## 1. CELLULE MATHDOC : WHO AND WHAT

# Cellule de coordination documentaire nationale pour les mathématiques

Unité mixte de service CNRS – Univ. J. Fourier (Grenoble)

- + Created in 1995
- + An institute for Scientific Information & Communication in Mathematics
- + 3 mathematicians, 2 computer engineers, 2 information managers, 1 assistant

# Cellule de coordination documentaire nationale pour les mathématiques

Unité mixte de service CNRS – Univ. J. Fourier (Grenoble)

- + Created in 1995
- + An institute for Scientific Information & Communication in Mathematics
- + 3 mathematicians, 2 computer engineers, 2 information managers, 1 assistant

## *Some projects and cooperations*

- Union catalogs of mathematical libraries  
*(serials, books, in collaboration with the RNB)*
- Zentralblatt Math (FIZ-Karlsruhe, Springer, EMS)  
*(towards its Europeanization)*
- Thesis and preprints indexes  
*(CCSD cooperation : TEL, HAL)*
- NUMDAM retro-digitization program

http://www.numdam.org/en/ Go Version française

# Digitization of ancient mathematics documents

Last update on 20/12/2002 15:41

**Search and download archives of mathematical journals published in France**

2003/01/04

- Digitized maths resources

**First display (december 2002)**

 Annales de l'institut Fourier (1949-1996)

 Journées Équations aux dérivées partielles (1974-2000)

In order to support french mathematical journals, the **NUMDAM** program has set up free access to bibliographical data and articles of french mathematical journals. For each journal, all the volumes published up to year 2000 have been retro-digitized. The articles themselves are available for online access after a given time (**moving wall**) during which they are reserved for subscribers.

It is possible to [search](#) directly for an article by author name, title words or keywords present in the text.

It is also possible to [browse](#) the tables of contents of all the volumes.

**Journals available in the first phase**

- the *Annales de l'institut Fourier* (search and bibliographical records for 1949-2000 ; downloadable articles until 1996 included)
- the proceedings of *Journées Équations aux dérivées partielles* (search, records and downloadable articles for 1974-2000)

Soon to be followed by :

**THEOREME 5.** — Soient  $p$  et  $q$  deux nombres positifs dont une est un. si  $h : \mathbb{R}^n \rightarrow [-\infty, \infty]$  alors que la mesure dans  $\mathbb{R}^{2n}$  nulle, alors  $h$  est égale presque partout à une fonction concave

## 2. NUMDAM : WHAT AND HOW

### *NUMDAM aims*

## *NUMDAM aims*

- Preserve mathematical cultural (French) heritage and provide its access
- Serve current scientific research (mathematics, history of science, . . .)
- Retro-digitize mathematical documents  
*(journals, proceedings, seminars, . . .)*
- Combine ancient collections and current publishing

## 2. NUMDAM : WHAT AND HOW

### *NUMDAM methods*

## *NUMDAM methods*

- High technical and non proprietary standards  
(*XML, metadata, scanning, . . .*)
- Preservation of authors rights
- Negotiation with editors and publishers  
(*moving wall*)
- Quality Control
- Links to (and from) other mathematical databases  
(*edbm2-hl*)

## 2. NUMDAM : WHAT AND HOW

### NUMDAM I (2000-2003)

## 2. NUMDAM : WHAT AND HOW

# NUMDAM I (2000-2003)

## 2. NUMDAM : WHAT AND HOW

### Intellectual Property rights (A)

## Intellectual Property rights (A)

- Author rights
  - \* Each author will be asked for authorization to display the retro-digitized paper on internet
  - \* Digital rights on every paper will remain property of the owner of each Serial (with usage delegation to NUMDAM)
- Editor and publisher rights
  - \* Gain new (non exclusive) rights on retro-digitized files
  - \* Agree to a *moving wall* : after  $N$  years, digitally published papers are freely accessible on NUMDAM

## 2. NUMDAM : WHAT AND HOW

### Intellectual Property rights (B)

## Intellectual Property rights (B)

- NUMDAM data base
  - \* Metadata, OCR files are property of the NUMDAM program (CNRS)
  - \* Common metadata [OAI] will be freely available through convenient agreements
  - \* Archive in BnF
- NUMDAM access
  - \* Free, under the rules of the *fair use*
  - \* For archiving and file format maintenance, contribution could be asked from libraries

## 2. NUMDAM : WHAT AND HOW

### Reference linking

## Reference linking

- From one paper to its reviews (JFM, ZM, MR)
- From one bibliographical item
  - to the digitized paper (e.g. NUMDAM)
  - to bibliographical databases (JFM, ZM, MR) and from there eventually to digital/ized document

## Reference linking

- From one paper to its reviews (JFM, ZM, MR)
- From one bibliographical item
  - to the digitized paper (e.g. NUMDAM)
  - to bibliographical databases (JFM, ZM, MR) and from there eventually to digital/ized document
- ← To NUMDAM or concerned Serial's site
  - from bibliographical databases (JFM, ZM, MR)
  - from specialized bibliographies (e. g. RBSM)
  - via OpenURL implementations

### Abstract

Cet article est un exposé synthétique des résultats, obtenus ces dernières années, sur la représentation des points d'un convexe compact d'un espace vectoriel localement convexe séparé, comme barycentre d'une mesure positive portée, en un sens à préciser, par l'ensemble de ses points extrémaux.

On donne plusieurs caractérisations du cas où cette représentation est unique. Enfin on applique les résultats obtenus à l'étude de la frontière associée à un sous-espace vectoriel de  $\mathbf{C}(Q)$  où  $Q$  est un espace compact.

## 5. WHAT MATHEMATICIANS NEED

## 5. WHAT MATHEMATICIANS NEED

Because Mathematics is a cumulative science where published litterature has a key role, mathematicians need

- Easy access to literature
- Long term and public archives
- *Libraries* with scientific quality (refereed content, fine indexing)
- Reasonable economic models
- Documents as logical units and reference hyperlinking

## 5. WHAT MATHEMATICIANS NEED

Because Mathematics is a cumulative science where published litterature has a key role, mathematicians need

- Easy access to literature
- Long term and public archives
- *Libraries* with scientific quality (refereed content, fine indexing)
- Reasonable economic models
- Documents as logical units and reference hyperlinking
