Dedication

In memory of Paul Evan Peters (1947-1996), founding Executive Director of the Coalition for Networked Information, whose visionary leadership at the dawn of the Internet era fostered the development of scholarly electronic publishing.

Preface

The *Scholarly Electronic Publishing Bibliography (SEPB)* presents selected English-language articles, books, and other printed and electronic sources that are useful in understanding scholarly electronic publishing efforts on the Internet. Most sources have been published from 1990 through 2008; however, a limited number of key sources published prior to 1990 are also included. Where possible, links are provided to works that are freely available on the Internet, including e-prints in disciplinary archives and institutional repositories. Note that e-prints and published articles may not be identical.

Announcements for new versions of the bibliography are distributed on *DigitalKoans* (<http://www.digital-scholarship.org/digitalkoans/>; RSS feed: <http://feeds2.feedburner.com/DigitalKoans>).

An article about the development and utilization of the bibliography is available:

Bailey, Charles W., Jr. "Evolution of an Electronic Book: The *Scholarly Electronic Publishing Bibliography*." *The Journal of Electronic Publishing* 7, no. 2 (2001).
<http://hdl.handle.net/2027/spo.3336451.0007.201>

The *Open Access Bibliography: Liberating Scholarly Literature with E-Prints and Open Access Journals* (<http://www.digital-scholarship.org/oab/oab.htm>), by the same author, provides much more in-depth coverage of the open access movement and related topics (e.g., disciplinary archives, e-prints, institutional repositories, open access journals, and the Open Archives Initiative) than *SEPB* does.

Scholarly Electronic Publishing Bibliography

"SEP [Scholarly Electronic Publishing Bibliography] is compiled with utter professionalism. It reminds me of the work of the best artisans who know not only every item that leaves their workshops, but each component used to create them—providing the ideal quality control. . . . The selection of items is impeccable. I have yet to find journal articles irrelevant to the scope of the bibliography. SEP could be used as a benchmark in evaluating abstracting/indexing databases that proudly claim to have coverage of electronic publishing, but do not come close to SEP!" Jacsó, Péter. "Peter's Picks & Pans." *ONLINE* 27, no. 3 (2003): 73-76.
