[Subscribe to Newsletters](#) 

The bursting of the dot-com bubble in the fall of 2001 marked a turning point for the web. Many people concluded that the web was overhyped, when in fact [bubbles and consequent shakeouts appear to be a common feature of all technological revolutions](#). Shakeouts typically mark the point at which an ascendant technology is ready to take its place at center stage. The pretenders are given the bum's rush, the real success stories show their strength, and there begins to be an understanding of what separates one from the other.

The concept of "Web 2.0" began with a conference brainstorming session between O'Reilly and MediaLive International. Dale Dougherty, web pioneer and O'Reilly VP, noted that far from having

- Feeds are documents used to transfer frequently updated digital content to users.
- This content ranges from news items, weblog entries, installments of podcasts, and virtually any content that can be parceled out in discrete units.
- * You syndicate, or publish, content by producing a feed to distribute it.
- * You subscribe to a feed by reading it and using it.
- * You aggregate feeds by combining feeds from multiple sources.

Social bookmarks' charts version 3.5

This is an interim version, with some mistakes and updates (especially delicious, Connotea, Netvrouz and Simpy) corrected. The next edition (number 4) will contain at least three more services (see below). As I said before, maybe there are some points I didn't notice, or there are some mistakes. And features change quickly.

Reply to: manager@upapartments.com
Date: 2008-05-19, 5:20PM PDT

Large, sunny one bedroom apartment located in the Gourmet Ghetto just minutes from cafes, restaurants, grocery stores, and coffee shops. Easy access to BART, public transportation, downtown, and just minutes from UC Berkeley campus northside. We have just completely remodeled the entire building: New roof, exterior and interior painting, new carpet, bedroom windows, lighting inside and out, remodeled lobby, and more 3 units available: 3rd floor quiet side of building, remodeled, \$1650 Avail. June 3rd 2nd floor, Shattuck side, great view, fully remodeled, \$1600, Avail. Mid-June 1st floor with Balcony, Shattuck side, fully remodeled, \$1600 Avail. July 1st Also have a 2 bedroom unit for \$2000, fully remodeled, Shattuck Side.

Amazon Web Services Eat a Lot of Bits

[John Musser](#), May 21st, 2008 [Comments \(0\)](#)

Amazon [made headlines back in January](#) when they announced that their Amazon Web Services APIs like [S3](#) and [EC2](#) consumed more bandwidth than their own global web sites. Well, now over in an [interesting, short post](#) at the AWS blog, Amazon's Jeff Barr posted the following chart used by CEO Jeff Bezos that clearly highlights this impact.

Internet | Protected Mode: On 100%

<http://blog.programmableweb.com/2008/05/21/amazon-web-services-eat-a-lot-of-bits/>

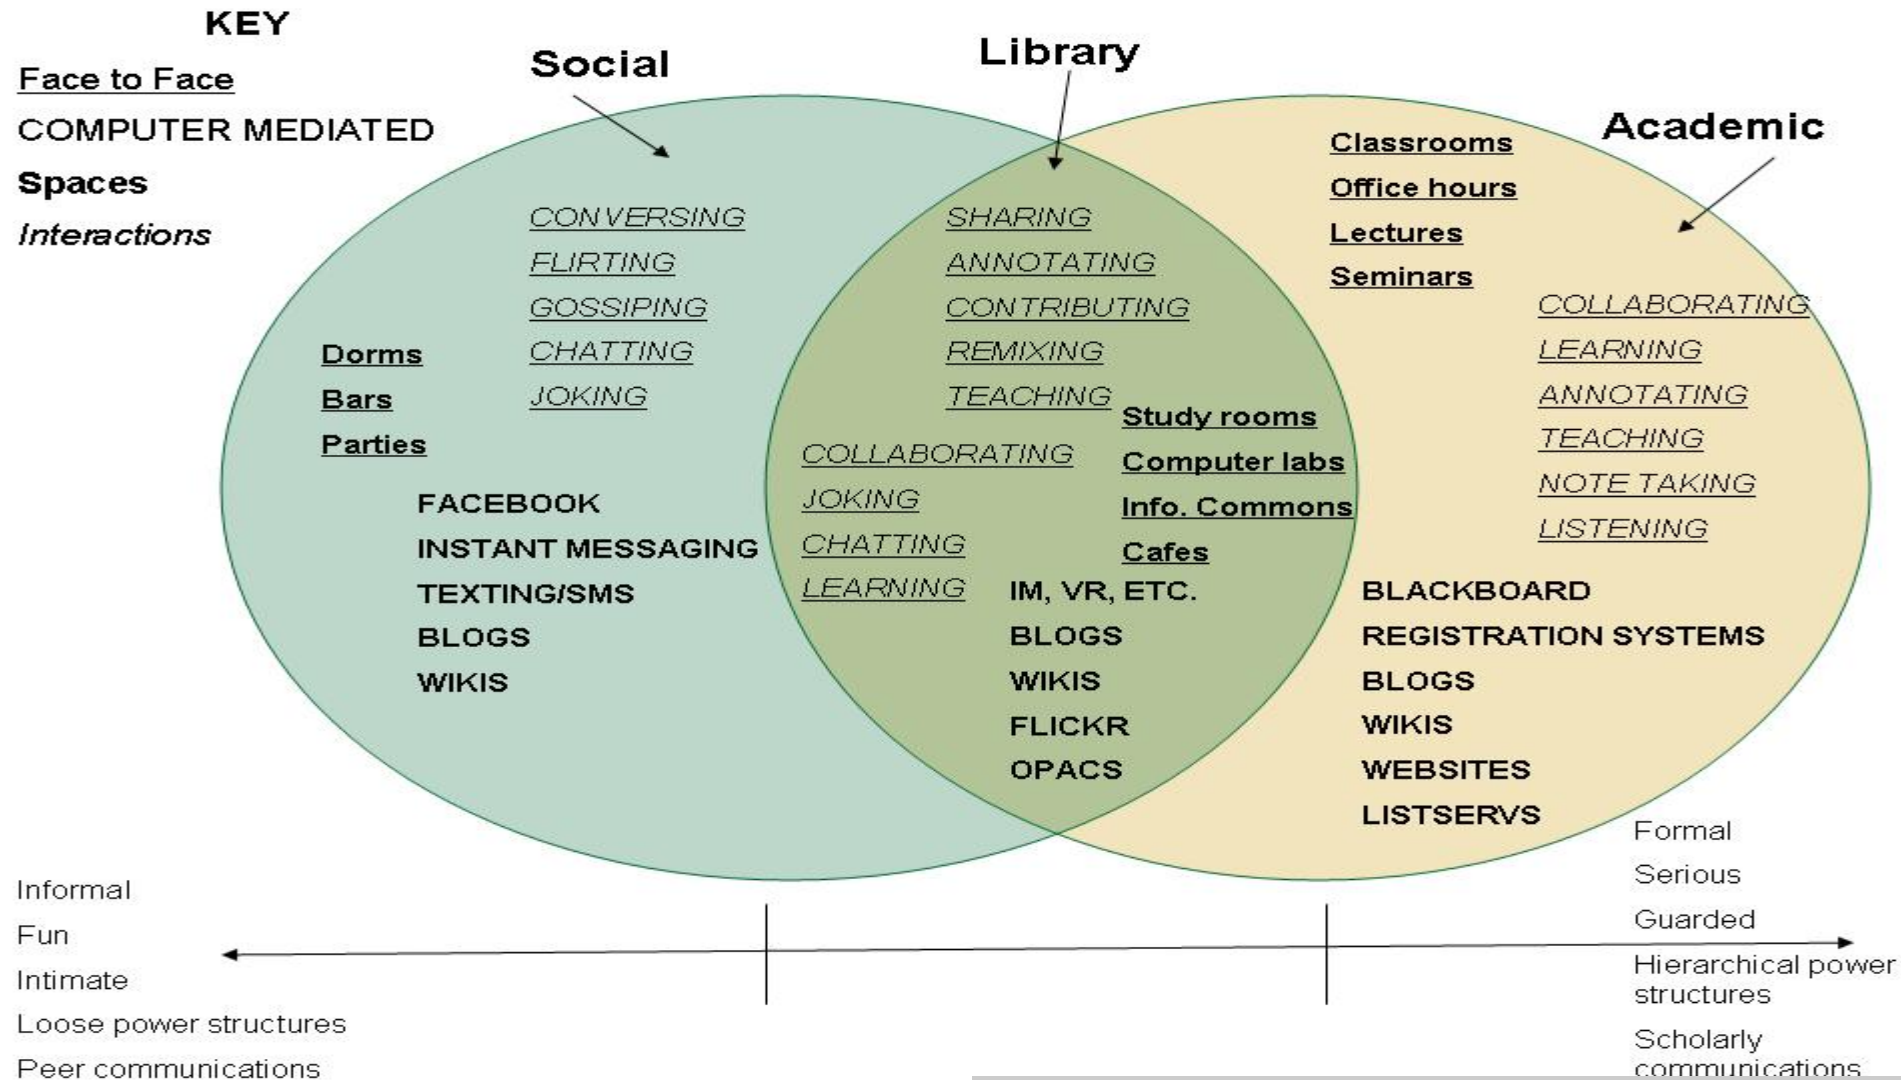

- **Modernized form of library service that reflects a transition within the library world in the way that services are delivered to users.**
- Includes online services such as the use of OPAC systems and an increased flow of information from the user back to the library.
- Library 2.0 also attempts to harness the library user in the design and implementation of library services by encouraging feedback and participation.
- The Library 2.0 model for service will replace traditional, one-directional service offerings that have characterized libraries for centuries.

Source: http://en.wikipedia.org/wiki/Library_2.0

LIBRARY 2.0 MEME MAP

Source: <http://www.flickr.com/photos/42538191@N00/113222147/>

- Diffusion
- Concentration

- covers a range of tools and techniques which create richer connectivity between people, applications and data;
- support writers as well as readers;
- provide richer presentation environments.
- blogs and wikis; RSS; social networking; crowdsourcing of content; websites made programmable through web services and simple APIs; simple service composition environments; Ajax, flex, silverlight; and so on.
- Much of the library discussion of Web 2.0 is about 'diffusion', about a set of techniques for richer interaction. It is appropriate that libraries should offer an experience that is continuous with how people experience the web.

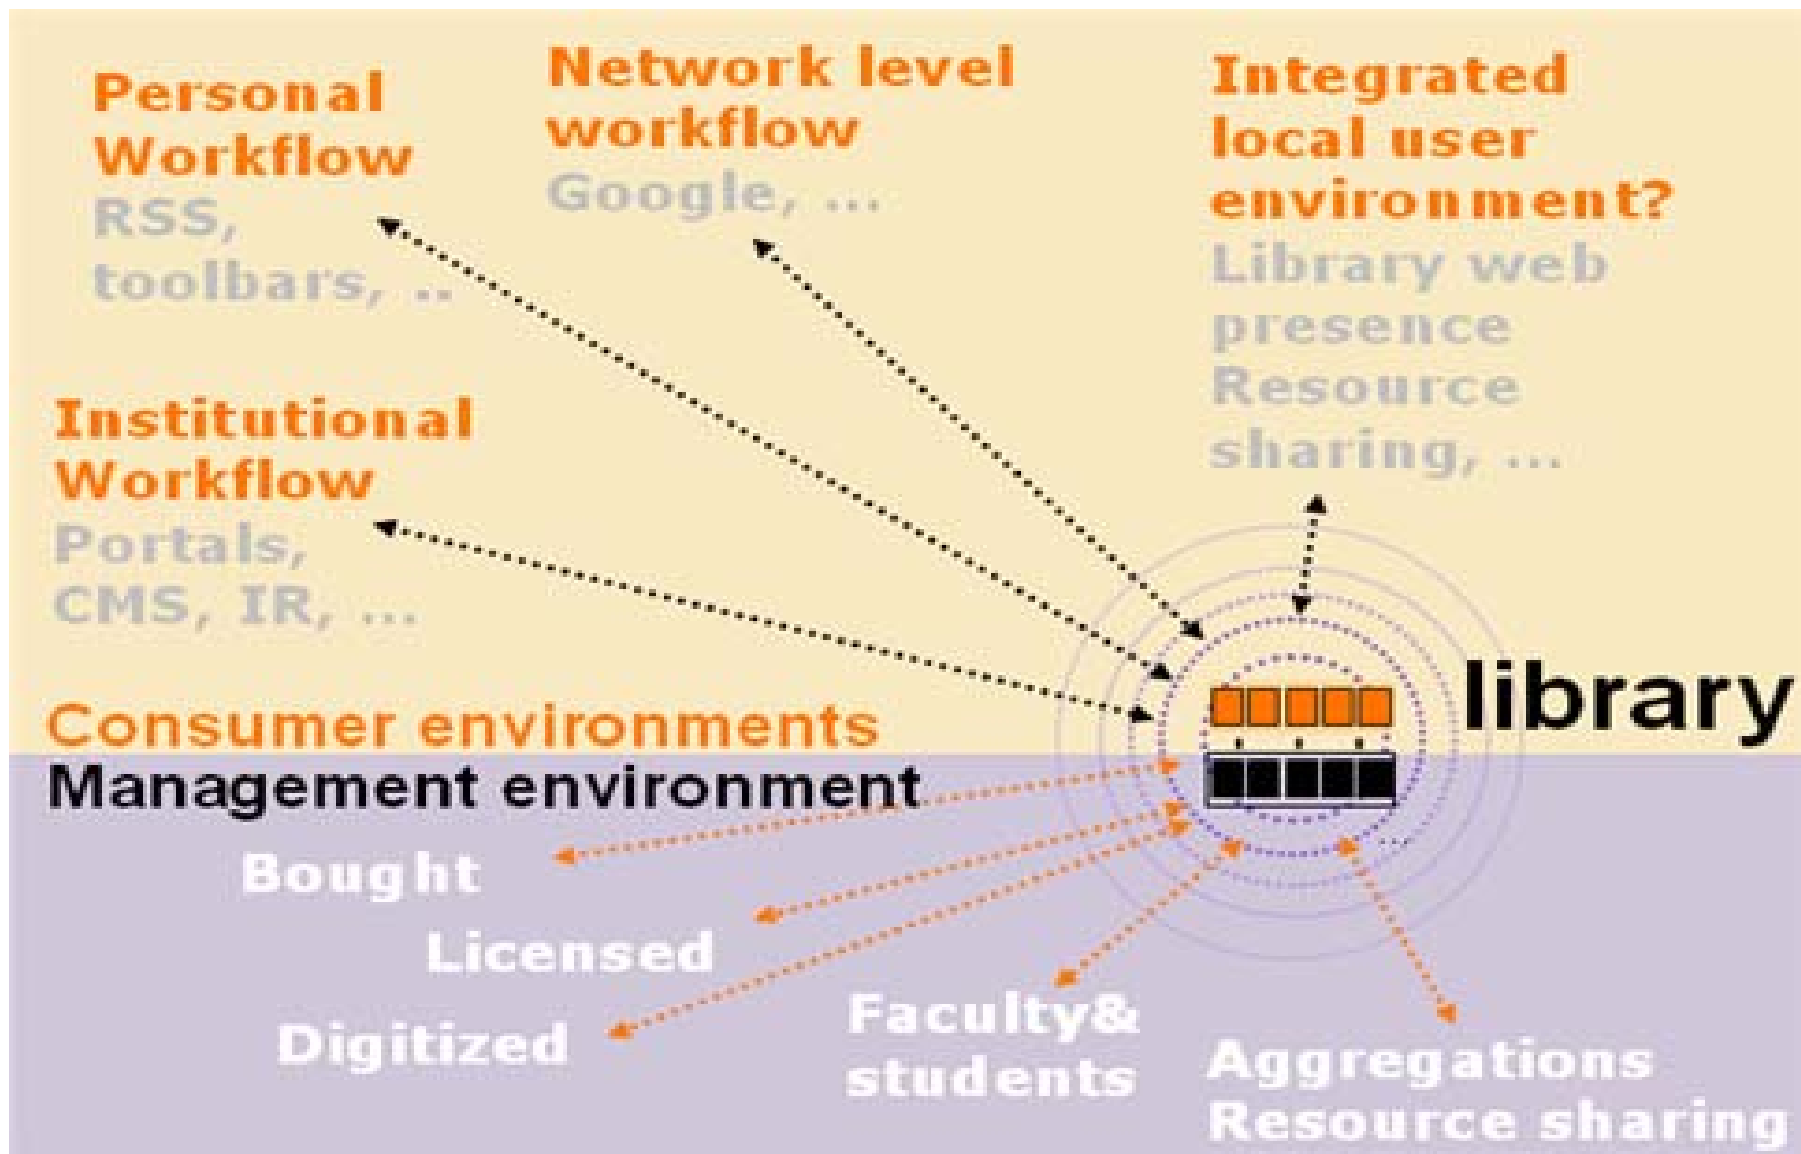

Source: <http://orweblog.oclc.org/archives/001556.html>

- Involves major gravitational hubs (google, amazon, flickr, facebook, propertyfinder.com).
- Concentrates data, users (as providers and consumers), and communications and computational capacity.
- They build value by collaboratively sourcing the creation of powerful data assets with their users.
- The value grows with the reinforcing property of network effects: the more people who participate, the more valuable they become. And opening up these platforms through web services creates more network effects.
- These sites also mobilize usage data to reflexively adapt their services, to better target particular users or to identify design directions.

Source: <http://orweblog.oclc.org/archives/001556.html>

- Places where data needs to be concentrated to create value: aggregating user data across sites (e.g. counter data), or aggregating user created data (tags, reviews), or aggregating transactions (e.g. circulations, resolver clickthroughs).
- Motivations here are to drive business intelligence which allows services to be refined (e.g. how does my database usage compare to that of my peer group), to develop targeted services (people who like this, also liked that), to improve local services (e.g. add tags or reviews).
- These are examples where scale matters, where data may need to be concentrated above the individual library level.

PictureAustralia and the flickr Effect

PictureAustralia has expanded though an exciting partnership between the National Library of Australia and Yahoo!7's *flickr*.

Titled *Click and Flick*, the initiative enables individuals to contribute their images to PictureAustralia (www.pictureaustralia.org) through Yahoo!7's *flickr*, an online image repository where over two million users can store

Overview

Author Florian, Douglas.
Title Bow wow meow meow : it's rhyming cats and dogs / poems and pa
Publisher San Diego : Harcourt, 2003.
Rating 
Amazon Editorial: Douglas Florian (*Insectlopedia*, *The Mammalabilia*) is at it again. The 21 poems and *Meow*, will tickle young dog and cat lovers—and just about everyone else, too. Florian's painting of a pos
 bow, accompanies a four-line concrete poem cleverly typeset in swirls on the opposite page:
 Poodies have oodles and oodles of curls,
 Which makes poodie boys look like poodie girls.
 The curls may have whirls, while the whirls may have swirls.
 Poodies have oodles and oodles of curls.
 Florian has fun with bulldogs, pointers, Siamese, and Manx, but he doesn't limit himself to domestic bree
 have lots of spots poodles oodles are also featured. All the paintings have wonderful juvenile appeal—r
 leopard painting, in particular, is worth the price of the book. In fact, you may need two copies: one for
 ages) —Jennifer Lindsay

Library of Congress Subject Headings API

Summary Mashups How-To Comments

Overview

Summary	Access to the Library of Congress Subject Headings
Category	Reference
Tags	books reference government rdf
Date Reviewed	2008-04-06
Description	This is an experimental service that makes the Library of Congress Subject Headings available as linked-data using the SKOS vocabulary. The goal of lcsh.info is to encourage experimentation and use of LCSH on the web with the hopes of informing a similar effort at the Library of Congress to make a continually updated version available.

The screenshot shows a Windows Internet Explorer browser window. The title bar reads "LCSH: World Wide Web - Windows Internet Explorer". The address bar shows the URL "http://lcsch.info/sh95000541". The menu bar includes "File", "Edit", "View", "Favorites", "Tools", and "Help". The toolbar contains icons for back, forward, home, stop, and search, along with a "Google" search box. The main content area has a yellow background and displays the following information:

World Wide Web

Use For: W3 (World Wide Web), WWW (World Wide Web), Web (World Wide Web), World Wide Web (Information retrieval system),

Broader Terms: [Hypertext systems](#), [Multimedia systems](#),

Narrower Terms: [Semantic Web](#), [WebDAV \(Standard\)](#), [WebTV \(Trademark\)](#),

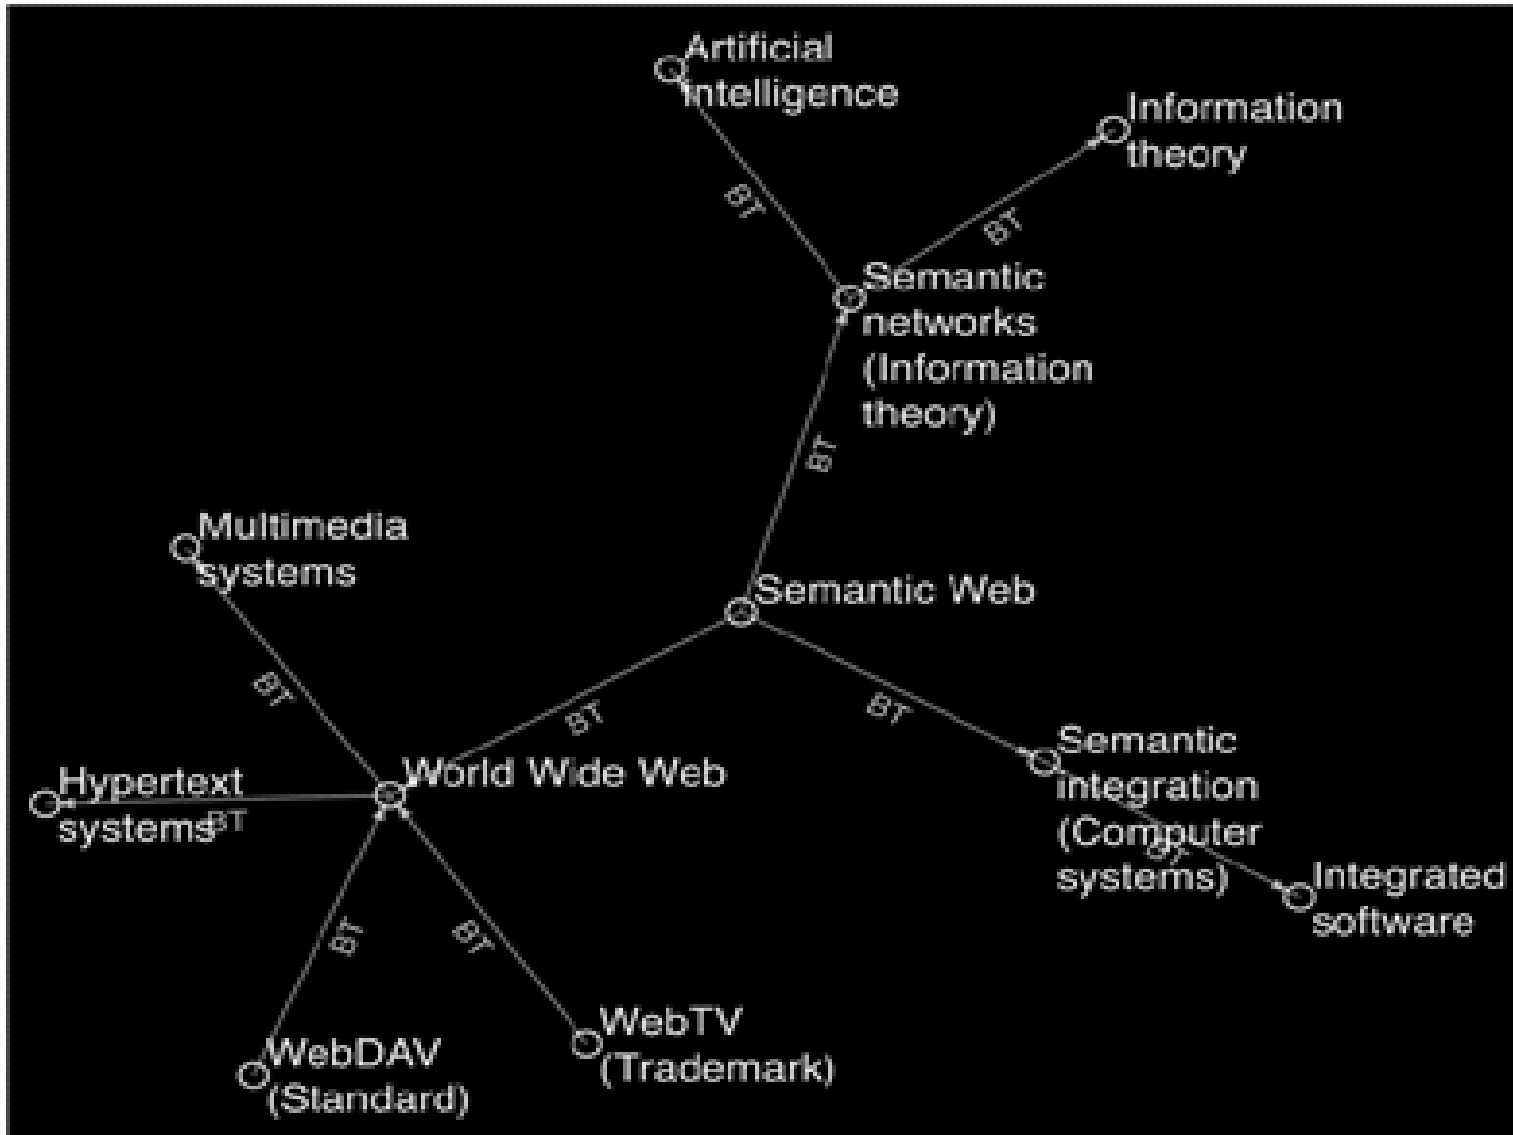

Related Terms: [Internet](#),

Editorial Notes:

- 94234135: Brown, S. The Internet via Mosaic and World Wide Web, c1994 (WWW, the Web) p. 35 (Although the WWW is primarily used on a global scale as a part of the Internet, it is feasible for a two-machine network to run the WWW client/server software)
- ASTI; Engr. index; Web. 3
- Internet publishing handbook, c1995: p. 15 (World-Wide Web system is known by its various names: WWW, W3, and Web)
- MAGS, Dec. 8, 1995: article by Robert M. Metcalfe (first generation of WWW based on

The bottom of the browser window shows the status bar with "Done", "Internet | Protected Mode: On", and a zoom level of "100%". The Windows taskbar at the very bottom displays the Start button and several open applications, including "2 W...", "Wi...", "7 M...", "3 A...", "Fil...", "2 M...", "6 L...", and "bb...". The system clock shows "06:57".

LCSH and PRECIS in library and information science : a comparative study by Yasar Ahmet Tonta (Book)

1 edition published in 1992 in English and held by 104 libraries worldwide

Compares the performance of LCSH and PRECIS for the books published in 1987 in the field of library and information science in order to investigate the strengths and weaknesses of each system.

An analysis of search failures in online library catalogs by Yasar Ahmet Tonta (Book)

4 editions published in 1992 in English and held by 12 libraries worldwide

Türkçe arama motorlarında performans değerlendirme by Yaşar Tonta (Book)

2 editions published in 2002 in Turkish and held by 3 libraries worldwide

Bilgi edinme özgürlüğü (Book)

1 edition published in 1996 in Turkish and held by 2 libraries worldwide

Internet and Electronic Information Management (Book)

2 editions published between 2003 and 2004 in English and held by 1 library worldwide

The number of information sources accessible through the Internet are ever increasing. Billions of documents including text, pictures, sound, and video are readily available for both scholarly and every-day uses. Even libraries and information centers with sizable budgets are having difficulties in coping with this increase. More developed tools and methods are needed to find, filter, organize and summarize electronic information sources. This paper is an overview of a wide variety of electronic information management issues ranging from infrastructure to the integration of information technology and content, from personalization of information services to "disintermediation." It discusses the issues of description, organization, collection management, preservation and archiving of electronic information and outlines Davenport's "ecological model" for information management and its components, namely, strategy, politics, behavior and culture, staff processes, and architecture.

Electronic information management = La gestion électronique de l'information (Book)

1 edition published in 2003 in English and held by 1 library worldwide
