Social sciences and humanities open books metadata in Latin America – the case of CLACSO (Latin American Council of Social Sciences)

Webinar: Open Book Metadata

February 10, 2021 by Bernie Folan

Register now

We are pleased to announce the next OASPA webinar which will explore the question of open metadata with regard to books. What are the relations, challenges, and opportunities of thinking and developing open book metadata and open access in terms of labor, quality, persistence, standardization, accessibility, and discoverability?

Latin American context for academic open access books

- Research and research communications are mainly publicly-funded, no outsourcing to commercial publishers
- Strong tradition of university presses
- Growing adoption of open access for academic books
- Open access legislation and policies: require research publications in repositories
- Academic books in repositories use Dublin Core open metadata
- Academic books lack visibility in research assessment procedures

CLACSO-Latin American Council of Social Sciences

CLACSO catalog with

- 3.200 open access books published by CLACSO's network.
- Books are displayed and promoted in CLACSO's bookstore catalog with link to the full-text and open **Dublin Core metadata** in CLACSO's interoperable repository OAI-PMH. Sales: print on demand.

Colección Histórica

La cruel pedagogía del virus

Boaventura de Sousa Santos, [Autor]

ISBN 978-987-722-599-0 CLACSO. Buenos Aires. Mayo de 2020

*Disponible sólo en versión digital

La irrupción de la pandemia en la vida cotidiana puso en crisis una "normalidad". Frente a ello, el sociólogo Boaventura de Sousa Santos expone un conjunto de preguntas inquietantes: ¿Qué conocimiento potencial proviene de la pandemia de coronavirus? ¿Carecen las democracias de la capacidad política para responder a emergencias? ¿Qué significa la cuarentena para los trabajadores que ganan cada día lo que necesitan para vivir ese día?

La biblioteca masa crítica pone a disposición de las y los lectores un conjunto de textos esenciales para interpretar las nervaduras del presente y desplegar las capacidades colectivas para transformarlo.

Editorial team repository team: teamworking since 2002

Editiorial team

- Editorial processes
- Books announced in editorial catalog and social networks with link to full-text in repository
- Announcement in social networks (IG, TW, FB) with short video

Repository team

- Uploads pdf and html versión of full-text book in the repository
- Creates the metadata for each book (metadata format: Dublin Core)
- Communicating trends and good practices to editorial and repository teams in CLACSO's network

Repository harvested by

- Search engines
- academic aggregators (eg.: BASE, CORE, Scholar Google, among others)
- Using OAI-PMH Open Access Initiative Protocol for Metadata Harvesting to allow interoperability

a few of the challenges for CLACSO's editorial processes

- New requirements for OA academic books and open procedures need advanced training for staff, more budget, participating in international projects
- Academic books lack visibility in research assessment procedures
 - ➤ Promote review of research assessment procedures to provide due recognition to books (issue included in CLACSO's Latin American Forum on Research Evaluation agenda www.clacso.org/folec/
 - ➤ Working on visible description of peer-review process in books/chapters
- Increase agreements for English translations of full-text and/or metadata contents
- DOI for individual books and collaborative book chapters
- Consolidate books usage data (repository + editorial database + third parties)
- In the agreements with vendors: require they harvest complete metadata from books in CLACSO's open access repository (with Cco?)

Examples of other regional cases of interest in Latin America

- SciELO Books
