

CYCLADES

An Open Collaborative Virtual Archive
Environment

www.ercim.org/cyclades

Umberto Straccia
I.E.I - C.N.R.
Pisa (ITALY)

CYCLADES

Outline

- Info sheet
- Objectives
- Functionality
- Architecture
- Milestones

Info sheet

- Starting date: February, 1st 2001
- Duration: 30 Months
- Effort: 214.8 p/m
- Budget
 - Total cost: 2,150,000 E
 - EU funding: 1,200,000 E
- Actual State: Month 15 (50%)

Participants

- IEI-CNR (Italy) - Scientific coordinator
 - Umberto Straccia
- UNIVERSITY OF DORTMUND (Germany)
 - Norbert Fuhr
- FORTH (Greece)
 - Dimitris Plexousakis
- FRAUNHOFER FIT (Germany)
 - Tom Gross
- ERCIM (France) - Administrative coordinator
 - Remi Ronchaud

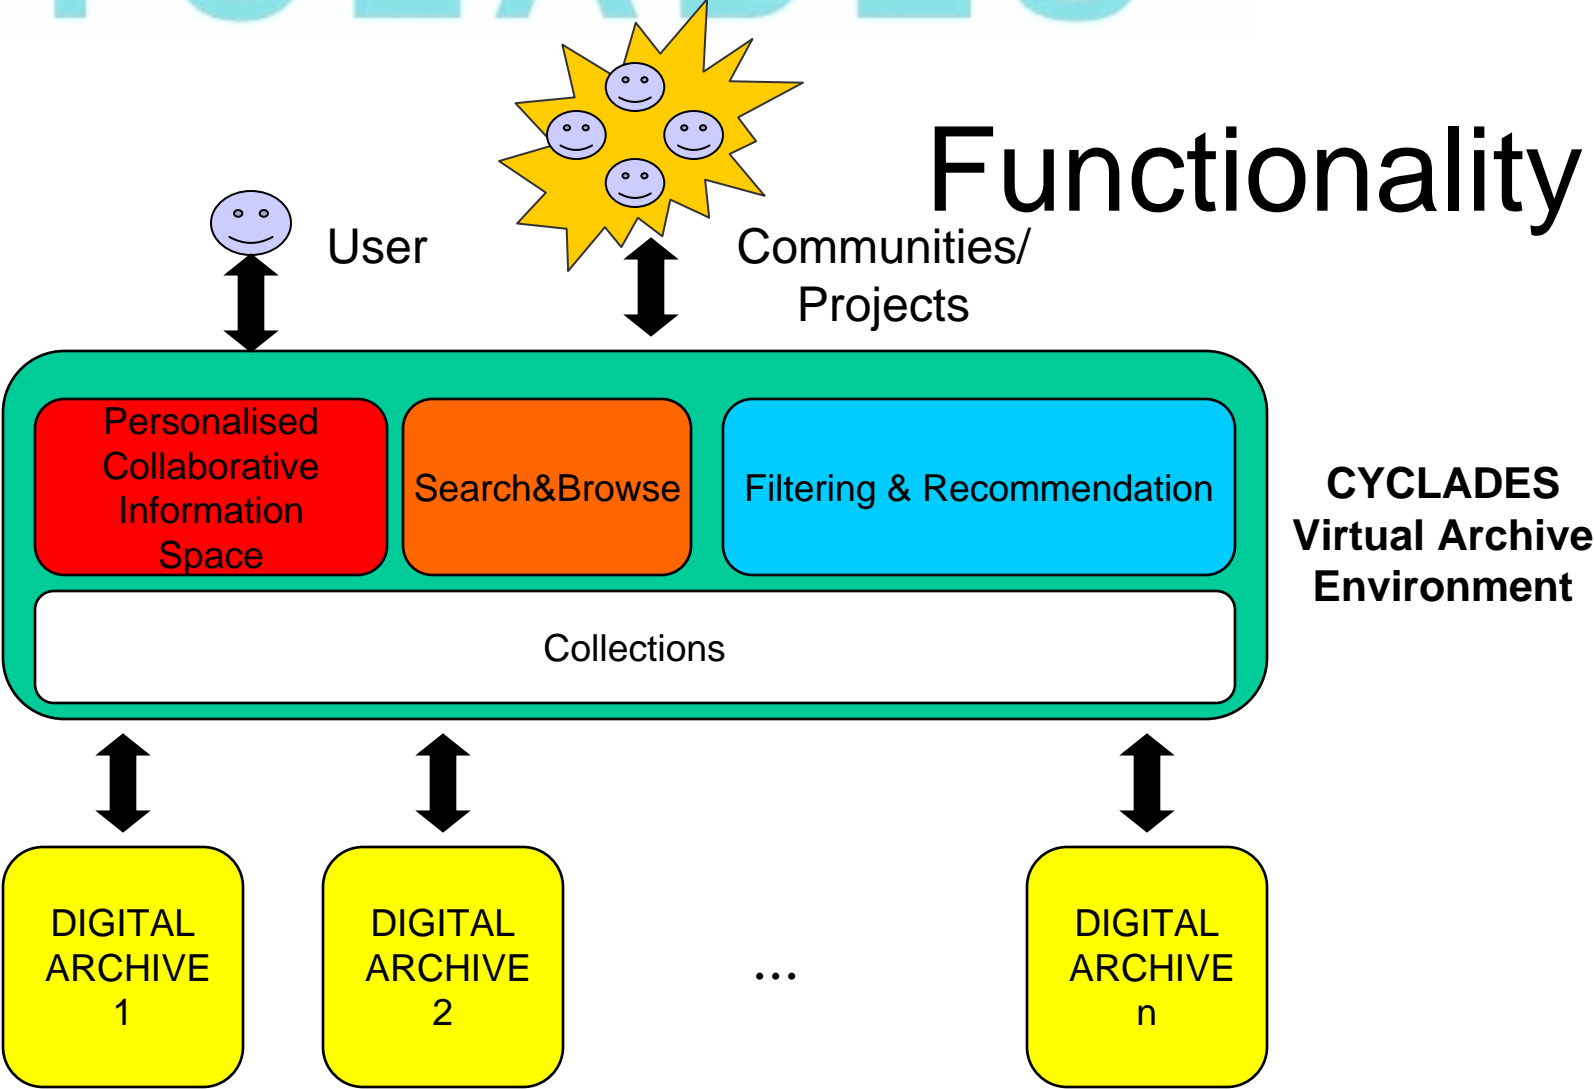

Objectives

- Development of a system which provides *an open collaborative virtual archive environment*
- This environment will support
 - **Users**
 - **Communities** (and their members)
 - **Projects** (and their members)with functionality for advanced
 - **Search** in large, heterogeneous, multidisciplinary digital archives
 - **Personalised Information Space Organisation**
 - **Collaboration**
 - **Filtering** and **Recommendation**

An Open Collaborative Virtual Archive Environment

CYCLADES

Functionality

Large, heterogeneous, multidisciplinary digital archives

The Digital Archives

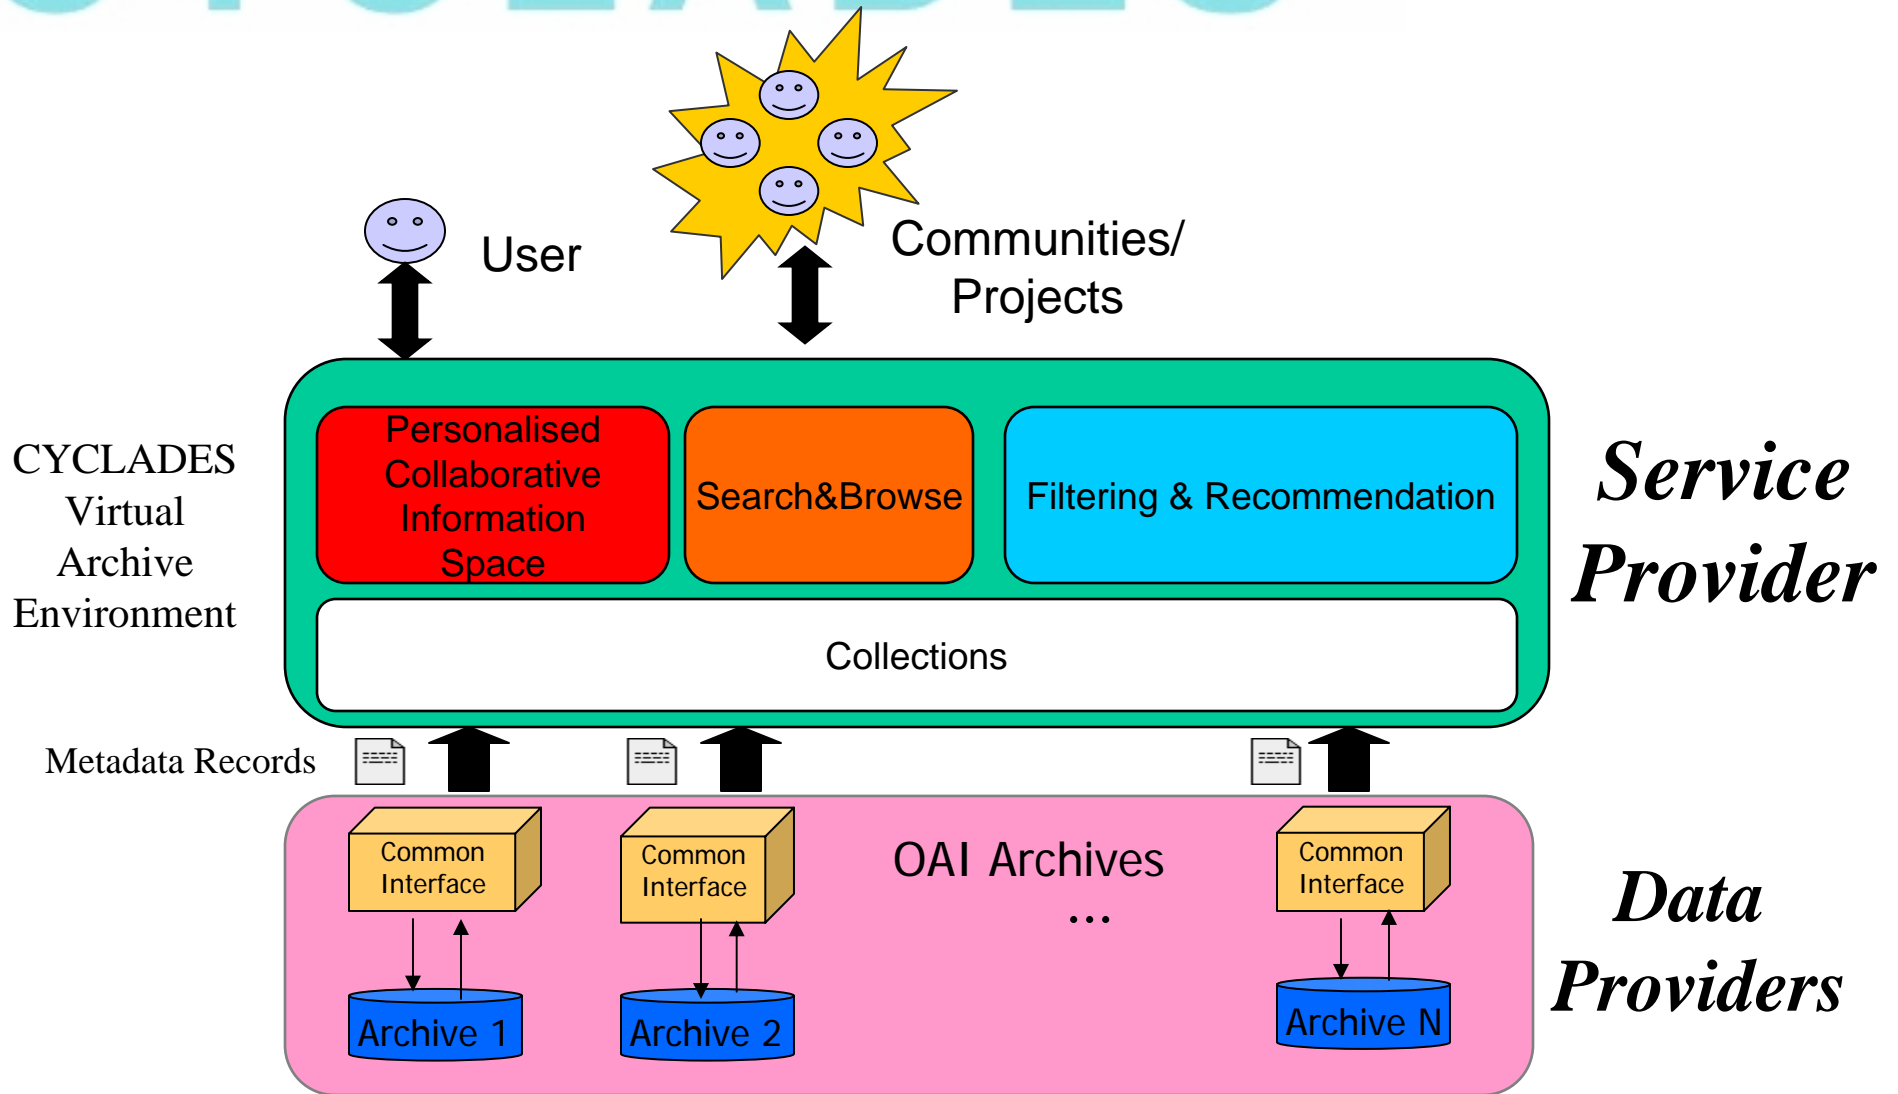

- CYCLADES will provide access to the Digital Archives compliant with the **Open Archives Initiative** (OAI)
 - CYCLADES will Harvest and index records from these archives

FOR MORE INFO...

<http://www.openarchives.org>

AN OPEN COLLABORATIVE VIRTUAL ARCHIVE ENVIRONMENT

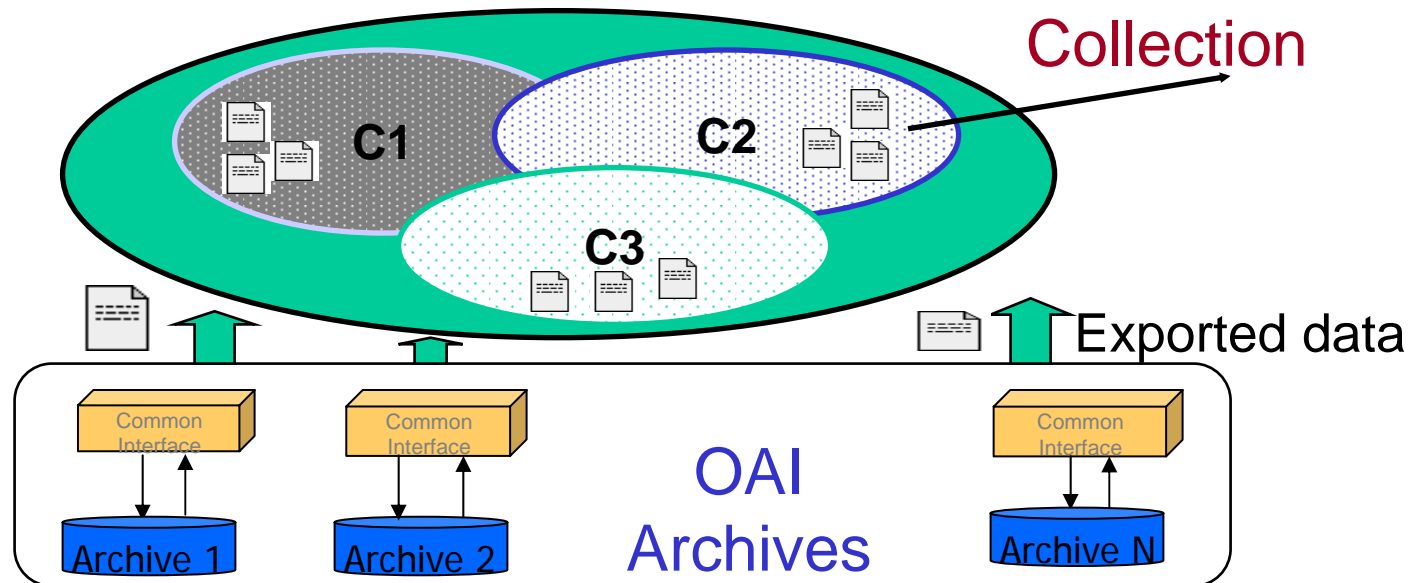

CYCLADES

Large, heterogeneous, multidisciplinary digital archives

Collections

- **Collection:** a set of metadata records collected together, according to a record selection criteria, from the archives
- Collections are NOT materialized
- Collections represent the information space, while the OAI archives remain hidden to the users and communities
- **Users and Communities** may define their own collections, e.g. by means of meet, join and refinement of existing ones

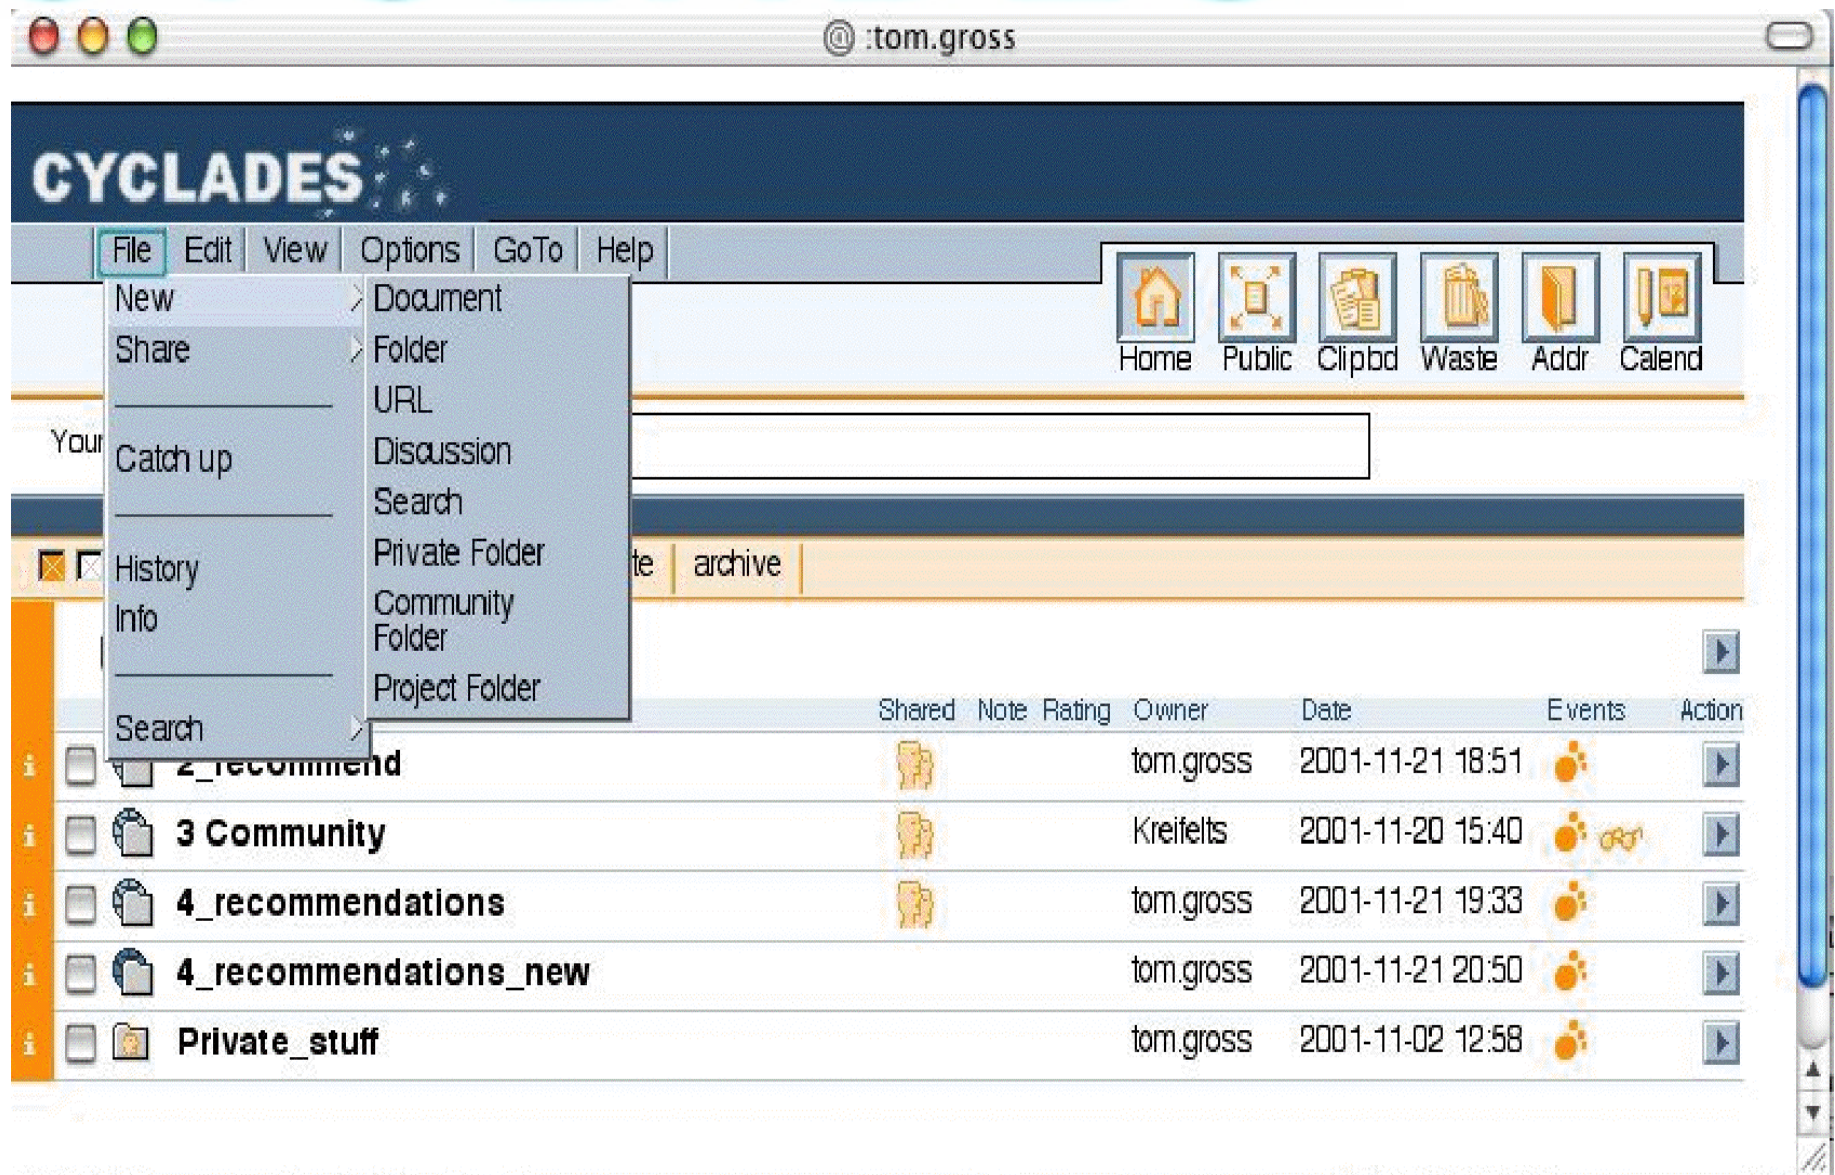

Personalised, Collaborative Information Space

- Users and communities may organize their own information and working space in terms of *folders*
- **Folders:**
 - May be organized hierarchically
 - May contain
 - Metadata records (retrieved from the OAI archives)
 - Uploaded user documents
 - System recommendations (of: users, records, communities, projects)
 - Hyperlinks
 - Annotations
 - User ratings
 - Discussion forums
 - May be *shared* among community/project members
 - Members of the same community/project may share the same folder content

CYCLADES

An Open Collaborative Virtual Archive Environment

CYCLADES

- ***Operations on folders:***
 - Create, Copy, Move folder
 - Edit folder properties

- ***Operations on items in folders:***
 - Documents:
 - Read, Delete, Move, Copy, Versioning
 - Upload, Download documents
 - Annotate documents
 - Rate documents
 - Discussion forum
 - Read, Delete, Reply
 - Edit item properties
 - Access preferences, ...

CYCLADES

Search & Browse

- Users may *search & browse* the collections
- *Search*: typical Search using the collection's search fields, e.g. author, title, description: multiple schema browsing allowed
- Query formulation through browsing

Search

Collection = "*Logic*",
Author = "*Straccia*",
Description = "*Fuzzy Logic*"

Browse

Schema

Attribute

Author
Description
Title
...

Castelli
Straccia
Thanos
...

- Users may save the retrieved metadata records into their folders

QUERY:=

Collection = "*Logic*",
Author = "*Straccia*",
Description = "*Fuzzy Logic*"

Result List

R1. A fuzzy Description Logic
R2. A note on fuzzy IR
...

save

Papers on Fuzzy Logic

Filtering & Recommendation

- Service learns the user information needs (*folder profile*) automatically from the user's folder content
- Uses of folder profiles
 - To be used by users to filter out irrelevant information during a search session: ***filtering of metadata records***
 - To be used by the system to automatically notify users about new data that the system judges relevant for them: ***recommendation of records, users, collections, communities***

Metadata records filtering

- *Personalised ad-hoc searching:*
 - Users formulates a query
 - User selects a folder
 - E.g. QUERY:=
Collection = “*Logic*”,
Author = “*Straccia*”,
Description = “*Logic Programming*”,
Topic Folder = “*Papers on Fuzzy Logic*”

“Find metadata records R in the collection **logic**, such that R refers to a document D written by **Straccia**, whose abstract is about **logic programming**, where R is relevant to my folder **Papers on Fuzzy Logic**”

- *Personalised on-demand searching:*
 - User selects a folder
 - E.g. QUERY:=
Topic Folder = “*Papers on Fuzzy Logic*”

“Find **new** metadata records relevant to my folder **Papers on Fuzzy Logic**”

Recommendations

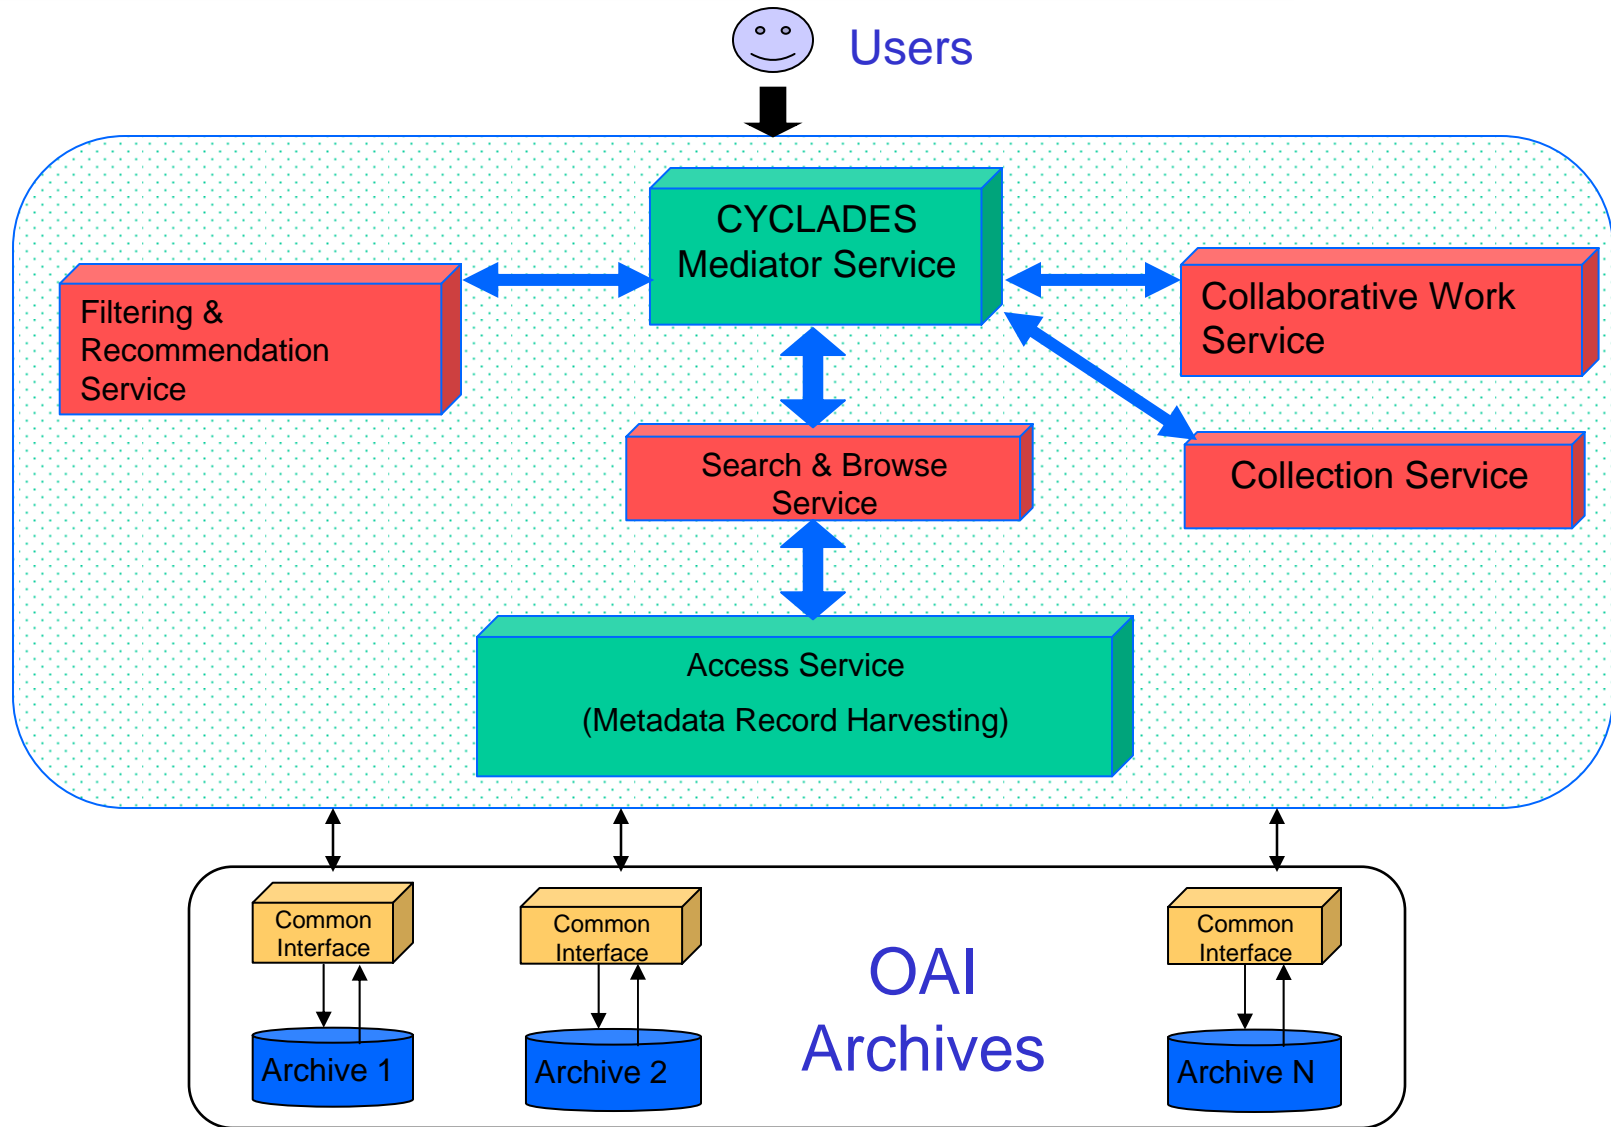

- All types of recommendations are relative to a user folder, i.e. user topic of interest
- *Metadata record recommendation:*
 - The system **recommends records**, based on folder profiles and user ratings (content-based collaborative filtering)
- *Collection recommendation :*
 - The system **recommends collections**, based on folder profiles, user ratings and collections' properties
- *User recommendation :*
 - The system **recommends users**, based on folder profiles, user ratings and users' properties
- *Community recommendation :*
 - The system **recommends communities**, based on folder profiles, user ratings and communities' properties

Architecture

- Modular
 - Basic functionality is allocated on servers
- Distributed
 - Servers may be over the Web
- Open
 - new services can easily be added
- Simple communication protocol
 - XML-RPC (SOAP will be evaluated)

CYCLADES

An Open Collaborative Virtual Archive Environment

Milestones

- User Requirements Collection and Analysis (April 2001)
- Functional and Architectural Specification (August 2001)
- Detailed Service Specification (February 2002)
- Service Prototypes (August 2002)
- System Integration and Testing (May 2003)
- Running Service (June 2003)

Summary

- CYCLADES will be a system providing advanced
 - Access to (at least) OAI compliant archives
 - Personalised collaborative working space
 - Filtering and recommendation functionality

CYCLADES

Functionality:concepts

- Basic concepts in CYCLADES
 - Archive
 - Document
 - Metadata record
 - Metadata schema
 - Collection
 - User
 - Community
 - Project

Functionality:roles

- User roles
 - CYCLADES administrator
 - Archive administrator
 - Collection administrator
 - Single user
 - Community member
 - Community administrator
 - Project member
 - Project administrator

Functionality:actions

- **User actions**

- Register, login
- Search and browse records
- Manage folders and records
- Manage collections
- Manage archives

- **System actions**

- Harvest and index records from archives
- Filter records
- Generate recommendations
