AHRQ

World Health Organization

Founding Reasons.

- ❖ Make traditional resources more visible
- ❖ Provide key characteristics of resources
- ❖ Encourage human assessment of these resources by applicability to semantic projects
- ❖ Promote information exchange and knowledge sharing

Hlava, Marjorie: Developing an eclectic terminology registry, 2011.

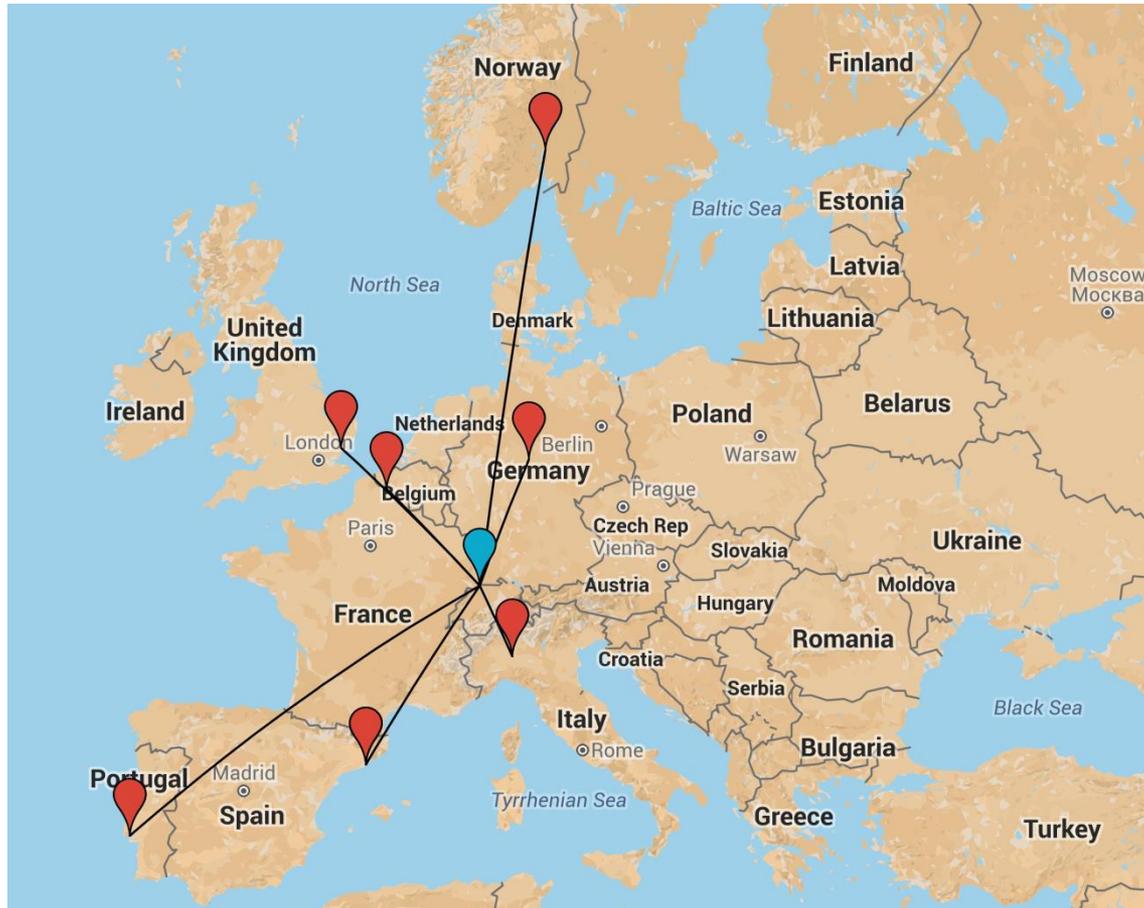

- ❖ Any kind of KOS
- ❖ Any subject area
- ❖ Any language
- ❖ Any publication format
- ❖ Any form of accessibility

Unique Selling Points.

- ❖ Wide approach
- ❖ Maintenance by community
- ❖ Approved by the International Society for Knowledge Organization (ISKO)
- ❖ “(...); it is the system’s advantage that it specializes in supplementing Dewey’s decimal classification terms (up to the third hierarchic level) (...), as well as providing the multilingual EUROVOC thesaurus descriptors.”

Bratková et al.: Knowledge Organization Systems and Their Typology, 2014.

 Inter-Active Terminology for Europe

Inter-Active Terminology for Europe

Abstract:

"In IATE you can find EU-specific terminology and jargon, as well as terms from all sorts of areas, such as law, agriculture, information technology and many others. IATE has 8.4 million terms, including approximately 540 000 abbreviations and 130 000 phrases, and covers all 23 official EU languages. New terms are added every day and the contents are constantly updated. IATE plays a major role in ensuring the quality of the written communication of the EU institutions and bodies."

Alternative Title: IATE

Size: 8.4 million terms, including approximately 540 000 abbreviations and 130 000 phrases (2016-06)

Project coli-conc

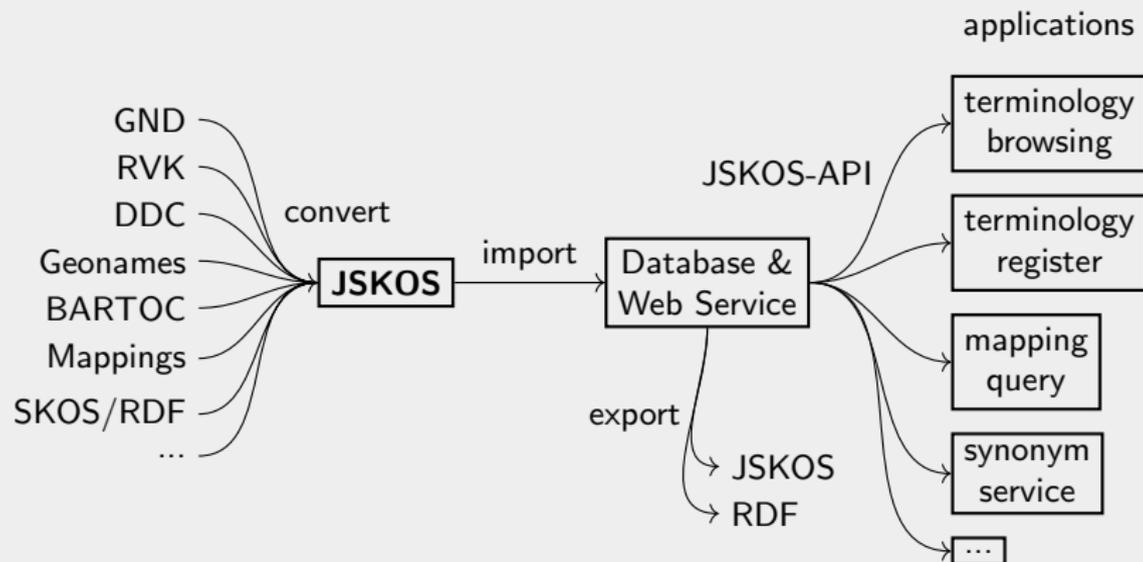

Aim

Semi-automatic creation of mappings between library knowledge organisation systems

Classification systems in German speaking regions	
Universal Classification Systems	No. of classes
UDC (Universal Decimal Classification)	ca. 65.000 classes (English version)
DDC (Dewey Decimal Classification)	over 44.000 classes with 10 main classes
RVK (Regensburg Classification)	850.000 classes with 33 main classes
BC (Basic Classification)	2100 classes with 89 main classes
LCC (Library of Congress Classification)	21 main classes
Subject classification	No. of classes
DDC-Sachgruppen der DNB	10 main classes with 94 subclasses
MSC (Mathematics Subject Classification)	87 main classes
PACS (Physics and Astronomy Classification Scheme)	10 main classes
FKDigBib (Subject classification for digital library)	10 main classes
KFM (Classification for music library)	ca. 800 classes
Subject Classification at the Universities	No. of classes
TUM-classification (Science and technology classification of the TU Munic)	52 classes each with 999 notations
Subject classification of the University library Duesseldorf	45 classes
Bremer classification of the State and University library Bremen	ca. 57 main classes
GOK (Goettingen Online Classification)	ca. 33 main classes
Standard-Thesaurus Wirtschaft von der ZWB	6.000 Terms and notations
Subject classification University library Trier	36 main classes
Technical University Dortmund	28 main classes
University library Paderborn	26 main classes
University library Marburg	35 main classes
University library Bonn	24 main classes
University library Heidelberg	22 main classes
Subject classification and nomenclature of individual languages Library of the Institute of General Linguistics at the Uni Münster	23 main classes
Subject Classification at the public libraries	No. of classes
SEB (Scheme for protestant libraries)	
SKB-E (Scheme for catholic public libraries)	
KFKJ (Scheme for children and youth libraries)	Less than 1.000 classes
ASB (General classification for public libraries)	ca. 2.200 classes with 23 main classes
ÖSÖB (Austrian classification for public libraries)	
SfB (Classification for libraries)	ca 14.400 classes with 30 main classes
KAB (Classification for general libraries)	ca. 2.700 classes
SSD (Classification of the city library Duisburg)	
ESSB (Single classification for South Tyrolean)	16 main classes

System overview

JSKOS data format

Requirement: uniform access to KOS data

- ▶ based on RDF (SKOS & Dublin Core)
... but more restrictive (unification)
- ▶ based on JSON-LD
... extended by language ranges and closed world statements

main goal: **easy use of KOS data in web applications**

Specified at <https://gbv.github.io/jskos/>

JSKOS beyond JSON-LD: closed world statements

narrower concepts may exist (open world assumption)

- ▶ { }

∃: narrower concepts exist (but not included here)

- ▶ { "narrower": [null] }

∄: no narrower concepts exist

- ▶ { "narrower": [] }

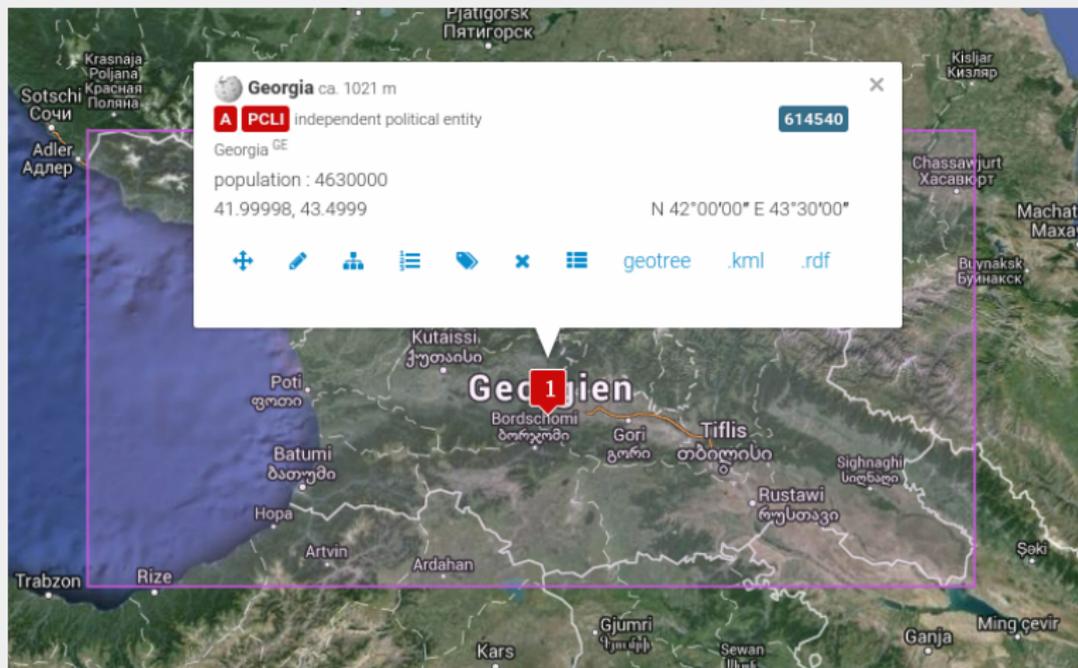

language ranges state that more labels in other languages exist

- ▶ { "en": "english label", "-": "..." }

JSKOS beyond SKOS: data and object types

data types	object types
URI	Concept
URL	Concept Type
date	Concept Scheme
list	Registry
set	Concordance
language range	Concept Mapping
language map	Concept Bundle

Concept example from GeoNames

<http://sws.geonames.org/614540/>

JSKOS concept example from GeoNames (abbreviated)

```
{
  "type": ["http://www.w3.org/2004/02/skos/core#Concept"],
  "uri": "http://sws.geonames.org/614540/",

Multilingual Thesaurus of the European Union

View

Voting results

Abstract:

"EuroVoc is a multilingual thesaurus which was originally built up specifically for processing the documentary information of the EU institutions.

It is a multi-disciplinary thesaurus covering fields which are sufficiently wide-ranging to encompass both Community and national points of view, with a certain emphasis on parliamentary activities. EuroVoc is a controlled set of vocabulary which can be used outside the EU institutions, particularly by parliaments.

The aim of the thesaurus is to provide the information management and dissemination services with a coherent indexing tool for the effective management of their documentary resources and to enable users to carry out documentary searches using controlled vocabulary.

The EuroVoc ontology is an extension of SKOS (Simple Knowledge Organization System) - W3C recommendation, including appendix B, SKOS eXtension for Labels (SKOS-XL)."

Example: Dewey Decimal Classification (DCC)

DDC in BARTOC (<http://bartoc.org/en/node/241>) → concept scheme

```
{  
  "type": ["http://www.w3.org/2004/02/skos/core#ConceptScheme"],  
  "uri": "http://bartoc.org/en/node/241",  
  "prefLabel": { "en": "Dewey Decimal Classification" }  
}
```

DDC in MARCXML (MARC 21 format for classification data) → concepts

```
{  
  "type": ["http://www.w3.org/2004/02/skos/core#Concept"],  
  "uri": "http://dewey.info/class/612.112",  
  "prefLabel": { "en": "leucocytes" },  
  "notation": [ "612.112" ],  
  "inScheme": [ { "uri": "http://bartoc.org/en/node/241" } ]  
}
```

JSKOS mapping example

```
{
  "creator": { "notation": [ "VZG" ] },
  "mappingMethod": "...",
  "fromScheme": {
    "uri": "http://bartoc.org/en/node/241",
    "notation": [ "DDC" ]
  },
  "from": { "members" : [
    { "uri": "http://dewey.info/class/612.112" }
  ] },
  "toScheme" : {
    "uri": "http://bartoc.org/en/node/533",
    "notation": [ "RVK" ]
  },
  "to": { "members" : [
    { "uri": "http://uri.gbv.de/terminology/rvk/WW8844" }
  ] }
}
```

Other possible applications

- ▶ semantic tagging of documents with identified concepts:
<http://sws.geonames.org/614540/> ⇒ “Georgia”
- ▶ statistical analysis of terminologies:
compare size, hierachy, density of links. . .
- ▶ enrichment of concepts from multiple KOS
- ▶ ...

foster the visibility, availability and usefulness of KOS in general

Thanks! Questions?
