 CASPUR

Agenda

- ❑ The *CIBER* context
- ❑ An overview on usage statistics production for *CIBER*'s users
- ❑ The new portal for usage statistics
- ❑ Users sample identification
- ❑ Network tools chosen to measure users' productivity
- ❑ Analysis methodology
- ❑ Some *preliminary* results
- ❑ Final remarks

The CIBER context

- university library center funded by 5 Universities in Central and Southern Italy
- currently 27 universities and Southern Italy are members about 25.000 professors researchers part of
- aims: electronic content loading, preservation, promotion and dissemination of scholarly publishing training
- more than 5 millions of on-line scholarly articles from 4477 e-journals of 9 different publishers (80% full-text articles) => CIBER Digital Library

ICOLC Fall 2006 – Rome, Domus Pacis – 12-14 October 2006

Usage statistics for CIBER DigLib

- Fully compliant with COUNTER⁽¹⁾ specs (rel. 2) since May 2005 (data available since January 2005)

- All stats data feed a local DB (MySQL based)

(1) <http://www.projectcounter.org>

The new portal for usage statistics

- Interactive multi-user system
- Output schema (stats download included)
 - JR1 and JR2 Standard COUNTER reports
 - Top list reports (journals, issues, articles, subjects, IP)
- New elements of usage analysis:
 - Article cover date
 - Library of Congress Subject e-journals Categories
 - MIUR⁽¹⁾ Subject e-journals Categories
- The “free query” function
- Open source tools for portal development

Scientific production

University of Messina scientific Production

ICOLC Fall 2006 – Rome, Domus Pacis – 12-14 October 2006

Articles download

Number of downloaded articles

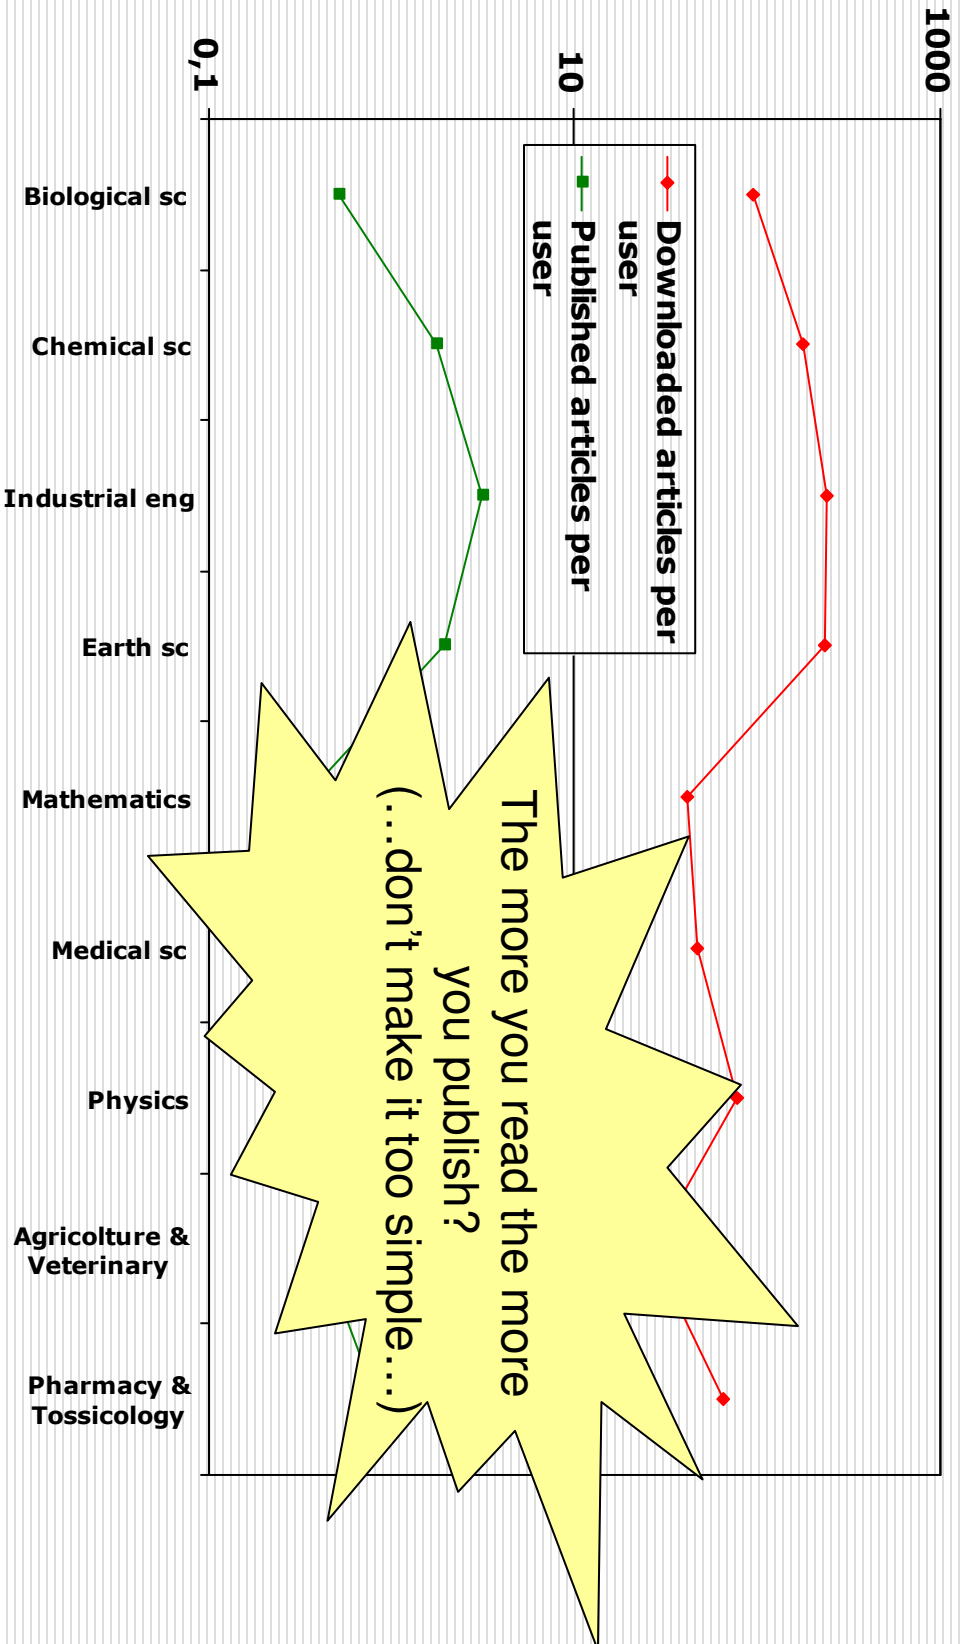

ICOLC Fall 2006 – Rome, Domus Pacis – 12-14 October 2006

Possible correlation?

- ❑ Given a specific year (2004) we tried to find a possible correlation between the number of downloaded articles and scientific production
- ❑ Focus on various scientific disciplines
- ❑ SCOPUS as tool to measure scientific production (better coverage of Italian scholarly journals)
- ❑ Used *normalized* data

The RMS user

ICOLC Fall 2006 – Rome, Domus Pacis – 12-14 October 2006

CASPUR

Final remarks

- Difficulty in getting out coherent information on scientific production
- Data analysis performed only on a specific subset of Messina scientific population
- Interest in enlarging *user's attitude* to scientific production involving other CIBER universities

Thank you for your attention
