Linking document repositories, directories and registries using RDF

Josep-Manuel Rodríguez-Gairín – University of Barcelona, Antonia Ferrer-Sapena – Polytechnic University of Valencia, Tomás Baiget – El Profesional de la Información
Antonella De Robbio – University of Padova, Giannis Tsakonas – University of Patras, Diane Le Hénaff – INRA, Julio Santillán – National Library,
Fernanda Peset – Polytechnic University of Valencia, Imma Subirats-Coll – FAO of the United Nations imma.subirats@fao.org

We have three linked products...
E-LIS: 2003 - Subject Repository http://eprints.rclis.org
IRALIS: 2007 - Authority control http://iralis.org

...specialized in Library and Information Science...
EXIT (ca. 2500 records)
E-LIS (ca. 12000 records)
IRALIS (ca. 2500 records)

...that identify a community
Libraries, archives, museums, web portals, information services, scientific editors, repositories managers...
interlinked by:
Distribution lists, social web, conferences...

Ready for more!
Offering the LIS community new services through the Semantic Web

We need:
• RDF & description microformats
• HTTP URIs
• Linked URIs

We have:
• RDF and FOAF in IRALIS
• HTTP URIs

We are ready to interlink our products and external ones

With the support of CIEPI and the Spanish Ministry of Culture:

June 6, 2011 – June 11, 2011
