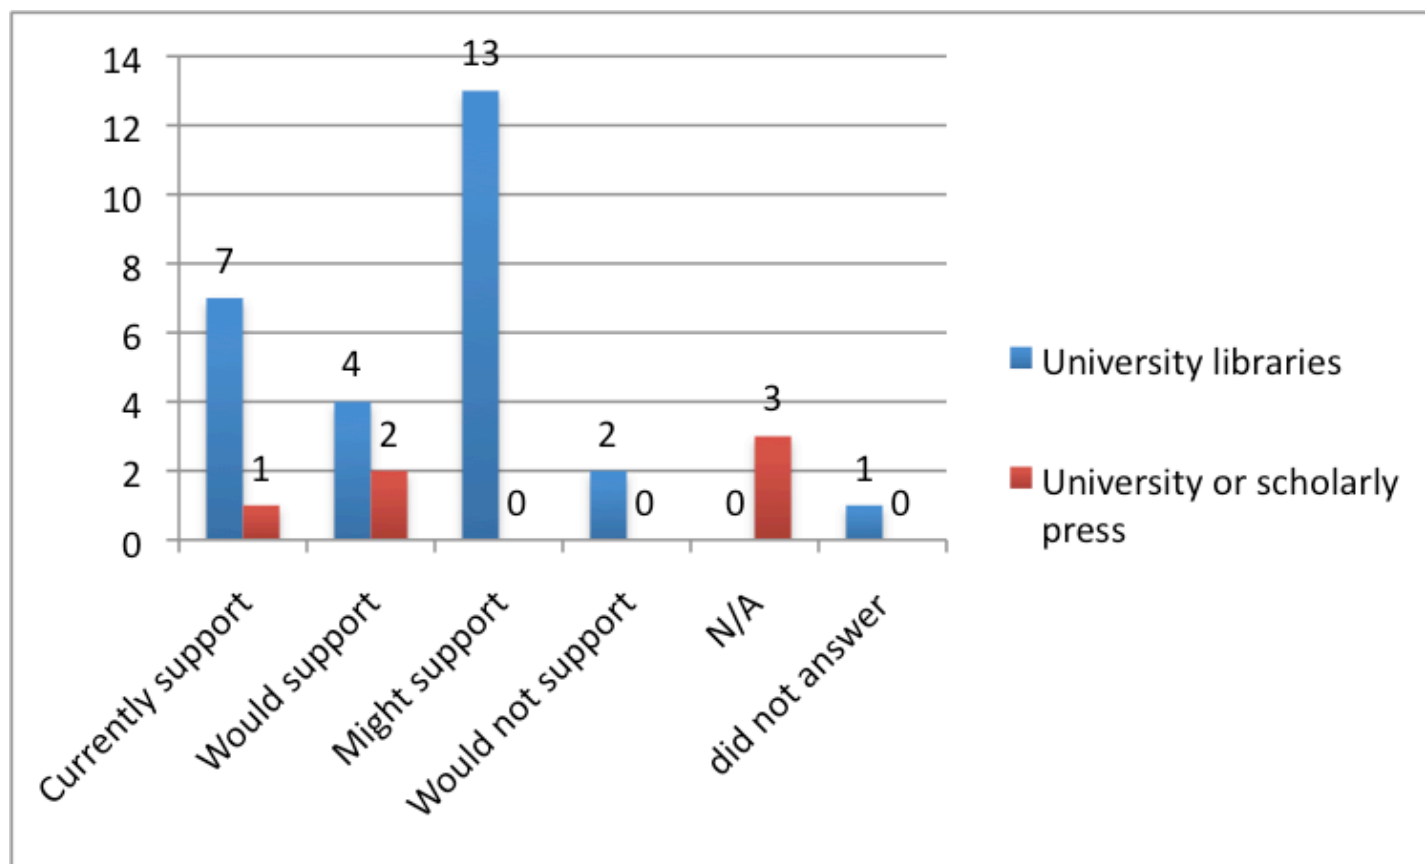

- Scholarly communication and open access models

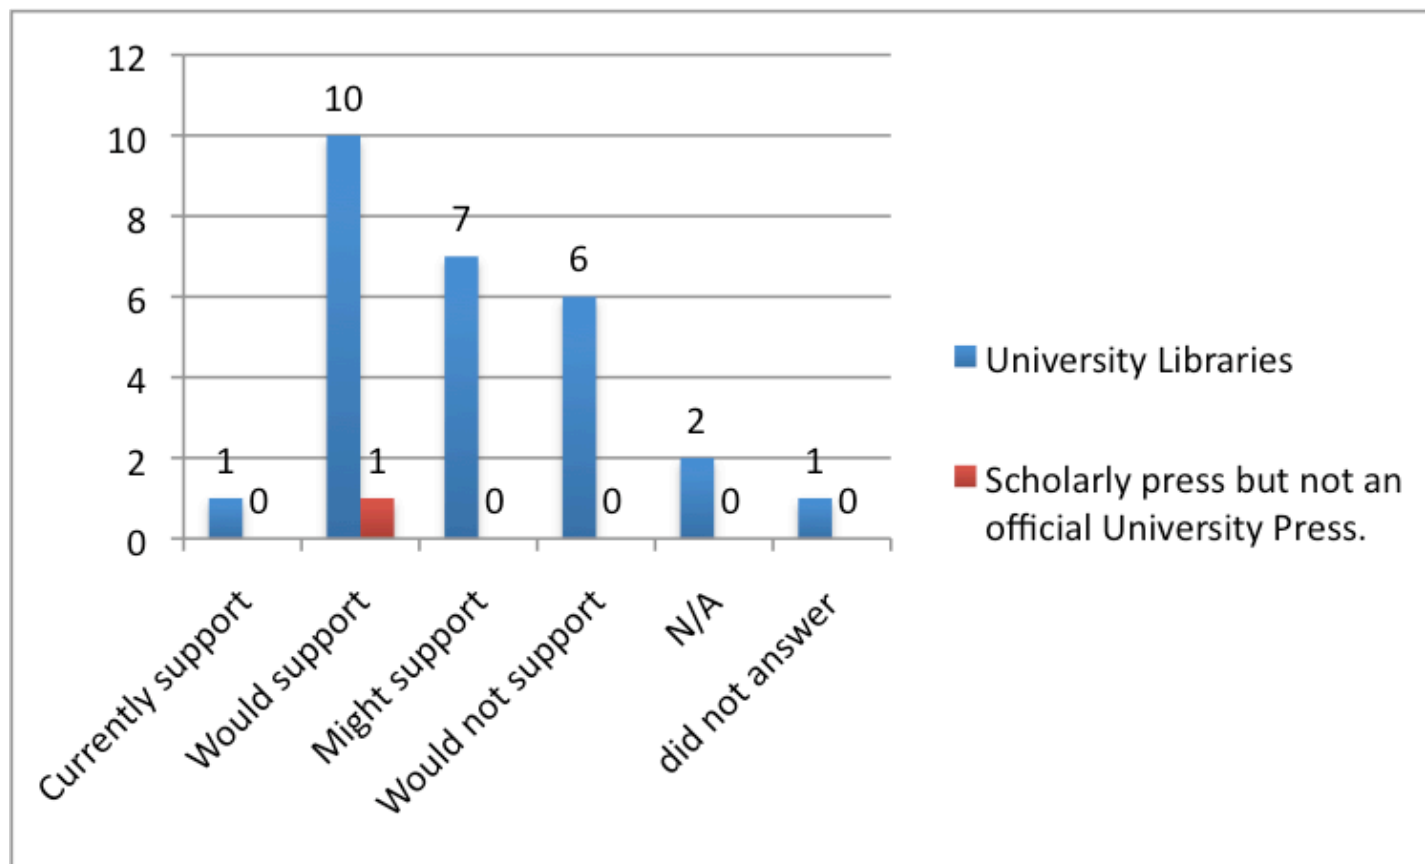

Support Canadian academic journals through subscriptions (all responses)

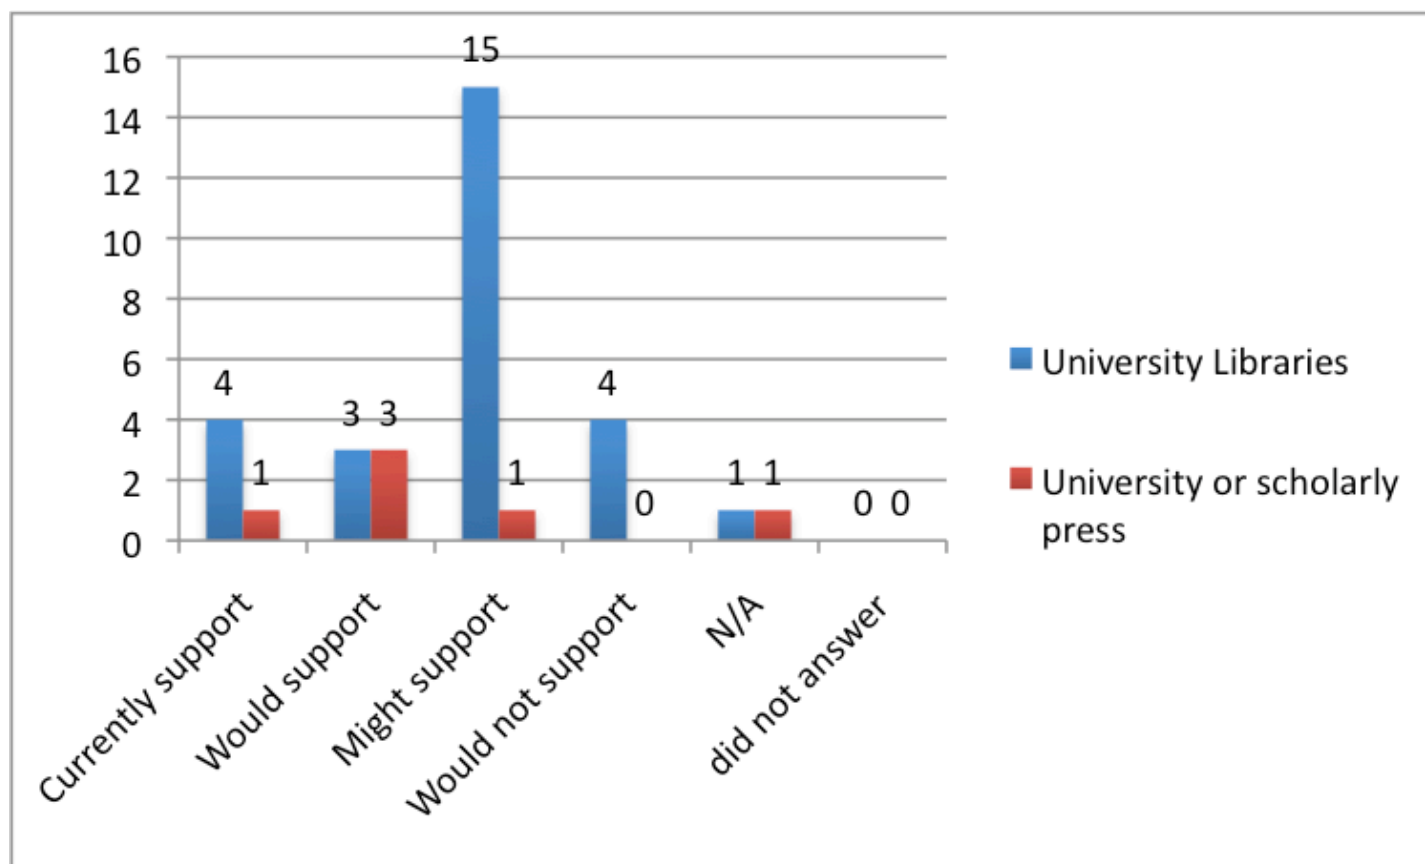

Pay for Open Access article processing fees, with revenue used by the journal to lower subscription prices

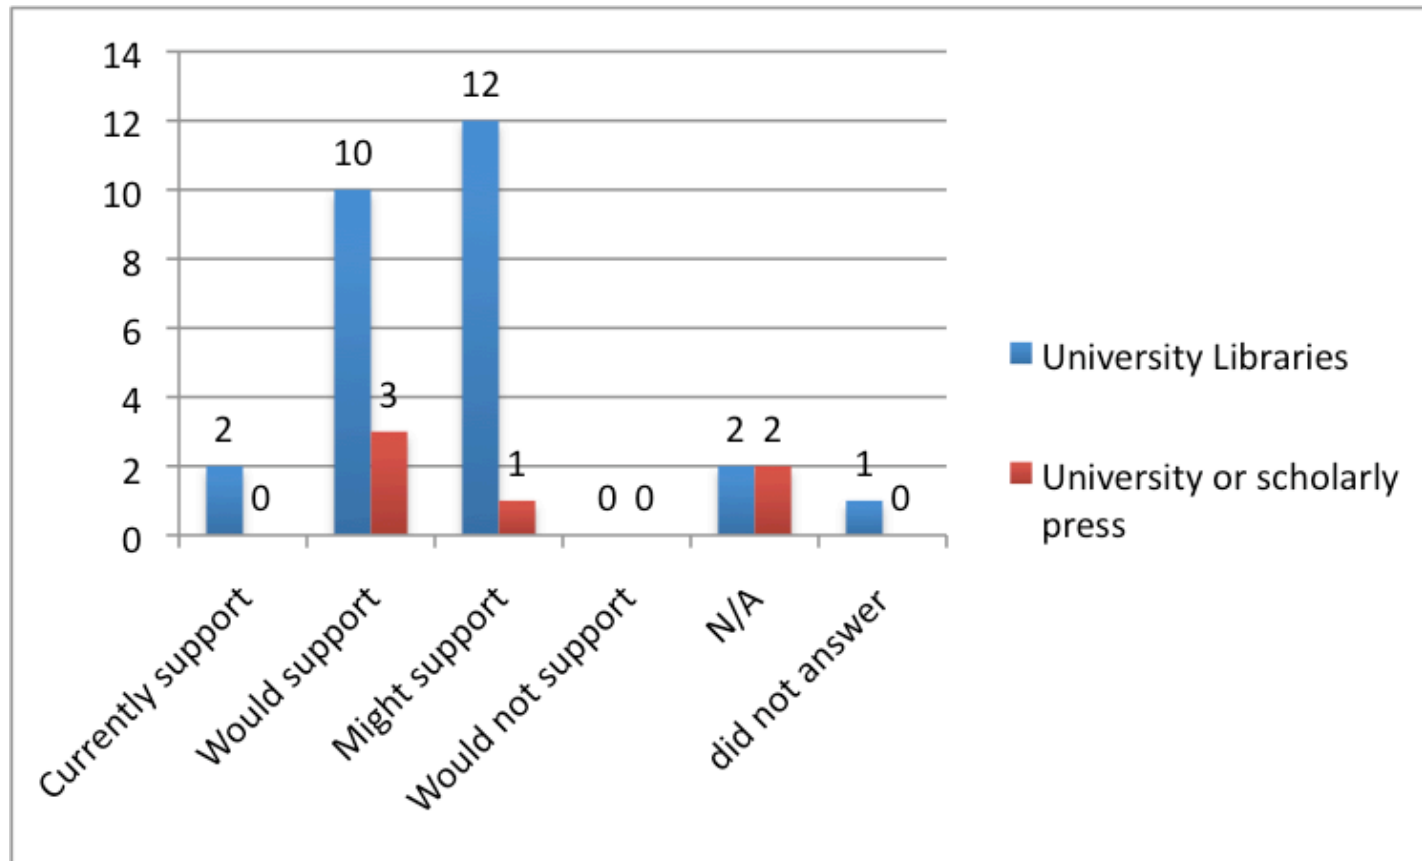

Organizations (e.g. libraries) purchase memberships or provide similar payments to Open Access publishers

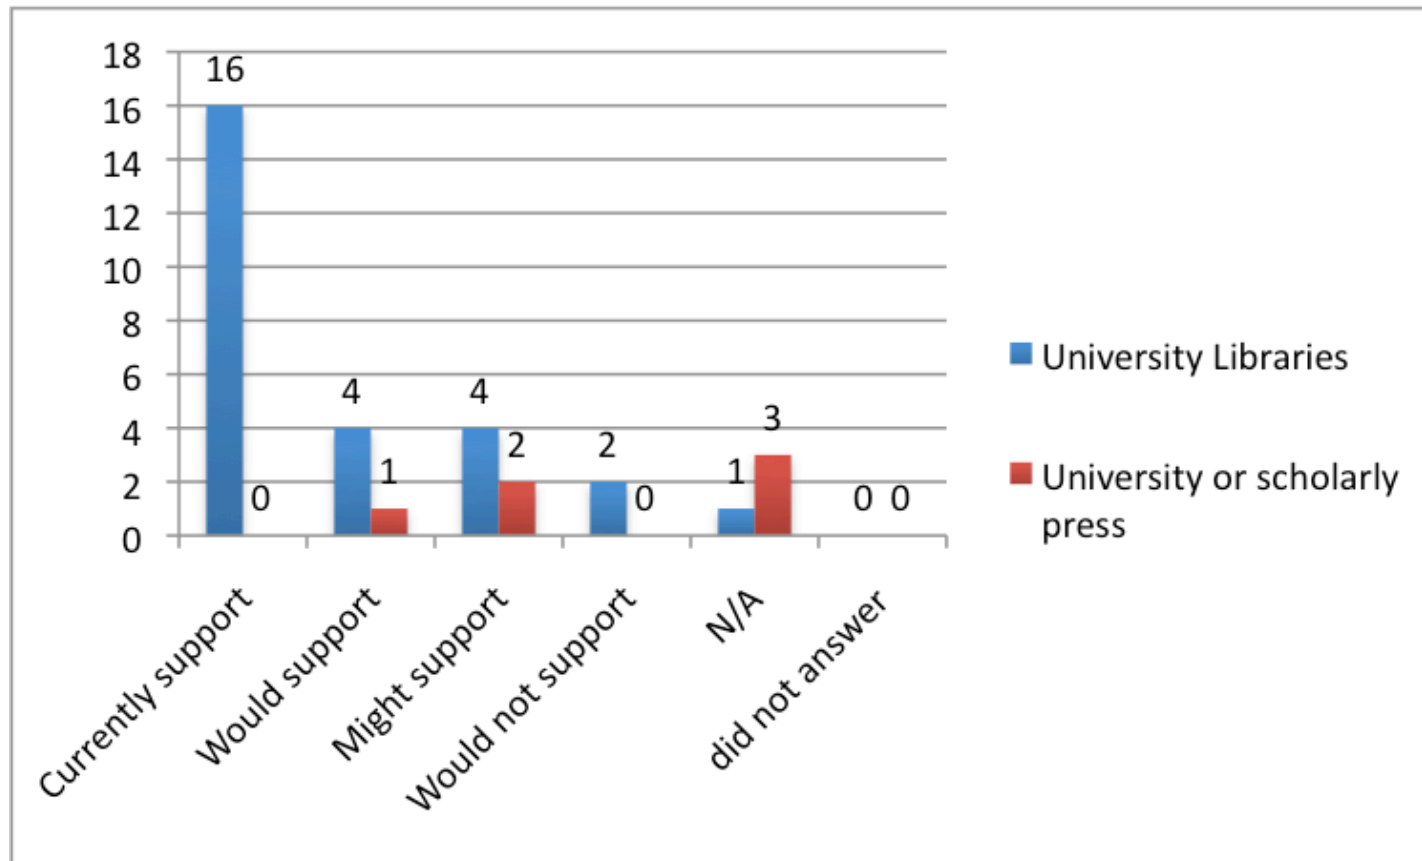

Dedicate a portion of overhead money from grants to pay open access publishing charges

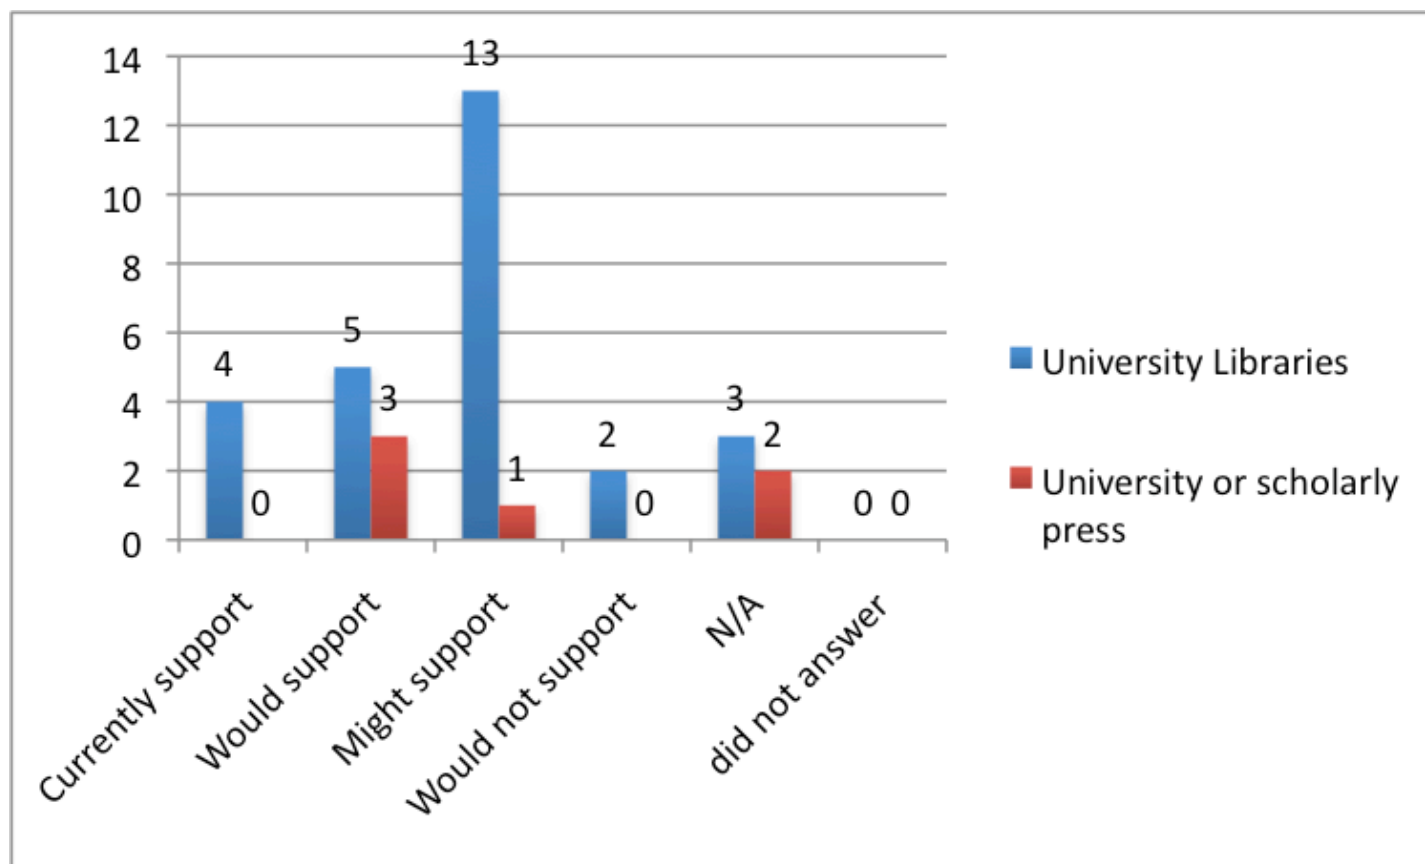

Organizational budget monies (e.g. a portion of Library Collections budget) used to support Open Access publishing

Have library consortia transition to consortial purchase of open access publishing services (e.g. SCOAP3 model)

Host preprints or postprints of articles in the institutional repository

Endowment model: commit subscription monies to create endowment for ongoing open access (e.g. Stanford Encyclopedia of Philosophy model)

Open Access Journals Support in Canada, CALJ/ACRS, June 1, 2010

- A new phenomenon
- Numbers, both sites & number of journals, will likely grow
- Basic D.I.Y. publishing?
- Focus on open access
 - Many models
 - Current trends
 - Scholarly communication context

Observations/conclusions
