Your score is 2/5.
Information literacy and higher education

You may like to watch videos to grasp the meaning of Information Literacy

The information literate person can:

Information

The following three video clips where the first one will give a nutshell view on Information Literacy, second one describe Basic Information Literacy, and the third one will help to understanding Information Literacy through the Lens of the Student Experience (for big screen you may like to watch the videos in youtube directly)
MICHELANGELO
1475 - 1564
Italian, Florentine
A painter, on panel and in fresco, a sculptor, architect and poet, Michelangelo Buonarroti was the first artist recognized by contemporaries as a genius.

Writing Sample
Michelangelo was a famous painter born in 1475.

Does this writing sample use sources correctly?

What is eXe learning?

eLearning XHTML editor
Authorititng tool
Learning Object production
Incorporated in different e-learning platforms

What can I do with it?

Design, development and
Publishing of web-based learning

Ah! It seems web-publishing? Complicated!

Yes! But!
No need of proficiency in HTML or
Complicated web-publishing applications
Then, what are the pre-requisites to work with exe learning?

Let’s see how much tech savvy you are?

Person A: If I **install Windows 7** of 32 bit **two times**, then will it become 64 bit?

Person B: Yes......... but It will also become **Windows 14**.

Person C: Understand the situation and leave the place silently.

Do you have proficiency in **MS-Word?**
**Internet Browsing?**
Anyway, It does not seem to be library software? Why should I use it?
To create eLearning contents for the users

<table>
<thead>
<tr>
<th>Library instruction</th>
<th>Reference management</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information literacy</td>
<td>Plagiarism avoiding</td>
</tr>
<tr>
<td>E-resource discovery</td>
<td>Predatory journals, etc</td>
</tr>
</tbody>
</table>

These seem to be a teaching work, I am sorry! These are not included in my job responsibility!

Librarians are teacher of teachers.

Budd, J (1982). Librarians are teachers. Library journals 107 (18), 1944-46
Why should I create Content for library users?

Effective communication
Ready solution
Attract non-users
Own time management
Modification and update

Less time consuming
Self Learning
Users practice
Update Knowledge
Anytime-Anywhere

Yeah! I understand, but this is not my job, it suits better to IT professionals!

Own idea, Own way
Creative thinking and design
Plan, design, publish and use
Non-availability of IT professionals
“Librarians: Working for you since 2600 B.C.”

Miguel Correia, Librarian @ ISCAL, Portugal
OK, I understand, but I do not have time!

nobody is too busy, it's just a matter of priorities.
Key features

- **WYSIWYG** *(What You See Is What You Get)*
- **Open Source**
- **USB**
- **SCORM** *(Sharable Content Object Reference Model)*
- **Windows**
- **Mac, Linux**
Content Enrichment
Content Enrichment with Web resources
Contents Distribution
How authentic is the software?

eXe grew out of the New Zealand Government Tertiary Education Commission's eCollaboration Fund

http://exelearning.net/?lang=en

led by the University of Auckland, The Auckland University of Technology, and Tairawhiti Polytechnic.
Who are the people behind it?

It was later supported by CORE Education, a New Zealand-based not-for-profit educational research and development organization.

It has also been greatly assisted by a global group of participants and contributors:
Why should I use this Open source software, not a proprietary software?
