#### Questions?

For questions about theses, please contact (as appropriate):

- Your Thesis Advisor
- Your Graduate Program Coordinator
- [David Micus](#), Registrar

Questions about archiving:

- [Mohamed Ba-essa](#), University Library

Questions about formatting:

- Consult the KAUST *Thesis and Dissertation Guidelines*.
- If you do not find the answer there, check with your Graduate Program Coordinator.

#### Background

The Doctoral and Masters with thesis degrees are conferred by KAUST in recognition of high scholarly achievement, including the completion of approved courses of study, examinations, and the submission of a dissertation or thesis. Moreover, candidates pursue original work in a dissertation or thesis, and for some programs, defend it in an oral examination by the faculty.

The information provided on this University Library website will help candidates to fulfill the requirements of the university.

The dissertation or thesis must be prepared in accordance with the instructions given in KAUST's *Thesis and Dissertation Guidelines* document. Rewriting and changes will be necessary if the specifications are not met. The degree will not be officially awarded until the dissertation or thesis is presented in satisfactory form, approved by the offices of the Provost and Associate Provost of Graduate Affairs, and deposited in the [digital archive](#) maintained by the University Library.

#### Archiving Requirement

**KAUST requires that your master's thesis or doctoral dissertation be deposited in the KAUST Digital Archive.** Your Graduate Program Coordinator (GPC) will provide your thesis or dissertation to the University Library for this purpose after it has been approved by your committee.

**As soon as your thesis or dissertation is approved, give the following documents to your GPC:**

1. PDF of your final, approved thesis or dissertation.
  - The PDF must be created from your word processing file, not from a scan of the printed document.
  - Disable any security settings.
  - If possible, keep the size of the PDF under 5MB to facilitate crawling by Google and other search engines.

#### Preparing Your Thesis or Dissertation

### Thesis and Dissertation Guidelines

Download the current edition of the KAUST *Thesis and Dissertation Guidelines* by clicking the link below.

This guide has been prepared by KAUST Graduate Affairs to assist students in the preparation of theses or dissertations. The requirements in this guide apply to all theses or dissertations to facilitate their preparation and distribution, and to assure preservation of the archival copy. Individual divisions may dictate more specific requirements.

The thesis or dissertation must be prepared in accordance with the instructions given here and must be complete. Rewriting and changes will be necessary if the specifications are not met. The degree will not be officially awarded until the thesis or dissertation is presented and deemed to be satisfactory by the examination committee. approved by the offices of the Provost and Associate

#### Formatting Your Citations

Various citation styles are available. Your faculty thesis or dissertation advisor will determine the appropriate style for your work.

If you are using MS Word, the [EndNote](#) citation management software (available free to

## Point 13

The Graduate program Coordinator GPC archives the following documents with the library on the student's behalf.

- The final version of the thesis/dissertation.
- The Thesis/Dissertation Copyright and Availability Form.
- The signed Committee Approvals page.

King Abdullah University of Science and Technology  
Thesis/Dissertation Copyright and Availability Form

Student Name: Farhan Abdul Ghaffar  
Degree: M.S Electrical Engineering  
Date of Graduation (Month/Year): 12/2010

**Copyright**

- I hereby certify that, if appropriate, I have obtained and attached hereto a written permission statement from the owner(s) of each third-party copyrighted matter to be included in my thesis, dissertation, or record of study, allowing distribution as specified below.
- I certify that the version I submitted is the same as that approved by my advisory committee.
- I hereby grant to King Abdullah University of Science & Technology or its agents the non-exclusive license to archive and make accessible, under the conditions specified below, my thesis or dissertation in all forms of media, now or hereafter known.
- I retain all other ownership rights to the copyright of the thesis or dissertation. I also retain the right to use in future works (such as articles or books) all or part of this thesis, dissertation, or record of study.

**Availability option (check one)**

- Release the work immediately for **worldwide access on the Internet.**
- Hold the work for one year, then release it for **worldwide access on the Internet.**  
(This option should be selected only if you need to secure the work temporarily for patent and/or other proprietary purposes.)

Student signature/date: Farhan · 14/12/2010

The thesis of Farhan Abdul Ghaffar is approved.

#### KAUST Dissertation and Thesis Archiving Policy

As a condition of matriculation, KAUST requires that doctoral students submit an electronic copy of their dissertation to the KAUST Library for inclusion in the KAUST digital archive. Similarly, masters students whose program requires a thesis must deposit it in the KAUST digital archive.

KAUST makes no claim of ownership of student dissertations or theses; however, the university retains a non-exclusive license to make copies of dissertations or theses as needed for the academic or archival purposes of the institution. This includes providing open access to the work on the Internet. If necessary to protect legitimate proprietary interests (such as patent rights), students may opt to delay temporarily the public display of their dissertation or thesis.

Details

Author AbdulGhaffar, Farhan

Subject Low Temperature Co-fired Ceramic Antenna

Abstract The thesis presents a Sierpinski Carpet fractal antenna array designed at 24 GHz for automotive radar applications. Miniaturized, high performance and low cost antennas are required for this application. To meet these specifications a fractal array has been designed for the first time on Low Temperature Co-fired Ceramic (LTCC) based substrate. LTCC provides a suitable platform for the development of these antennas due to its properties of vertical stack up and embedded passives. The complete antenna concept involves integration of this fractal antenna array with a Fresnel lens antenna providing a total gain of 15dB which is appropriate for medium range radar applications. The thesis also presents a comparison between the designed fractal antenna and a conventional patch antenna outlining the advantages of fractal antenna over the later one. The fractal antenna has a bandwidth of 1.8 GHz which is 7.5% of the centre frequency (24GHz) as compared to 1.9% of the conventional patch antenna. Furthermore the fractal design exhibits a size reduction of 53% as compared to the patch antenna. In the end a sensitivity analysis is carried out for the fractal antenna design depicting the robustness of the proposed design against the typical LTCC fabrication tolerances.

Welcome Moh

submission below. [\(More Help...\)](#)

, First name Middle initial (e.g., Baessa, Mohamed A.).

# Lessons Learned

- Policy should be in place
- Tools support Policy implementation
- Use the Metadata to describe and manage items
- Continues improvement of the processes
- Work closely with faculty and student

ETD 2014 Symposium

# Thank You
