

E-prints in Library and Information Science

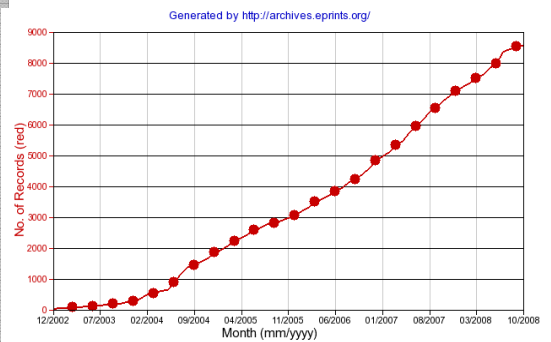

E-LIS: Central repository on Library and Information Science.

Fernanda Peset & Antonia Ferrer, Universidad Polit cnica de Valencia
mpesetm@upv.es, anfersa@upv.es

... is an international open archive for the Library and Information Science fields, established in 2003. With over **8,600** documents as of November 2008, E-LIS is the world's largest archive for LIS. Over half the documents in E-LIS are peer-reviewed. With support for 22 languages and a volunteer editorial team from over 40 countries, E-LIS is an outstanding example of global cooperation, which is reflected in one of the strengths of E-LIS, the diversity of its content.

E-LIS is completely free –for the reader, and for the depositing author. The initiative is not profit orientated. There are journal articles (76% are refereed); conference proceedings, papers and posters (46%, are refereed); theses; book chapters...

The E-LIS server is hosted at CILEA (Italy), employing GNU Eprints software, fully compatible with the **Open Archive Initiative** standards and protocols (OAI-PMH).

Subject oriented repositories like **arXiv, PubMed, E-LIS...** provide the ideal solution for the institutions all over the world. And specially for non academic libraries.

Having all records concentrated in 1 server = efficiency + quality
