Abstract and Keywords

Abstract: Presentation of a case study and practical guidelines for conducting a scoping review using academic databases. Emphasis on the SALSA framework and its phases, while underscoring key steps for academic writing and dissemination.

Keywords: Literature reviews, scoping reviews, academic databases, research articles, peer-reviewed journals, search equations, SALSA framework, evidence base.

Introduction

Introduction

Some examples: Scopus, Web of Science, Dialnetplus, CSIC

Academic databases serve as a **primary source** for **identifying relevant literature** in a field of study, enabling the subsequent writing of a **literature review** or a **research article**

Introduction

What is a scoping review?

A “type of **evidence synthesis**” which follows a **systematic approach** to broadly explore areas of knowledge.

1. Analyse the extent, range and characteristics of a particular field of knowledge
2. Synthesise methods and theories
3. Identify research gaps

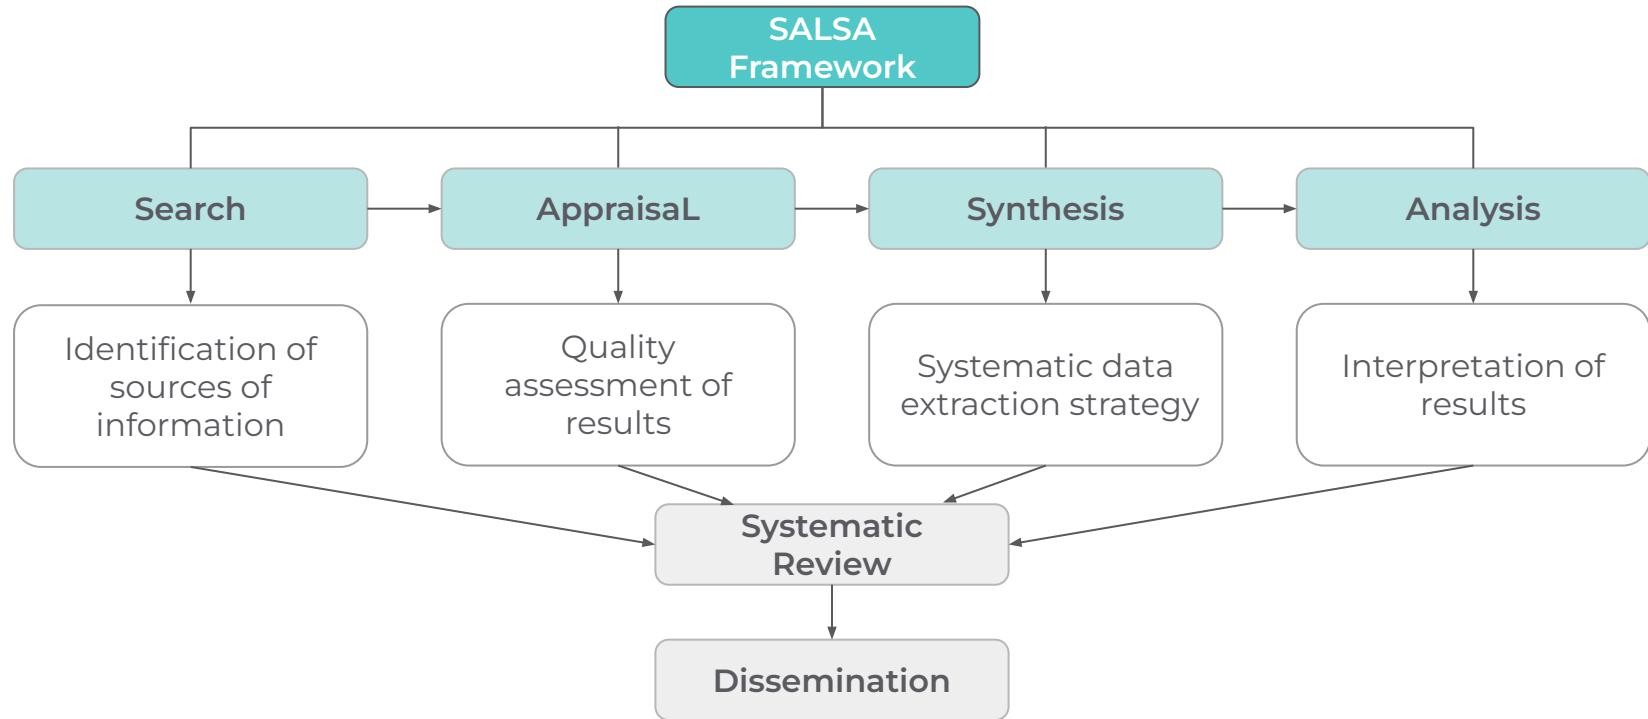

Codina L, Lopezosa C, Freixa P. (2021). Scoping reviews en trabajos académicos en comunicación: frameworks y fuentes, in: Larrondo Ureta A, Meso Ayerdi K, Peña Fernández S, (ed). *Información y Big Data en el sistema híbrido de medios - XIII Congreso Internacional de Ciberperiodismo*; Leioa, Basque Country, Universidad del País Vasco, 15-17 Nov 2021.

Tricco, A.C. et al. (2018) 'PRISMA Extension for Scoping Reviews (PRISMA-ScR): Checklist and Explanation'. *Annals of Internal Medicine*, 169(7), pp. 467-473. Available at: doi: 10.7326/M18-0850

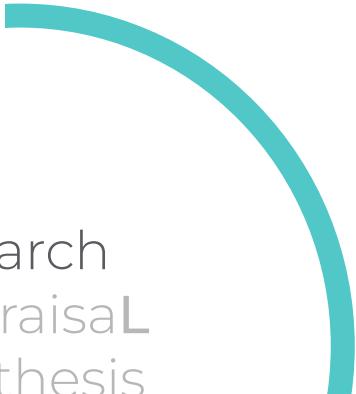

Systematised reviews follow a
systematic, transparent
and **replicable** approach
that promotes **rigour** and
traceability

Lessons Learned

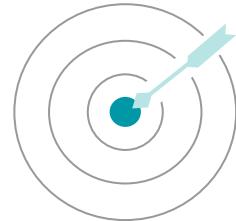

1 Starting a scoping review

Your strategy determines your result

Choose the right
keywords and databases

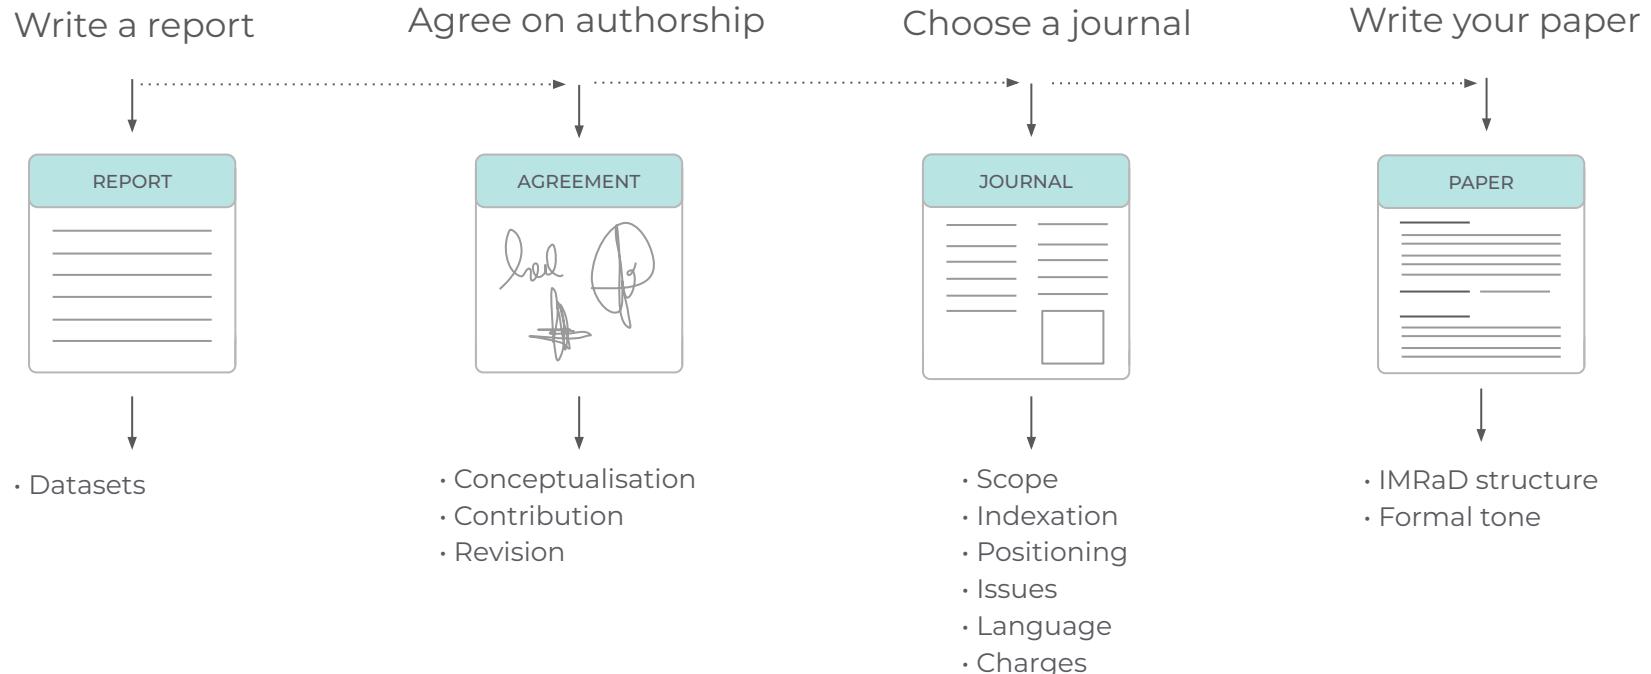

Design an appropriate
data extraction strategy

Keep track of
your progress

2 Writing a research article

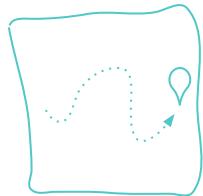

Framing your research

3 Giving a presentation

It's your time to shine

Programme your trip

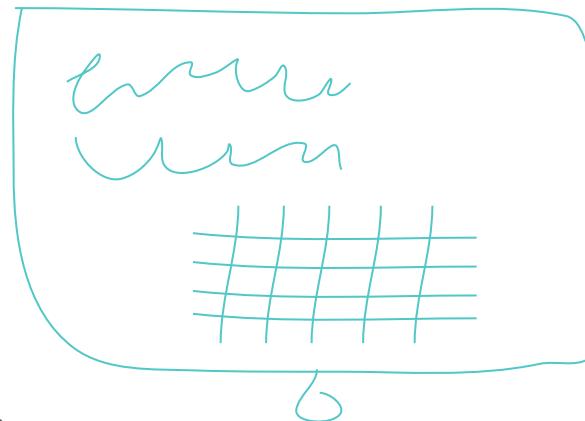

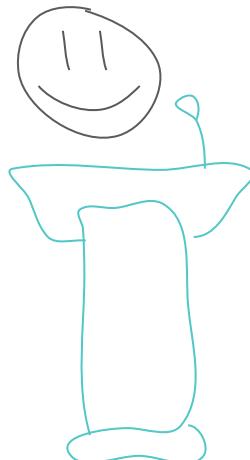

Enjoy the spotlight

Practice your speech

Worry, but not too much

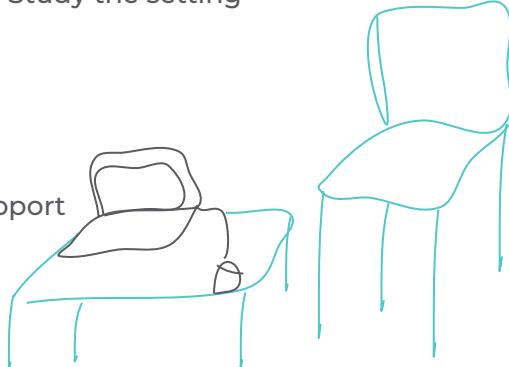

Manage your time

Stress your methodology

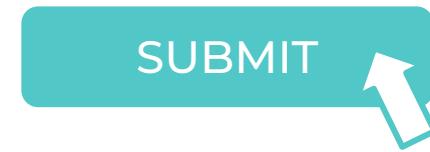

Study the setting

Bring your logistic support

4 Leveraging the research article

Upgrade your version to 'Pro'

Conclusion

Academic databases contain a vast collection of articles published in **peer-reviewed journals**, serving as the **primary source for scientific advancement**. A comprehensive understanding of these databases and the development of systematic reviews allows for a **rigorous and transparent approach** to producing literature reviews and research articles.
